Perfect Sample Papers is a series prepared as per the guidelines, syllabus and marking scheme issued by CBSE for Class X Summative Assessment II . The salient features of Perfect Sample Papers are: • The questions in the sample papers have been so designed that complete syllabus is covered. • Solutions to the first five sample papers are given. Students are advised to attempt these papers first, and take help from the solutions provided in the book to identify their weak areas and improve them. • Additional ten unsolved sample papers for practice will help students gain confidence. • The questions in the sample papers are of varying difficulty level and will help students evaluate their reasoning, analysis and understanding of the subject matter.

Grading is one of the most hotly debated topics in education, and grading practices themselves are largely based on tradition, instinct, or personal history or philosophy. But to be effective, grading policies and practices must be based on trustworthy research evidence. Enter this book: a review of 100-plus years of grading research that presents the broadest and most comprehensive summary of research on grading and reporting available to date, with clear takeaways for learning and teaching. Edited by Thomas R. Guskey and Susan M. Brookhart, this indispensable guide features thoughtful, thorough dives into the research from a distinguished team of scholars, geared to a broad range of stakeholders, including teachers, school leaders, policymakers, and researchers. Each chapter addresses a different area of grading research and describes how the major findings in that area might be leveraged to improve grading policy and practice. Ultimately, Guskey and Brookhart identify four themes emerging from the research that can guide these efforts: - Start with clear learning goals, - Focus on the feedback function of grades, - Limit the number of grade categories, and - Provide multiple grades that reflect product, process, and progress criteria. By distilling the vast body of research evidence into meaningful, actionable findings and strategies, this book is the jump-start all stakeholders need to build a better understanding of what works—and where to go from here.

The Education Outlook

Research in Education

The discursive construction of identity is often under the control of the dominant forces in society and frequently results in forms of manipulation and abuse. This awareness led to the celebration of the First International Conference on CDA (València 2004), where over three-hundred academics working in the field of Critical Discourse Analysis became actively engaged in this important issue. The seven studies included in this volume have been selected as representative of those areas of human experience that have been given most intellectual attention and considered to be in fact in need for critical unravelling. Ethnic categorization in multicultural classrooms, patriotic discourse construction in Chinese readers, the denial of Palestinian identity in schoolbooks, the diverse constructions of European identities, Arabs constructing themselves on the worldwide web, identity construction in sexual assault trials, the representations of a dangerous 'other' in cases of PLWHAs, are the contextual perspectives embraced in this book to account for forms of power abuse in the discursive construction of identities.
