The future of politics after the pandemic COVID-19 exposed the pre-existing conditions of the current global crisis. Many Western states failed to protect their populations, while others were able to suppress the virus only with sweeping social restrictions. In contrast, many Asian countries were able to make much more precise interventions. Everywhere, lockdown transformed everyday life, introducing an epidemiological view of society based on sensing, modeling, and filtering. What lessons are to be learned? The Revenge of the Real envisions a new positive biopolitics that recognizes that governance is literally a matter of life and death. We are grappling with multiple interconnected dilemmas—climate change, pandemics, the tensions between the individual and society—all of which have to be addressed on a planetary scale. Even when separated, we are still enmeshed. Can the world govern itself differently? What models and philosophies are needed? Branton argues that instead of thinking of biotechnologies as something imposed on society, we must see them as essential to a politics of infrastructure, knowledge, and direct intervention. In this way, we can build a society based on a new rationality of inclusion, care, and prevention.

The world's foremost expert on the English language takes us on an entertaining and eye-opening tour of the history of our vernacular through the ages. In The Story of English in 100 Words, an entertaining history of the world's most ubiquitous language, David Crystal draws on one hundred words that best illustrate the huge variety of sources, influences and events that have helped to shape our vernacular since the first definitively English word—"roe"—was written down on the femur of a roe deer in the fifth century. Featuring ancient words ('loaf'), cutting edge terms that reflect our world ('twittersphere'), indispensable words that shape our tongue ('and', 'what'), fanciful words ('fopdoodle') and even obscene expressions (the "c word"...), David Crystal takes readers on a tour of the winding byways of our language via the rude, the obscure and the downright surprising.

One of our country's most acclaimed and beloved entertainers, Steve Martin has written a novella that is unexpectedly perceptive about relationships and life. Martin is profoundly wise when it comes to the inner workings of the human heart. Mirabelle is the "shoppirl" of the title, a young woman, beautiful in a wallflowerish kind of way, who works behind the glove counter at Neiman Marcus "selling things that nobody buys anymore . . ." Slightly lost, slightly off-kilter, very shy, Mirabelle charms because of all that she is not: not glamorous, not aggressive, not self-aggrandizing. Still there is something about her that is irresistible. Mirabelle captures the attention of Ray Porter, a wealthy businessman almost twice her age. As they tentatively embark on a relationship, they both struggle to decipher the language of love—with consequences that are both comic and heartbreaking. Filled with the kind of witty, discerning observations that have brought Steve Martin critical success, Shoppirl is a work of disarming tenderness.
