

Geography Specification A Wordpress

Habeas Viscus focuses attention on the centrality of race to notions of the human. Alexander G. Weheliye develops a theory of "racializing assemblages," taking race as a set of sociopolitical processes that discipline humanity into full humans, not-quite-humans, and nonhumans. This disciplining, while not biological per se, frequently depends on anchoring political hierarchies in

Read Free Geography Specification A Wordpress

human flesh. The work of the black feminist scholars Hortense Spillers and Sylvia Wynter is vital to Weheliye's argument. Particularly significant are their contributions to the intellectual project of black studies vis-à-vis racialization and the category of the human in western modernity. Wynter and Spillers configure black studies as an endeavor to disrupt the governing conception of humanity as synonymous with white, western man. Weheliye

Read Free Geography Specification A Wordpress

posits black feminist theories of modern humanity as useful correctives to the "bare life and biopolitics discourse" exemplified by the works of Giorgio Agamben and Michel Foucault, which, Weheliye contends, vastly underestimate the conceptual and political significance of race in constructions of the human. Habeas Viscus reveals the pressing need to make the insights of black studies and black feminism foundational to the

Environment, Economic Development and the Use of Resources) as well as the geographical and fieldwork skills elements of Papers 2, 3 and 4. Help students focus on achieving the best grades with excellent exam support for each Paper, with exam-style questions, answers at different levels and accompanying comments. Be confident in the content and approach - this resource is written by highly experienced Geography teachers, consulted edited by a CIE Principal Examiner, and produced in partnership with the UK Geographical Association - the home of best practice in Geography teaching.

International migration and urbanization as economic processes can provide great opportunities to solve local and regional economic and social problems and lead to the leveling of global economic unfairness and multi-complexity. However,

Read Free Geography Specification A Wordpress

uncontrolled migration and urbanization can easily destroy market stability and create many new social and economic problems both in developed (due to migration) and developing (due to urbanization) countries. Migration and Urbanization: Local Solutions for Global Economic Challenges is a collection of innovative research that sets basic rules and patterns for state regulation of urbanization and international migration and for increasing the economic efficiency of developed and developing countries. Additionally, the book evaluates the economic impact of urbanization and international migration at the global, national, and regional levels. While highlighting topics including economic security, modern mechanisms, and migration policy, this book is ideally designed for government officials, economists, educators, policymakers, industry leaders, business managers, academicians,

Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high-quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school. Thoroughly updated to take account of the latest research, evidence and policy, this new edition reflects

Read Free Geography Specification A Wordpress

new developments in technology as well as current thinking on curriculum, pedagogy and assessment. Exploring the fundamentals of teaching and learning geography in school, chapters cover: Why we teach geography – its purposes and intent Understanding and planning the curriculum – what to teach Effective pedagogy – how to teach Inclusion Assessment Developing and using resources Fieldwork and outdoor learning Values and school geography's contribution to 'citizenship' Professional development Intended as a core textbook and written with both university and school-based initial teacher education in mind, Learning to Teach Geography is essential reading for all those who aspire to become able, effective and above all, thoughtful and reflective teachers.

A practical guide to research for architects and designers—now updated and expanded! From searching for the best glass to prevent

A Coursebook

Research-informed practice has an ever-growing impact on teaching. It involves reading widely, and discussing and debating evidence from sources outside a teacher's own educational setting. When done well, it can greatly improve practice, although it can often be complex and time-consuming. Bloomsbury CPD Library: Research-Informed Practice provides simple, manageable strategies for busy classroom teachers to access and engage with research and use it to transform teaching. Experienced teacher

and research lead Jennifer Ludgate presents an invaluable guide to using research to inform teaching practice within a busy school term. Full of top tips, it's split into two sections - teach yourself and train others - to develop a research-informed culture across the whole school. This easy-to-follow title in the Bloomsbury CPD Library series features self-evaluation tasks for reviewing your own progress and includes ready-to-use training plans for 20 hours of CPD. With all handouts and presentation slides available as a free

download from the companion website, this is an essential resource for any classroom teacher or school leader who would like to improve teaching practice using research and evidence.

The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans—including gun owners—for stronger gun policies.

Written with reference to the 2007 Professional Standards for the Award of QTS

and initiatives such as the Primary National Strategy, each chapter offers practical guidance on topics such as planning, assessment and the creation of resources. It provides summaries of key topics in primary geography, including the study of places, environmental sustainability, learning beyond the classroom, global issues, citizenship and cross-curricular approaches to promote children's subject knowledge, well-being and learning within primary geography. With research summaries, practical and reflective tasks, and

classroom examples, this book helps trainees and NQTs teach primary geography confidently and creatively throughout the primary school.

This book captures an urgent moment for language teaching, learning and research.

At its core are a series of debates concerning gender stereotyping, the place of linguistics in modern languages, language activism, multilingualism and modern languages and digital humanities. Taken together, these debates explore the work that languages, and that those who

learn and speak them, do in the world as well as the way we think 'through' and 'in' a language and are shaped by it. Language Debates acknowledges the history of language teaching and the current realities of language teaching and learning. It is bold in suggesting ways forward for reform and for policy, setting languages and language learning at the heart of a consciously transformative set of goals. This book is therefore essential reading for academics, language teachers, policy makers, students, activists and those passionate about

progressing language learning and teaching. The editors and contributors make up a multilingual and multicultural team who work across languages, cultures and borders with a globally-informed approach to their work. Uniquely, the debates in this volume are based on events with participants in the Language Acts and Worldmaking Debates Series and/or workshops within the wider research project and take into account the ensuing discussions there. Each debate is accompanied by an interview which serves

as a model on how to continue the conversation beyond the printed pages of the book. You can also discover ways to join the debate through links on the Language Acts and Worldmaking series website (www.jmlanguages.com/languageacts) which includes recorded debates, additional materials and more information about the series. Like all the volumes in the Language Acts and Worldmaking series, the overall aim is two-fold: to challenge widely-held views about language learning as a neutral instrument of globalisation and to innovate

and transform language research, teaching and learning, together with Modern Languages as an academic discipline, by foregrounding its unique form of cognition and critical engagement. Specific aims are to:

- propose new ways of bridging the gaps between those who teach and research languages and those who learn and use them in everyday contexts from the professional to the personal***
- put research into the hands of wider audiences***
- share a philosophy, policy and practice of language teaching and learning which turns research***

into action · provide the research, experience and data to enable informed debates on current issues and attitudes in language learning, teaching and research · share knowledge across and within all levels and experiences of language learning and teaching · showcase exciting new work that derives from different types of community activity and is of practical relevance to its audiences · disseminate new research in languages that engages with diverse communities of language practitioners.

that focus on doing research as well as for courses that stress reading and understanding research.

The 'knowledge turn' in curriculum studies has drawn attention to the central role that knowledge of the disciplines plays in education, and to the need for new thinking about how we understand knowledge and knowledge-building. Knowing History in Schools explores these issues in the context of teaching and learning history through a dialogue between the eminent sociologist of curriculum Michael Young, and leading figures in history education research and practice

Read Free Geography Specification A Wordpress

from a range of traditions and contexts. With a focus on Young's 'powerful knowledge' theorisation of the curriculum, and on his more recent articulations of the 'powers' of knowledge, this dialogue explores the many complexities posed for history education by the challenge of building children's historical knowledge and understanding. The book builds towards a clarification of how we can best conceptualise knowledge-building in history education. Crucially, it aims to help history education students, history teachers, teacher educators and history curriculum designers navigate the challenges that
