The Child in You is like your own personal therapist that you can carry around with you." --Lori Gottlieb, New York Times bestselling author of *Maybe You Should Talk to Someone* Nominated for Malcolm Gladwell, Susan Cain, Adam Grant, and Daniel H. Pink's Next Big Idea Club We all want to be loved and to feel safe to express who we really are. But over time we grow estranged from what brings us our purest happiness--because everyday traumas, unyielding societal expectations, and the judgment of our parents and peers submerge our true self beneath layers of behaviors rooted in fear and shame and mistrust. In *The Child in You*, psychologist Stefanie Stahl guides you, step-by-step, through her therapeutic method that has helped millions to peel away these layers and reconnect with their inner child--both the shadow child, representing our deepest insecurities and the part of our self-esteem that is injured and unstable, and the sun child, representing our greatest joys and the part of our self-esteem that remains positive and intact. The many examples and exercises in this book will help you discover your shadow child and sun child, identify which of the shadow child's dozen self-protection strategies are at work in you, and put into practice the array of proven self-reflection strategies to overcome negative influences and beliefs. This book is a mothers' book—not that it can't be read by fathers as well—the outgrowth of a mothers' study group which met in Kuwait before the Gulf War, focused on rearing children in an Islamic way. The mothers were mostly American and British converts to Islam, although in cosmopolitan Kuwait there were women from many other backgrounds. The group was an offshoot of meetings for English-speaking Muslim women, held weekly in the home of Sister Zainab Ashry in Kuwait for more than ten years prior to the Gulf War. From their knowledge of Islam, the women involved wanted to study the implications of their faith on their child-rearing practices. The first step was to collect information—any Qur'anic verse or hadith—that a participant found relevant. Other information was collected from such knowledgeable people and books as were available. Monthly discussions were organized on different topics. Since the war, some of the participating sisters have returned to Kuwait, but many of our group are now scattered all over the world. All the notes and papers collected by the study group were in my home in Kuwait when the invasion occurred; fortunately my husband was able to salvage them and bring them here to our new home in the States. I felt an obligation to

compile this collected information to share with other Muslims, especially converts like myself. My deepest thanks must go to my husband, whose support and cooperation gave me the means to carry out this task. This book begins with the birth of a child to Muslim parents, and the traditional Islamic response to the birth, following the example of Prophet Muhammad (S). Very few specific actions are defined, and these mostly relate to practices at the time of birth. All of these fall into the category of sunnah (following the Prophet's example or what he approved of in others), and though highly recommended, they are not fard (obligatory) actions. Aside from these few simple practices carried out when a baby comes into the world, Islam has no ceremonies devoted exclusively to children—no first communion, no coming-of-age celebrations. Children are not segregated into a special world separate from that of adults; they are members of families in the great, embracing cycle of human life. The family supports them when they are young; they support the family in their productive years, and in old age they are again supported by the family. They grow and develop gradually in a system that encourages growth and learning, but places little emphasis on milestones and anniversaries. A large portion of this book is given to defining relationships from the Qur'an and hadith. To understand the significance of the child in Muslim society,

it is necessary to recognize the total number and value of his or her relationships within it, which are different from the relationships defined by other societies. Chapter 1 includes some of the traditions of the Prophet Muhammad that apply to the newborn. Chapter 2 describes the nature of the child's relationship with Allah and the spiritual world, with some suggestions for encouraging spiritual awareness. Chapter 3 contains Qur'anic verses and ahadith relevant to the child's relationship with his or her parents. In light of these definitions, and with reference to the Islamic teachings concerning morals, manners, and the purpose of life, an attempt is made in chapters 4, 5, and 6 to present an organized structure dealing with the practical how-to of rearing a child in an Islamic way, from a parent's viewpoint. Chapters Introduction ix 7 and 8 progressively broaden out the child's world by adding brothers and sisters, extended family, and community relationships. The practical suggestions for improving relationships among adult family members, in order to pave the way for improving the child's relations with his or her extended family, are an important aspect of chapter 8. The only relationship which really changes for the child as he or she grows up is that of accountability to Allah, since no child is accountable for his or her actions before reaching the age of understanding. All other relationships develop and deepen as the child

grows but remain basically the same, for the general commands to honor parents, show respect to elders, be gentle with younger ones, and honor family ties continue for a Muslim throughout his or her life. I pray to Allah that this book may bring only good to mothers and their children, and that He protect them from any mistakes or misunderstandings. I have done my best to prepare the material contained within it in a suitable manner and hope to see other literature published on this important subject, expanding and enriching it. While I alone am responsible for the contents, I am deeply indebted to the many sisters who helped collect references and discussed the practical implications of our findings. I have no list to prompt me and consequently may have unwittingly forgotten some names, but I will remember Terry, Lianna, Salma, Noura, Mia, Khadijah, Sandra, Hicleir, Debbie, Sara, Maryam, Aneesah, Dianne, Karen, Kauthar and Nawal from Kuwait, all of us working together on this project. My friend Daaiyah Saleem in Ohio has also been very helpful, offering many suggestions for improvement and clarification as she aided in proofreading. My sister-in-law Ghada, of course, has helped along the way. In the course of preparing this book for publication, sister Zeba Siddiqui was chosen by the publisher to edit the text. I have known Zeba, a mother of four and a grandmother, and author of several excellent

childrens' books as well as the THE CHILD IN ISLAM Parent's Manual: A Guide for Muslim Parents Living in North America, for several years. When I heard she had taken on this task, I asked her to add anything she felt was missing, from her years of experience and knowledge of the subject. She has supplied all of the hadith reference numbers in the text, in itself an enormous task. In addition to editing, she has filled out and amplified several topics, checking and adding material where needed. The sections on the Hereafter, tahara, respect for religion, and hospitality are prepared and written by her. It was only fair therefore that her name should appear on the title page of this book in recognition of her valuable contribution. I am deeply grateful to her for her help and input. I also need to thank my children, who suffered through my learning experience and projects for self-improvement in parenting skills, and my mother, whose life-long interest in the growth and development of children helped me understand the importance of the matter and the need for a book such as this. A final note, to the book's non-Muslim readers: I have chosen to use the word Allah throughout the book instead of the word God. The words are interchangeable in English for Muslims, but all of the women involved in this project have the habit, indeed, they have the love of referring to God, the God of Abraham, Moses, Jesus, and Muhammad, by His Arabic name, Allah.

Battered child syndrome is a tragic and disturbing phenomenon. Unfortunately, it is a crime that is often successfully hidden by its perpetrators. Law enforcement has an important role to play in uncovering cases of battered child syndrome and gathering evidence for their successful prosecution. This guide contains practical information on the circumstances that point to the willful rather than the accidental injury or death of an infant or child and the specific evidence required to prove it. It places special emphasis on obtaining an expert medical examination, immediately documenting the injuries through photographs, and collecting and preserving physical evidence. The guide also shows investigators how their interviews with caretakers, family members, neighbors, school personnel, and others can shed light on the treatment the child has received over time and produce witnesses who can corroborate or refute suspected abuse. Many jurisdictions are beginning to develop training programs to help police investigate this crime more effectively. This guide is an important contribution to this end and will aid child protection personnel and others in a position to identify, investigate, and prosecute cases of battered child syndrome. Here is a simple, easy-to-read, delightfully illustrated book for young children! It also explains, in simple terms, realities about creation and the subtle higher energy vibrational levels, which exist in close proximity all around us. The exercises and experiments will delight and amaze, as well as nurture your child's creativity, introducing, in a fascinating way, the truths that are fundamental to our understanding of our existence here on Planet Earth. Your child will learn that life is meant to be fun and to be enjoyed. But there are rules, as in any game! *The Amazing Book of No was just announced as a Winner of the 2015 Readers Favorite Award for K-3rd grade readers. "The Amazing Book of No" is a deceptively simple story that will teach your 3-7 year old how to accept the word "no" when you say it, and why they shouldn't argue. The story is about two moms and their children. One mom says "no" all the time, while the other says "yes" to everything. It is cute and engaging all in one, and designed not to take up too much of a parents valuable time, with the idea being to try and imprint wholesome ideals while kids are young. Reading this just a few times to your boy or girl at bedtime will ensure you don't have any misunderstandings with your children about the word "NO" as they grow older. This really is: The Amazing*

### *Book of No!*

*What makes this story extraordinary is the author tells it from the perspective of being in the experience as a child. In this book, it is easy to see how childhood experiences often hold adult answers. The reader of this story innocently ends up assessing his or her own upbringing. The story speaks to anyone who has ever had parents. In this story, we realize that sometimes we just have to return to childhood in order to say good-bye. While this book makes us laugh & cry, its true power comes through family redemption! This is a rare work because it is told entirely in the voice of a child who is untiringly trying to earn his parents love while also trying to grow up. It is a luminous demonstration of family emotions. When childhood is a struggle for survival there is scant energy left for growing up. This book movingly reveals the consequences of that type childhood and offers deliverance. The genesis of the story is the author could not remember his childhood; it was suggested he start writing from his earliest recollection as a way of nurturing childhood memories. When he did, the voice of the child he once was, was passionate & direct. The author grew up in a home of alcoholism, violence, and dysfunction; yet, had no idea this experience created its own evolving trauma.*

*Karp, M.D. In this pioneering, practical book, Daniel J. Siegel, neuropsychiatrist and author of the bestselling Mindsight, and parenting expert Tina Payne Bryson offer a revolutionary approach to child rearing with twelve key strategies that foster healthy brain development, leading to calmer, happier children. The authors explain—and make accessible—the new science of how a child’s brain is wired and how it matures. The “upstairs brain,” which makes decisions and balances emotions, is under construction until the mid-twenties. And especially in young children, the right brain and its emotions tend to rule over the logic of the left brain. No wonder kids throw tantrums, fight, or sulk in silence. By applying these discoveries to everyday parenting, you can turn any outburst, argument, or fear into a chance to integrate your child’s brain and foster vital growth. Complete with age-appropriate strategies for dealing with day-to-day struggles and illustrations that will help you explain these concepts to your child, The Whole-Brain Child shows you how to cultivate healthy emotional and intellectual development so that your children can lead balanced, meaningful, and connected lives. “[A] useful child-rearing resource for the entire family . . . Many complained they had no control over their lives. Some stumbled in high school or hit college and unraveled. Bill is a clinical neuropsychologist who helps kids gripped by anxiety or struggling to learn. Ned is a motivational coach who runs an elite tutoring service. Together they discovered that the best antidote to stress is to give kids more of a sense of control over their lives. But this doesn't mean giving up your authority as a parent. In this groundbreaking book they reveal how you can actively help your child to sculpt a brain that is resilient, and ready to take on new challenges. Histories of the Transgender Child shatters this myth, uncovering a previously unknown twentieth-century history when transgender children not only existed but preexisted the term transgender and its predecessors, playing a central role in the medicalization of trans people, and all sex and gender. Beginning with the early 1900s when children with "ambiguous" sex first sought medical attention, to the 1930s when transgender people began to seek out doctors involved in altering children's sex, to the invention of the category gender, and finally the 1960s and '70s when, as the field institutionalized, transgender children began to take hormones, change their names, and even access gender*

*In The Only Mind Worth Having, Fiona Gardner takes Thomas Merton's belief that the child mind is "the only mind worth having" and explores it in the context of Jesus' challenging, paradoxical, and enigmatic command to become like small children. To follow Christ's command requires a great leap of the imagination. Gardner examines what it might mean to make this leap when one is an adult without it becoming sentimental and mawkish, or regressive and pathological.*

*Using both psychological and spiritual insights, and drawing on the experiences of Thomas Merton and others, Gardner suggests that in some mysterious and paradoxical way recovering a sense of childhood spirituality is the path toward spiritual maturity. "Amy's Best Friend, Prayers of a Child" comprises a personal introduction from Amy followed by 14 illustrated prayers, and finally special pages to record a child's own prayers. The book is non-denominational. "Amy's Best Friend" is accompanied by two fun books to support your child's practice of prayer. Second, after all the pages at the end of "Amy's Best Friend, Prayers Of A Child" have been filled with your child's own prayers, a prayer journal is available under the name "Amy's Best Friend, Prayers of A Child: My Prayers."
