

Geriatric Nursing Nclex Questions

Designated a Doody's Core Title! "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." Score: 90, 4 Stars. -Doody's Medical Reviews "Donna Bowles's Gerontology Nursing Case Studies is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice."--The Gerontologist "The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills." Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing "This is a terrific text that provides nurses and other health care providers [with] good basic information about clinical problems and challenges we face in providing care to older adults. It should be considered required reading in all undergraduate programs." --From the foreword by Barbara Resnick, PhD, CRNP, FAAN, FAANP Professor, University of Maryland School of Nursing Sonya Ziporkin Gershowitz Chair in Gerontology At the heart of this unique volume are 100 case studies of older adults that address nearly every issue—physical, mental, and psychosocial—that may confront health care providers who work with the aging population. These case studies, culled from contributors with several centuries' worth of combined nursing expertise, are designed to guide nursing students in the development of interventions that encompass both complementary and alternative health strategies. Exercises interspersed throughout each case study are designed to foster critical thinking and decision-making skills. These case narratives provide a holistic approach to problem solving in regard to political, ethical, and legal issues; loss and end-of-life issues; elder abuse; depression, addiction and suicide; self-esteem and family relationships; sexuality; age-related health issues; cognitive impairment; cultural diversity as it relates to aging; pain management; and sleep disturbances. The volume also addresses such contemporary psychosocial issues as gambling addiction, hoarding behavior, emergency preparedness, the aging driver, and long-distance caregiving. Key Features: Provides 100 evidence-based case studies Cultivates development of critical thinking and decision-making skills Features realistic, contemporary scenarios Designed for use across the gerontology nursing curriculum Geared for AACN and NLN Accreditation Organized according to the needs of actual clinical settings

Provide holistic, compassionate nursing care for older adults! Based on evidence-based protocols, *Toward Healthy Aging, 11th Edition* helps you master gerontological nursing skills with an approach that focuses on health, wholeness, and the potential in aging. In promoting healthy aging, the text emphasizes caring and respect for the person. Special sections provide an honest look at the universal experience of aging. Written by gerontological nursing experts Theris A. Touhy and Kathleen F. Jett, this classic text helps you learn to apply scientific research, build critical thinking skills, and prepare for success on the NCLEX® exam and in clinical practice. *Promoting Healthy Aging: Implications for Gerontological Nursing* sections help you apply concepts to assessments and interventions. A *Student Speaks* and *An Elder Speaks* sections at the beginning of every chapter provide perspectives of older people and nursing students. *Nursing Studies* provide practice examples designed to assist you in assessment, planning, interventions, and outcomes to promote healthy aging. Learning objectives in every chapter introduce important content and define learning goals and expectations. Key concepts provide a concise review of the most important points found in each chapter. *Critical Thinking Questions* and *Activities* help you apply concepts and build clinical judgment skills. *Safety Alerts* emphasize QSEN competencies and safety issues related to care of older adults. *Tips for Best Practice* boxes summarize evidence-based nursing interventions for practice. *Research Highlights* boxes summarize important research studies in the field of gerontology *Research Questions* include suggestions and ideas for pursuing nursing research. *Healthy People* boxes reference the goals cited in *Healthy People 2020*. NEW! Next Generation NCLEX® (NGN) examination-style case studies at the end of chapters include questions to help you prepare for the NGN exam. NEW! Completely updated content helps you develop clinical judgment skills, identified by the NCSBN and the AACN as a key attribute of professional nursing. NEW! Updated topics include COPD guidelines, theories of aging, medication use and misuse, palliative care, wound care guidelines, genomic research, and LGBT family relationships and sexuality in older adults.

Gerontological Nursing & Healthy Aging provides thorough coverage of promoting healthy aging when caring for older adults. The intent throughout the book is to facilitate the healthiest adaptation possible for any older adult, regardless of the situation and disease process. The majority of the book is devoted to discussing the significant problems that may occur and methods that nurses may use to make these problems more bearable, to solve some, and to help the elder find the best possible resolution towards healthy aging. Incorporates healthy aging strategies to maximize the healthiest behaviors of clients/patients with dementia and their caregivers. Disease processes are discussed in the context of healthy adaptation, nursing support & responsibilities to help the reader gain an understanding of their client's experience. Focus on health and wellness establishes a positive perspective to aging. Careful attention to age, cultural, and gender differences are integrated throughout to help the nurse understand these important considerations in caring for older adults. Each chapter provides a consistent organization including learning objectives, research & study questions/activities. Assessment guidelines are incorporated throughout as tables, boxes, and forms to provide useful tools for practice. Activities and

discussion questions at the end of every chapter provide situations to expand student knowledge and understanding. Appendices and resource lists assist in further exploration of material. Text correlates with federal guidelines for Healthy People 2010 to assist the student in integrating knowledge about healthy aging considerations. Expanded content on pharmacologic and nonpharmacologic pain management in Chapter 15 and integrated within appropriate content sections. Completely revised Culture and Aging chapter includes discussions of health disparities and working with interpreters to help identify nursing care interventions appropriate for ethnic elders. New author team with Theris Touhy and Kathleen Jett adds a wealth of experience related to gerontological nursing education and research.

997 Practice Questions with Rationale for Gerontological Nurse Certification

100 Narratives for Learning

Ebersole & Hess' Toward Healthy Aging

Client Management & Leadership Success

Print+CourseSmart

Ebersole & Hess' Gerontological Nursing and Healthy Aging is the only gerontological nursing text that follows a wellness-based, holistic approach to older adult care. Designed to facilitate healthy aging regardless of the situation or disease process, this text goes beyond simply tracking recommended treatments to address complications, alleviate discomfort, and help older adults lead healthy lives. Featuring evidence-based practice boxes, safety alerts, expanded tables, and careful attention to age, gender, and cultural differences, Ebersole & Hess' Gerontological Nursing and Healthy Aging is the most complete text on the market. Focus on health and wellness helps you gain an understanding of the patient's experience. AACN and the Hartford Institute for Geriatric Nursing core competencies integrated throughout. Consistent chapter organization and pedagogy, including Learning Objectives, Glossary, and Research and Study Questions/Activities. Evidence-Based Practice boxes summarize research findings that confirm effective practices or identify practices with unknown, ineffective, or harmful effects. Careful attention to age, cultural, and gender differences helps you understand these important considerations in caring for older adults. Expanded tables, boxes, and forms, including the latest scales and guidelines for proper health assessment make information easy to find and use. Activities and discussion questions at the end of every chapter equip you with the information you need to assess the patient. UPDATED! Healthy People 2020 boxes integrate information about healthy aging. NEW! Safety Alerts highlight safe practices and quality of care QSEN competencies. NEW! Chapter on Neurologic Compromise expands content on stroke and Parkinson's disease.

Part of the popular LPN Threads series, this concise text presents the theories and concepts of aging, the physiologic and psychosocial changes and problems associated with the process, and appropriate nursing interventions. With its easy-to-read, clear writing style, this text provides exactly the right depth and breadth of geriatrics content for LPN/LVNs. Clear, concise, consistent writing throughout. Nursing Process section (in appropriate chapters) provides a strong framework for the discussion of the nursing care of the elderly patient as related to specific disorders. Essential ethical and legal issues are presented as they relate to end-of-life care, restraints, and elder abuse. Clinical Situations provide individualized cases for students to study and learn from. Nursing Interventions are grouped according to health care setting to make it easier to determine the appropriateness of individual interventions for different patient populations. All-in-one Student Activities workbook is included in a perforated section at the back of the book and includes NCLEX-style multiple-choice questions as well as the new NCLEX-style questions (short-answer and fill-in-the-blank) to help students review chapter content and prepare for the NCLEX exam (answers are found in the Instructor's Resource Manual). New chapter on end-of-life care addresses essential content for both institutional and the home setting, including information on palliative and hospice care, pain management, and how belief systems affect the dying person and caregivers. Delegation, leadership, and management content is integrated throughout to address the changing role of LPN/LVNs. Delegation Considerations boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. Second color added to the design adds visual appeal and helps to emphasize key content. Cultural Considerations boxes help students understand how to provide culturally sensitive patient care. Complementary and Alternative Therapy boxes address popular therapies that are used in

pain relief and other treatments. Patient Teaching boxes instruct and inform both elderly patients and their caregivers about health promotion, prevention, and age-specific interventions. Critical Thinking boxes pose questions designed to stimulate thought and help students develop and improve their ability to think critically.

One of the indispensable member of the healthcare team is the nurse. Compassion and caring attitude are some of the good qualities of the nurse as well as the other members of the healthcare team. The nurse who specializes in geriatric care and management is called a Gerontological Nurse (GN). Such a nurse have undergone specialized training in the field of geriatric care and management as a nurse practitioner, a specialist or a generalist. A certification examination is then required for the nurse to practice and earn the title of Gerontological Nurse. The Gerontological Nurse certification requires passing a test administered by the American Nurses Credentialing Center (ANCC). Depending on the type of examination, there is a prerequisite, otherwise known as eligibility criteria. For a GN nurse practitioner and CNS (Clinical Nurse Specialist), an active RN license; postgraduate, masters or doctoral degree with advance courses in pathophysiology, health assessment, differential diagnosis, disease management, health promotion, and pharmacology is required. A GN generalist is required to have 2,000 practice hours in geriatric care and an active RN license. The examination contains 175 questions, of which 150 are scored and 25 are considered pre test. The policies and rules may change from time to time. The requirement stated in this book are true at the time of the author's research. This 2nd edition contains revised practice questions with rationale covering the different components of Gerontological Nursing. It is not intended to reflect the exact questions of the board examination. The author's intention is to provide effective review material for the reader. Various levels of difficulty are reflected in this book. There are easy and difficult questions. Sample Questions: *The nurse is explaining the coverage of Medicare part A to a 72 year old client with amyotrophic lateral sclerosis. Which of the following is included in the Medicare program? (a. medications b. inpatient psychiatric services c. speech therapy d. none of the above) *During an assessment, the nurse found raised skin tags for an 85 year old man. Which of the following identifies this finding? (a. acrochordon b. actinic keratosis c. cutaneous horn d. senile lentigine) *A 78 year old client with Alzheimer's disease demonstrated spatial disorientation. Irritability and agitation were also observed. What will be the best intervention for this type of client? (a. show family pictures b. administer Aricept c. provide a safe place to wander d. none of the above) *The nurse is assigned to a 90 year female old client with acute renal failure. Her serum creatinine is 0.9 mg/dl and weighs 40 kilograms. What would be the client's creatinine clearance? (a. 28 ml/minute b. 26 ml/minute c. 24 ml/minute d. 22 ml/minute) *A female client with substance abuse disorder is undergoing assessment. She told the nurse "I got some reefer inside my bra." Which of the following is being implied by the client? (a. marijuana b. cocaine c. heroin d. none of the above) *A 75 year old client with delirium is undergoing assessment. The other clients feel threatened by the client's behavior. Which of the following caused the client's condition? (a. dehydration b. psychiatric comorbidity c. functional dependence d. all of the above)

Basic Geriatric Nursing

Genetics/genomics Nursing

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. This text covers the theory and practice of wellness-oriented gerontological nursing, addressing both physiologic and psychosocial aspects of aging. Organized around the author's unique Functional Consequences Theory, the book explores age-related changes as well as the risk factors that often interfere with optimal health and functioning. Key features include: NEW! Technology to Promote Wellness in Older Adults boxes describe examples of technology-based interventions that can be effective for promoting wellness for older adults. NEW! Interprofessional Collaboration (IPC) material, which is found in boxes or is highlighted with orange bars in the margins, indicates the responsibilities of nurses to collaborate with other professionals and paraprofessionals in health care and community-based settings when caring for older adults. NEW! Global Perspective boxes provide examples of the various ways in which health care professionals in other countries provide care for older adults. NEW! Unfolding Patient Stories, written by the National League for Nursing, are an engaging way to begin meaningful conversations in the classroom. These vignettes, which open each

unit, feature patients from Wolters Kluwer's vSim for Nursing | Gerontology (co-developed with Laerdal Medical) and DocuCare products; however, each *Unfolding Patient Story* in the book stands alone, not requiring purchase of these products. For your convenience, a list of these case studies, along with their location in the book, appears in the "Case Studies in This Book" section later in this frontmatter. **NEW!** *Transitional Care Unfolding Case Studies*, which unfold across Chapters 27 through 29, to illustrate ways in which nurses can provide effective transitional care to an older adult whose progressively worsening condition requires that her needs be met in several settings. For your convenience, a list of these case studies, along with their location in the book, appears in the "Case Studies in This Book" section later in this frontmatter. Updated unfolding case studies illustrate common experiences of older adults as they progress from young-old to old-old and are affected by combinations of age-related changes and risk factors. Evidence-based information is threaded through the content and summarized in boxes in clinically oriented chapters. Assessment and intervention guidelines help nurses identify and address factors that affect the functioning and quality of life of older adults. Nursing interventions focus on teaching older adults and their caregivers about actions they can take to promote wellness. Case studies include content on transitional care, interprofessional collaboration, and QSEN!

*****Includes Practice Test Questions***** *Gerontological Nurse Exam Secrets* helps you ace the Gerontological Nurse Exam without weeks and months of endless studying. Our comprehensive Gerontological Nurse Exam Secrets study guide is written by our exam experts, who painstakingly researched every topic and concept that you need to know to ace your test. Our original research reveals specific weaknesses that you can exploit to increase your exam score more than you've ever imagined. *Gerontological Nurse Exam Secrets* includes: *The 5 Secret Keys to Gerontological Nurse Exam Success: Time is Your Greatest Enemy, Guessing is Not Guesswork, Practice Smarter, Not Harder, Prepare, Don't Procrastinate, Test Yourself; A comprehensive General Strategy review including: Make Predictions, Answer the Question, Benchmark, Valid Information, Avoid Fact Traps, Milk the Question, The Trap of Familiarity, Eliminate Answers, Tough Questions, Brainstorm, Read Carefully, Face Value, Prefixes, Hedge Phrases, Switchback Words, New Information, Time Management, Contextual Clues, Don't Panic, Pace Yourself, Answer Selection, Check Your Work, Beware of Directly Quoted Answers, Slang, Extreme Statements, Answer Choice Families; A comprehensive Content review including: Biological Theories of Aging, Havighurst's Theory, Hypertension, Cognitive Changes, Loop Diuretics, Thiazide Diuretics, Systolic Heart Failure, Myocardial Infarction, Vasodilators, Aldosterone Agonist, Venous Insufficiency, Atrial Dysrhythmias, Chronic Bronchitis, Malnutrition, Fluid Balance, Hyposalivation, Dysphagia, Acute Gastrointestinal Hemorrhage, Hepatic Cirrhosis, Benign Prostatic Hypertrophy, Urinary Tract Infections, Pyelonephritis, Chronic Renal Failure, Osteoporosis, Rheumatoid Arthritis, Cardiac Dysrhythmias, Musculoskeletal Deformities, Hyperglycemia, Ketoacidosis, Thermoregulation, Thyrotoxic Storm, Electrolyte Imbalances, Respiratory Acidosis, Jung Theory of Individualism, Post-Menopausal Changes, Sociological Theories of Aging, and much more...*

Provide compassionate, professional nursing care for older adults! Designed for LPN/LVNs, *Basic Geriatric Nursing, 8th Edition* offers a practical introduction to concepts of aging and the physiologic and psychosocial changes that affect the elderly adult. Clear guidelines help you master basic skills such as health assessment, nursing diagnosis, therapeutic communication, medication administration, and nursing interventions in a variety of health care settings. New Next-Generation NCLEX® examination-style case studies help you develop clinical judgment, and nursing care plans show how to apply theory to practice. Written by experienced nursing educator Patricia Williams, this book provides the knowledge and skills you need to care for an aging population. Learning features in each chapter include objectives, key terms with phonetic pronunciations, basic concepts, and clinical application, all connected by case examples and a relevant research study or analysis of multiple studies. Nursing Process sections provide a framework for nursing care of older adults as related to specific disorders. *Get Ready for the NCLEX® Examination!* sections include key points, additional learning resources, and NCLEX review questions with answers and rationales on the Evolve website. Nursing Care Plans provide real-world examples of care plans along with critical thinking questions. Nursing interventions are grouped by health care setting, e.g., acute care, extended care, home care. Clinical Situation boxes highlight real-life care scenarios. Coordinated Care boxes address leadership and management issues for the LPN/LVN, and include topics such as restraints and end-of-life care. Critical Thinking boxes help you develop and improve skills in clinical judgment. Special boxes are included for health promotion, safety, nurse alerts, patient education, cultural considerations, home health considerations, complementary health approaches, and more. Medication tables summarize information about drugs commonly used in geriatric nursing. **NEW!** Next-Generation NCLEX® examination-style case studies at the end of chapters include new-format questions to help you prepare for the licensure examination. **NEW!** Discussion of the NCSBN Clinical Judgment Measurement Model helps you learn decision making and develop the skills needed to plan effective nursing care. **NEW!** Free Study Guide on the Evolve website includes Next-Generation case studies and review questions to reinforce your understanding.

2nd Edition

Review Questions and Strategies

Ebersole and Hess' Gerontological Nursing & Healthy Aging

Geriatric Nurse Practitioner

Praise for the first edition: "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." Score: 90, 4 Stars —Doody's Medical Reviews "[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice." —The Gerontologist "The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff

educators) to facilitate critical learning skills." —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to "gray area" situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client's needs infused throughout exercises

The Gerontological Nurse Certification Review is an invaluable reference and certification test review guide for nurses preparing for RN Gerontological certification. Students studying gerontology, teachers preparing gerontology classes, and RNs working with older adults will also find this a practical and useful resource. The text presents information about preparing for the certification exam, a comprehensive compilation of content specific to gerontology, and a test bank of questions specifically developed for the RN. Why this is the only test review you need: Developed to address all aspects of ANCC exam Formatted for easy review and understanding of concepts Up-to-date and evidence-based 500 review questions to adequately prepare future gerontological nurses One of a kind--no other gerontological review books are currently available

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Gerontological Nursing: Competencies for Care, Second Edition is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. This innovative text is the first of its kind to have over 40 contributing authors from many different disciplines. Some of the key features of the text include chapter outlines, learning objectives, discussion questions, personal reflection boxes, case studies and more!

Over 850 questions review the critical content you need to know to prepare for geriatric nurse practitioner certification - and to succeed in practice. The questions test your grasp of the material and help you identify areas that require further study.

Gerontology Nursing Case Studies

Fast Facts and Practice Questions, Second Edition

Gerontological Nurse Certification Review

Family Practice and Adult-Gerontology Primary Care Nurse Practitioner Certification Examination
(Gerontological Nursing)

"NCLEX-RN Questions and Answers Made Incredibly Easy" gives nursing students who are studying for NCLEX what they want most: Questions, questions and more questions. It provides 3,000 questions in all. Students will find NCLEX-style question divided up into chapters covering all key NCLEX topics; adult, maternal-infant, child, perioperative, geriatric, and mental health nursing; home health nursing; and more. Case study type questions are provided.

Prepares students to meet the challenges of setting priorities, delegating, and assigning nursing tasks and managing clients and nursing staff.

"[This book] is an important reference for nurses seeking to take the certification exam to validate their own practice. The practice of nursing over the next decades will demand age-specific knowledge for people across the life span. Nurses need to develop expertise in the area of geriatrics and have that expertise validated through certification." Tara A. Cortes, PhD, RN, FAAN The Hartford Institute for Geriatric Nursing (From the Foreword) Nurse practitioners have long required a comprehensive certification review book for the American Nurses Credentialing Center (ANCC) and the American Academy of Nurse Practitioners Gerontological Nurse Practitioner (GNP) certification examinations. Gerontological Nurse Practitioner Certification Review is the first book to provide a thorough review of test content to

effectively prepare nurses to successfully pass the GNP certification exam. With over 200 practice questions culled from the real ANCC test outline, this is the only book nurse practitioners need to pass the ANCC exam. Challenging and reflective questions and answers are provided at the end of each chapter for topic review, with a final test offered at the end of the book. By providing students the ability to take the "mock test," this book instills confidence, preparing students for the actual certification exam. Gerontological Nurse Practitioner Certification Review contains: Guidelines on question dissection and analysis, as well as over 200 questions culled from the real ANCC test outline A comprehensive review of health promotion and disease prevention, assessment of acute and chronic illness, clinical management and pharmacological/nonpharmacological interventions, professional role and policy issues, and more An examination of the nurse practitioner and patient relationship Additionally, this book helps students in gerontological nurse practitioner, family nurse practitioner, and adult nurse practitioner programs with course program examinations that refer to older adults.

"In this book, the tools and clear presentation of information related to the actual testing process provide the learner with a framework for confidence as he or she prepares for the exam. More important, however, is the elaborate presentation of the certification content and the attention to the important physical and psychosocial elements of the human aging process." --Geraldine Bednash, PhD, RN, FAAN Executive Director American Association of Colleges of Nursing This is the only certification review for the gerontology nursing specialty exam that has it all--a comprehensive review section covering key content included on the exam, well-honed test-taking strategies, and an extensive number of exam-style questions with answers and rationales. The second edition is completely updated to mirror the new format and content of the 2015 certification exam. It now features rationales for all review questions to promote critical thinking and includes new or expanded sections on health promotion and person-centered care, state-of-the-art drug information, and instruction on leadership, management, patient education, and population health. Concise and to the point, this resource contains all of the information required for test success, including step-by-step directives on how to best prepare for the certification exam, a meticulous content review presented according to the test blueprint, and 500 questions with answers and rationales that mirror the type of questions included on the exam. The dissection and analysis of a variety of questions likely to appear reinforce crucial test-taking strategies, and clues for memorizing information and tips for prioritizing answers offer additional tactics for exam success. An unrivalled resource for test preparation, the book will also be useful for students and teachers of gerontology and practicing nurses working with older adults. Key Features: Mirrors the new 2015 certification test plan Provides expanded content on health promotion and person-centered care Offers updated information on new medications and treatments Presents new content on leadership, management, patient education, and population health New to the second edition, are rationales for all 500 questions

Gerontological Nurse Practitioner Certification Review

Nursing for Wellness in Older Adults

3000+ Questions!

Case Studies in Gerontological Nursing for the Advanced Practice Nurse

Gerontology Nursing Case Studies, Second Edition

The National Council Licensure Examination (NCLEX-RN® exam) has one purpose: To determine if it's safe for you to begin practice as an entry-level nurse. It is significantly different from any test that you took in nursing school. While nursing school exams are knowledge-based, the NCLEX-RN® tests application and analysis uses the nursing knowledge you learned in school. You will be tested on how you can use critical thinking skills to make nursing judgments. Preparing for the NCLEX-RN exam to become a NCLEX-RN by NCSBN? Here we have brought 800+ Exam Questions for you so that you can prepare well for this Exam of NCLEX-RN. Unlike other online simulation practice tests, you get a ebook version that is easy to read & remember these questions. You can simply rely on these questions for successfully certifying this exam.

Cases of cardiovascular disorders among the older adult population have been increasing constantly. The cardiovascular system weakens through time as aging cells prevail. The nurse caring for a geriatric client needs to have a broad understanding about cardiovascular diseases, their causation, diagnostic procedures, symptoms, and treatment. This text will help you become more qualified and certified to provide care for this wave of baby boomers both by better equipping you to take and pass the gerontological nursing examination or general nursing, and by expanding your knowledge about the cardiovascular system through the rationales provided in the answers for the 202 questions. This book is not limited to future Gerontological Nurses (GN) only, it can be used by Practical Nurses (PN), student nurses, and RN (Registered Nurse) generalist. Sample Questions: 1. During a cardioversion, the gerontological nurse noticed the practical nurse place conductive pads on the chest of an older adult client below the right clavicle to the right of the sternum and in the midaxillary line on the left of the chest. What will be the best course of action for the nurse? (a. assist in properly positioning the pads b. demonstrate how to place the conductive pads c. turn on the ECG (electrocardiogram) recording strip d. connect the client's ECG cable to the converter) 2. An 84 year old client suspected with heart failure is scheduled for BNP (brain natriuretic peptide) test, BUN (blood urea nitrogen) test, thyroid function test, and ECG (electrocardiogram). What will be the best course of action for the nurse? (a. proceed with the tests b. request to cancel thyroid function test because of its irrelevance c. request to cancel thyroid function test and BNP because of their irrelevance d. cancel to request all tests except ECG because of their irrelevance) 3. During the evaluation of an implanted pacemaker device from an older adult client, the nurse noticed that it detects noncardiac electrical events. It was interpreted as cardiac depolarization. Which of the following caused this finding? (a. infected heart tissue b. ungrounded equipment c. uncooperative client d. drug toxicity) 4. A morbidly obese older adult client was prescribed colesevelam (Welchol), atenolol (Tenormin), and metformin (Glucophage). What would be the best course of action for the nurse? (a. notify the doctor to cancel colesevelam due to unsafe drug interaction b. proceed administering the order c. notify the doctor to cancel metformin due to unsafe drug interaction d. question the order for colesevelam and atenolol due to unsafe drug interaction) 5. The nurse is developing care plan to a 66 year old client with hypertensive emergency. Which of the following goal is appropriate for the client? (a. decrease blood pressure by 50 % b. decrease blood pressure by 40 % c. decrease blood pressure by 32 % d. decrease blood pressure by 25 %) 6. Nicardipine (Cardene) was administered intravenously by the nurse to an older adult client with hypertensive crisis. When is the expected onset of this type of medication? (a. 1 to 2 minutes b. 3 to 4 minutes c. 5 to 10 minutes d. 12 to 15 minutes) The answers inside.

One of the indispensable member of the healthcare team is the nurse. Compassion and caring attitude are some of the good qualities of the nurse as well as the other members of the healthcare team. The nurse who specializes in geriatric care and management is called a Gerontological Nurse (GN). Such a nurse have undergone specialized training in the field of geriatric care and management as a nurse practitioner, a specialist or a generalist. A certification examination is then required for the nurse to practice and earn the title of Gerontological Nurse. The Gerontological Nurse certification requires passing a test administered by the American Nurses Credentialing Center (ANCC). Depending on the type of examination, there is a prerequisite, otherwise known as eligibility criteria. For a GN nurse practitioner and CNS (Clinical Nurse Specialist), an active RN license; postgraduate, masters or doctoral degree with advance courses in pathophysiology, health assessment, differential diagnosis, disease management, health promotion, and pharmacology is required. A GN generalist is required to have 2,000 practice hours in geriatric care and an active RN license. The examination contains 175 questions, of which 150 are

scored and 25 are considered pre test. The policies and rules may change from time to time. The requirement stated in this book are true at the time of the author's research. This book contains practice questions with rationale covering the different components of Gerontological Nursing. It is not intended to reflect the exact questions of the board exam. The author's intention is to provide effective review material for the reader. Various levels of difficulty are reflected in this book. There are easy and difficult questions. Best of luck to the reader and have a pleasant review. May you have equanimity and become a Gerontological Nurse (Board Certified).

Revised to meet the latest Board of Nurse Examiners criteria for the NCLEX-RN®, this book uses the well-known Incredibly Easy! approach to make NCLEX® review effective and enjoyable. In a light-hearted manner that reduces anxiety and aids retention, the book thoroughly reviews every area of nursing—adult care, psychiatric care, maternal-neonatal care, care of the child, leadership and management, and law and ethics. This edition includes a new chapter on how to prepare for the NCLEX®, plus 200 alternate-format questions and answers added to the appendix and accompanying CD-ROM. The book also includes an entertaining graphic novel depicting the NCLEX® process from application to license and valuable strategies for successfully passing the exam.

Scope and Standards of Practice

Adult-Gerontology Acute Care Nurse Practitioner Q&A Review

Adult-Gerontology Nurse Practitioner Certification Intensive Review

Ebersole and Hess' Toward Healthy Aging

"I found this book extremely helpful and loved the Fast Facts, Notes, Exam Tips and Clinical Tips. While other exam prep courses had great content, your book helped me to think more like a NP, and "pull it all together." I would highly recommend your book to any Adult-Gero NP student or graduate. It deserves 5 stars." T. Maria Jones, MS, AGPCNP-BC, CWOCN, DAPWCA, FMNLI Praise for the First Edition: This is a well written, comprehensive review aimed at preparing readers for successfully completing a board certification exam...This is a wonderful comprehensive review in a concise study guide format.--Doody's Medical Reviews The second edition of this acclaimed ANP review continues to promote efficient, time-saving study by synthesizing the key content needed to pass the NP Certification Exam into a concise, well-organized format. Using test-taking strategies meticulously developed by the author, the Review provides unique "question dissection techniques," targeted key content review, 600 extensive practice questions, and detailed, current exam information in a fast facts style. This second edition includes an extensive new section on geriatrics that encompasses body/metabolic changes, common disorders, and hospice/ethical considerations. The book also presents an expanded, intensive pharmacology review, 100 new exam questions, and is the only review to offer a new research chapter providing elements of research needed for E-B practice. The book reviews the complete adult lifespan from adolescence on, and covers non-clinical content including ethics, medico-legal issues, advanced practice law, and reimbursement guidelines. The review of primary care disorders is organized by body system. The content is applicable for certification exams for both the ANCC and the AANP. This book is also a great companion to the ANP Certification Review app, coming soon for your iPhone or iPad! New to this edition: Reorganized for greater ease of use Provides extensive new section on geriatrics covering body/metabolic changes, common disorders, and hospice/ethical considerations Contains expanded intensive-style pharmacology review Presents elements of research needed for E-B practice Includes 100 new questions for a total of 600 'high-yield' questions Why use this review? Delineates strategic "question dissection techniques" for test success, developed by the author, a leading provider of exam preparation education for over 20 years Provides precisely targeted content review Offers 600 extensive practice questions and detailed exam information Includes Exam Tips and Clinical Tips help to prioritize The author's company, ARNP Services, Inc. has helped thousands of nurses pass their certification exams nationwide It's the only book to present elements of research needed for E-B practice It's a great companion to the forthcoming ANP Certification Review app!

This is a Pageburst digital textbook; The bestselling LPN/LVN geriatric nursing textbook, Basic Geriatric Nursing, 5th Edition covers age-appropriate nursing interventions in a variety of health care settings. It includes the theories and concepts of aging, covers expected physiologic and psychosocial changes, and highlights delegation, coordinated care, end-of-life care, patient teaching, quality of life, safety, and home care. This edition is updated with the latest issues and trends in geriatric nursing, including changes to the health care system and demographics. Part of the popular LPN Threads series, Gloria Hoffman Wold's text provides a clear and compassionate introduction to geriatric care. Complete coverage of key topics includes baby boomers and the impact of their aging on the health care system, therapeutic communication, cultural considerations, spiritual influences, evidence-based practice in geriatric nursing, and elder abuse, restraints, and ethical and legal issues in end-of-life care. UNIQUE! Delegation, leadership, and management content is integrated throughout. Nursing Process sections provide a framework for the discussion of the nursing care of the elderly patient as related to specific disorders. UNIQUE! A FREE Study Guide in the back of the book reinforces understanding with scenario-based clinical activities and practice questions. UNIQUE! Nursing interventions are numbered and grouped according to health care setting (e.g., acute care, extended care, home care), in a patient-centered approach emphasizing the unique needs of the older adult. UNIQUE! Nursing Care Plans with critical thinking questions help in understanding how a care plan is developed, how to evaluate care of a patient, and how to apply your knowledge to clinical scenarios. UNIQUE! Critical Thinking boxes help you to assimilate and synthesize information. Clinical Situation boxes present patient scenarios with lessons for appropriate nursing care and patient sensitivity. Coordinated Care boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. UNIQUE! Complementary and Alternative Therapies boxes address specific therapies commonly used by the geriatric population for health promotion and pain relief. Cultural Considerations boxes encourage culturally sensitive care of older adults. UNIQUE! Patient Teaching boxes highlight health promotion, disease prevention, and age-specific interventions. UNIQUE! LPN Threads make learning easier, featuring an appropriate reading level, key terms with phonetic pronunciations and text page references, chapter objectives, special features boxes, and full-color art, photographs, and design. Updated discussion of issues and trends includes demographic factors and economic, social, cultural, and family influences. UNIQUE! Safety Alert! boxes highlight 2010-2011 Joint Commission National Patient Safety Goals, with special consideration for polypharmacy and medication safety, communication and involving patients in their own health care, and infection, pneumonia, pressure ulcer, and fall prevention. UNIQUE! Get Ready for the NCLEX® Examination! section at the end of each chapter includes key points along with new Review Questions for the NCLEX examination and critical thinking which may be used for individual, small group, or classroom review. UNIQUE! Streamlined coverage of

nutrition and fluid balance integrates these essential topics.

Ensure you thoroughly understand the intricate details of providing effective care for adults as they age. Ebersole & Hess' *Toward Healthy Aging*, 10th Edition is the only comprehensive gerontological nursing text that effectively communicates how to provide holistic care, promote healthy lives, and address end-of-life issues and concerns. Grounded in the core competencies recommended by the AACN in collaboration with the Hartford Institute for Geriatric Nursing, the tenth edition has been extensively revised and updated with shorter, more streamlined chapters and pedagogical features to facilitate learning. It covers the areas of safety and ethical considerations, genetics, communication with the patient and caregiver, promoting health in persons with conditions commonly occurring in later-life world-wide addressing loss and palliative care and much more. Special sections provide an honest look at the universal experience of aging and the nurse's role in the reduction of health disparities and inequities as a member of the global community. Plus, it contains a variety of new learning features that focus on applying research and thinking critically in when providing care to aging adults across the care continuum. UPDATED COPD guidelines ensure you understand the latest information used by clinicians. UPDATED Theories of Aging chapter discusses the latest covers current findings on this timely issue. UPDATED Information on medication use and misuse instructs you in what to look for when working with prescription medications. UPDATED chapters incorporate the latest information on timely topics such as Palliative Care and Sleep. UPDATED Wound care guidelines reflect nationally recognized standards. UPDATED Information on LGBT family relationships and sexuality in older adults. A Student Speaks and An Elder Speaks sections at the beginning of every chapter provide honest and candid thoughts from students and elders. Learning objectives found at the beginning of every chapter help you to identify the primary take away messages they should learn from the chapter. Promoting Healthy Aging: Implications for Gerontological Nursing sections provide best practice guidelines for management and promotion of wellness for older adults with chronic illness and those at the end of life. Key concepts are bulleted at the end of every chapter to provide a quick review of the most important concepts found in the chapter. Nursing Studies provide practice examples designed to assist you in assessment, planning, interventions, and outcomes to promote healthy aging Critical Thinking Questions and Activities assist you in developing critical thinking skills related to chapter and nursing study content and include suggestions for in-classroom activities to enhance learning. Content consistent with the core competencies for geriatric nursing incorporates the Recommended Baccalaureate Competencies and Curricular Guidelines for the Nursing Care of Older Adults, the Geriatric Nursing Education State of the Science Papers, and the Hartford Institute for Geriatric Nursing Best Practices in Nursing Care to Older Adults. The latest information on biological theories of aging and evolving genomic research covers current findings on these timely issues. Research Highlights Boxes highlight important research studies in the field of gerontology Research Questions found at the end of chapters gives you a chance to do further research outside of your book study to give you a better grasp of the field as a whole. Safety Alert Boxes emphasize important safety tips to consider while working in a clinical setting. Resources for Best Practice boxes contain suggestions for further information on various chapter topics and tools for practice. Tips for Best Practice boxes feature summarized lists of evidence-based nursing interventions for practice. Healthy People boxes reference the goals cited in Healthy People 2020. NEW! Additional coverage of frailty in older adults helps you to understand the precautions you need to take when working with this population. NEW! Increased information on Health Literacy assists you in learning the right terms to promote healthy aging. NEW! Added information on herbs/supplements includes essential oils and green tea.

100+ Narratives for Learning

NCLEX-RN NATIONAL COUNCIL LICENSURE EXAMINATION EXAM PRACTICE QUESTIONS & DUMPS

800+ EXAM PRACTICE QUESTIONS FOR NCLEX-RN UPDATED 2020

As the fastest growing population sector worldwide, older adults are seen in almost every care setting in which clinicians practice. Developed as a resource for advanced practice nurses in any setting, *Case Studies in Gerontological Nursing for the Advanced Practice Nurse* presents readers with a range of both typical and atypical cases from real clinical

scenarios. The book is organized into six units covering cases related to aging, common health challenges, health promotion, environments of care, cognitive and psychological issues, and issues relating to aging and independence. Each case follows a similar format including the patient's presentation, critical thinking questions, and a thorough discussion of the case resolution through which students and clinicians can enhance their clinical reasoning skills. Designed to promote geriatric clinical education through self-assessment or classroom use, *Case Studies in Gerontological Nursing for the Advanced Practice Nurse* is a key resource for all those dedicated to improving care for older adults.

Provide compassionate, professional nursing care for older adults! Designed for LPN/LVNs, *Basic Geriatric Nursing, 8th Edition* offers a practical introduction to concepts of aging and the physiologic and psychosocial changes that affect the elderly adult. Clear guidelines help you master basic skills such as health assessment, nursing diagnosis, therapeutic communication, medication administration, and nursing interventions in a variety of health care settings. New Next-Generation NCLEX(R) examination-style case studies help you develop clinical judgment, and nursing care plans show how to apply theory to practice. Written by experienced nursing educator Patricia Williams, this book provides the knowledge and skills you need to care for an aging population. Learning features in each chapter include objectives, key terms with phonetic pronunciations, basic concepts, and clinical application, all connected by case examples and a relevant research study or analysis of multiple studies. Nursing Process sections provide a framework for nursing care of older adults as related to specific disorders. Get Ready for the NCLEX(R) Examination! sections include key points, additional learning resources, and NCLEX review questions with answers and rationales on the Evolve website. Nursing Care Plans provide real-world examples of care plans along with critical thinking questions. Nursing interventions are grouped by health care setting, e.g., acute care, extended care, home care. Clinical Situation boxes highlight real-life care scenarios. Coordinated Care boxes address leadership and management issues for the LPN/LVN, and include topics such as restraints and end-of-life care. Critical Thinking boxes help you develop and improve skills in clinical judgment. Special boxes are included for health promotion, safety, nurse alerts, patient education, cultural considerations, home health considerations, complementary health approaches, and more. Medication tables summarize information about drugs commonly used in geriatric nursing. NEW! Next-Generation NCLEX(R) examination-style case studies at the end of chapters include new-format questions to help you prepare for the licensure examination. NEW! Discussion of the NCSBN Clinical Judgment Measurement Model helps you learn decision making and develop the skills needed to plan effective nursing care. NEW! Free Study Guide on the Evolve website includes Next-Generation case studies and review questions to reinforce your understanding.

Gain the nursing skills you need to provide wellness-based care for older adults! Ebersole and Hess' *Gerontological Nursing & Healthy Aging, 6th Edition* uses a holistic approach to describe compassionate care along a continuum of wellness. Designed to promote healthy aging regardless of the patient's situation or disorder, this text provides best-practice guidelines in covering physical, psychosocial, spiritual, and cognitive health. New to this edition are Next Generation NCLEX®-style case studies, updates on measuring clinical judgment, expanded coverage of core competencies, and more. Written by gerontological nursing experts Theris Touhy and Kathleen Jett, this concise text provides a solid foundation in every aspect of healthy aging. Focus on health and wellness provides the evidence-based information and strategies needed to promote healthy aging. Key concepts, learning activities, and discussion questions in every chapter emphasize the information needed to enhance care. Recommended competencies from the AACN and the Hartford Institute for Geriatric Nursing are integrated throughout. Discussion of disease processes is placed in the context of healthy adaptation, nursing support, and responsibilities. Easy-to-use information on nursing techniques and communication appears with the associated disorders, symptoms, and situations. Tips for Best Practice and Resources for Best Practice boxes provide insight into proven methods of nursing care. Discussions of nursing and interprofessional actions help students learn to enhance wellness, maintain optimal function, and prevent unnecessary disability. Coverage of age, cultural, racial, and gender differences highlights these important considerations in caring for older adults. NEW! Updates reflect the NCSBN Clinical Judgment Model. NEW! Next Generation NCLEX® (NGN)-style case studies provide optimal preparation for the Next Generation NCLEX Examination. NEW! Specialized information addresses the unique needs of older adults such as atypical disease presentation, geriatric syndromes, neurocognitive disorders, quality of life with chronic illness, legal and ethical issues, and mental health challenges such as depression and substance abuse. NEW! Coverage of competencies of expanding nursing roles in the care of older adults addresses the continuum of care. NEW! Gerontological expertise is incorporated into nursing actions and complements other nursing texts (including med-surg, community health, mental health, and assessment books) used in programs without a freestanding gerontological nursing course. NEW! Expanded content includes information on COPD guidelines, medication use and misuse, Alzheimer's Disease, wound care guidelines, diagnosis and treatment of sleep-disordered breathing, joint replacement, caregiver strain, hospice and transitional care, and more.
