Performance assessment is a hot topic in school systems, and educators continue to analyze its costs, benefits, and feasibility as a replacement for high-stakes testing. Until now, researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment. Beyond the Bubble Test: How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field, and not a moment too soon. Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world. The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead teachers need to engage students in deeper learning, assessing their ability to use higher-order skills. Skills like synthesizing information, understanding evidence, and critical problem-solving are not achieved when we teach to multiple-choice exams. Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better. This book provides new perspectives on current performance assessment research, plus an incisive look at what's possible at the local and state levels. Linda Darling-Hammond, with a team of leading scholars, bring together lessons learned, new directions, and solid recommendations into a single, readily accessible compendium. Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States. This comprehensive resource also looks beyond our U.S. borders to Singapore, Hong Kong, and other places whose reform-mindedness can serve as an example to us.

Do names have meaning? Is there a relationship between the meaning of a name and the purpose of one's life? Can the name of a person tell his or her life story? Can the experiences of a person present useful life lessons? Most names of African origin have meaning. A lot of people name their children after good people so that the children will turn out to be good citizens. Several biographies and autobiographies have been written; but in this book the author seeks to draw an association between the meaning of his name and the purpose of his life, using his lived experiences-both negative and positive to present useful lessons to people, especially, the younger generation. The author views life as a journey, involving experiences that are not captured by resumes and profiles of people. In 30 Chapters, the author tells his life story from both Africa and the United States of America to present useful lessons to be explored to improve human life. In this book-Enough to be Shared: A Purpose-Driven Name-A Vivid Life Story Application of George Appiah-Sokye; the author responds to requests for mentorship from both current and prospective accounting students in particular; as well as, the younger generation and Africans in the Diaspora in general. It is hoped the reader will find the contents of this book very useful.
