What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." —Jonathan Yardley, The Washington Post Book World

The field of communication was founded, in part, because of a need to make people better communicators. That meant teaching them how to communicate more effectively, whether it be in public settings or in private. Most of that teaching has happened within the classroom and many professionals have spent their lives instructing others on various aspects of communication. Inside this second edition, the editors have assembled a fully comprehensive and contemporary discussion of topics and issues concerning the teaching of communication. The chapters contained herein—contributed by key voices throughout the communication discipline—address conceptual as well as practical issues related to communication instruction. The contents of this new edition reflect the dramatic changes that have occurred in communication education since the publication of the first edition in 1990. This book focuses initially on the goals of communication education, then delves into the preparation of specific communication courses. It includes assistance for instructors in organizing instructional content and discusses the use of instructional strategies and tools, as well as offering ideas on evaluating the processes and products of instruction. The volume also covers unique teaching assignments that may be encountered, from the basic course to continuing education, and addresses 2-year college teaching, directing forensic programs, distance education, and consulting. It concludes with important professional issues faced by both new and experienced communication instructors, including ethics and political issues within classrooms and departments. This volume is a necessity for anyone starting out a career as a communication instructor. Veteran educators—who know that learning to teach is a continual growth experience—will find useful and invaluable information within the book's pages. Whatever background and level of experience, all communication educators will find this new edition to be an essential resource for their work.

Get a queer perspective on communication theory! Queer Theory and Communication: From Disciplining Queers to Queering the Discipline(s) is a conversation starter, sparking smart talk about sexuality in the communication discipline and beyond. Edited by members of "The San Francisco Radical Trio," the book integrates current queer theory, research, and interventions to create a critical lens with which to view the damaging effects of heteronormativity on personal, social, and cultural levels, and to see the possibilities for change through social and cultural transformation. Queer Theory and Communication represents a commitment to positive social change by imagining different social realities and sharing ideas, passions, and lived experiences. As the communication discipline begins to recognize queer theory as a vital and viable intellectual movement equal to that of Gay and Lesbian studies, the opportunity is here to take current queer scholarship beyond conference papers and presentations. Queer Theory and Communication has five objectives: 1) to integrate and disseminate current queer scholarship to a larger audience-academic and nonacademic; 2) to examine the potential implications of queer theory in human communication theory and research in a variety of contexts; 3) to stimulate dialogue among queer scholars; 4) to set a preliminary research agenda; and 5) to explore the implications of the scholarship in cultural politics and personal empowerment and transformation. Queer Theory and Communication boasts an esteemed panel of academics, artists, activists, editors, and essayists. Contributors include: John Nguyet Erni, editor of Asian Media Studies and Research & Analysis Program Board member for GLAAD Joshua Gamson, author of Freaks Talk Back: Tabloid Talk Shows and Sexual Nonconformity Sally Miller Gearhart, author, activist, and actress Judith Halberstam, author of Female Masculinity David M. A Book of Readings in Communication. For Elwood Murray on the Occasion of His Retirement

Cartoons by hundreds of artists-at-arms from more than a dozen countries and spanning two centuries are included in this study—the first to consider such a broad range of military comics. War and military life are examined through the inside jokes of the men and women who served. The author analyzes themes of culture, hierarchy, enemies and allies, geography, sexuality, combat, and civilian relations and describes how comics function within a community. A number of artists included were known for their work with Disney, Marvel Comics, the New Yorker and Madison Avenue but many lesser known artists are recognized.
