The first half of the book is written for a general audience to introduce the primary economic and market characteristics of the industry and to describe

the inputs and outputs of refining. Most of this material is new to this edition and can be read independently or in parallel with the rest of the text. In the second half of

Acces PDF Global Construction Costs Yearbook

the book, a technical review of the main process units of a refinery is provided, beginning with distillation and covering each of the primary conversion and treatment
