This introductory textbook provides a thorough guide to the management of food and beverage outlets, from their day-to-day running through to the wider concerns of the hospitality industry. It explores the broad range of subject areas that encompass the food and beverage market and its five main sectors - fast food and popular catering, hotels and quality restaurants and functional, industrial, and welfare catering. New to this edition are case studies covering the latest industry developments, and coverage of contemporary environmental concerns, such as sourcing, sustainability and responsible farming. It is illustrated in full colour and contains end-of-chapter summaries and revision questions to test your knowledge as you progress. Written by authors with many years of industry practice and teaching experience, this book is the ideal guide to the subject for hospitality students and industry practitioners alike.

Global Marketing Management prepares students to become effective managers overseeing global marketing activities in an increasingly competitive environment. The text's guiding principle, as laid out clearly and methodically by authors Kotabe and Helsen, is that the realities of international marketing are more multilateral. The 5th Edition further addresses some peculiar phenomenon being observed in global marketing today. Whether they choose to pursue marketing careers, all students learn how marketing managers can affect other business functions for effective corporate performance on a global basis and how to work effectively with others for the same corporate goal. Global Marketing Management brings timely coverage in various economic and financial as well as marketing issues that arise from the acutely recessionary market environment.

Hospitality Marketing Management, 6th Edition explores marketing and themes unique to hospitality and tourism. The 6th edition presents many new ideas along with established marketing principles, exploring not only the foundations of marketing in the hospitality world but also new trends in the industry.

WHAT MAKES THIS BOOK UNIQUE? However all textbooks are region-specific despite this growing move towards global business relationships - except this one. For years academicians and marketing directors have debated the marketing standardisation versus adaptation of international marketing strategy. Despite the great importance of the topic, the debate remains unresolved. At the same time, the continuing globalisation of markets and the growing importance of the emerging BRIC markets make an optimal management of international marketing efforts a necessity. Therefore, this study offers - on the basis of a solid theoretical framework and sound methodological operationalization - empirical findings on how to successfully manage both, the international marketing mix and the related marketing process in world markets. In particular, the marketing strategy pursued by multinational corporations are analysed and compared as well as empirical findings relating to financial and non-financial performance measures are provided.

This resource offers a comprehensive framework for strategic planning and outlines a structured approach to identifying, understanding, and solving marketing problems. For business students, this book is an essential tool for understanding the logic and the key aspects of the marketing process. Global Marketing, Global Edition

The 7th Edition of Global Marketing Management prepares students to become effective managers overseeing global marketing activities in an increasingly competitive environment. The text's guiding principle, as laid out concisely and methodically by authors Kotabe and Helsen, is that the realities of international marketing are more "multilateral." Suitable for all business majors, the text encourages students to learn how marketing managers work across business functions for effective corporate performance on a global basis and how to work effectively with others for the same corporate goal. Global Marketing Management brings timely coverage in various economic and financial as well as marketing issues that arise from the acutely recessionary market environment.

This third edition of Strategic Marketing Management confirms it as the classic textbook on the subject. Its step- by- step approach provides comprehensive coverage of the five key strategic stages: * Where are we now? - Strategic and marketing analysis * Where do we want to be? - Strategic direction and strategy formulation * How might we get there? - Strategic choice * Which way is best? - Strategic evaluation * How can we ensure arrival? - Strategic implementation and control This new revised and updated edition and "The Strategic Management of the Expanded Marketing Mix," and extensive new material covering: * The changing role of marketing * Approaches to analysing marketing capability * E-marketing * Branding * Customer relationship management * Relationship management myopia * The decline of loyalty The book retains the key features that make it essential reading for all those studying the management of marketing - a strong emphasis on implementation, up to date mini cases, and questions and summaries in each chapter. This new edition offers a comprehensive framework for strategic planning and outlines a structured approach to identifying, understanding, and solving marketing problems. For business students, the theory advanced in this book is an essential tool for understanding the logic and the key aspects of the marketing process. For managers and consultants, this book presents a conceptual framework that will help develop an overarching strategy for day-to-day decisions involving product and service design, branding, pricing, promotions, and distribution. For senior executives, the book provides a big-picture approach for developing new marketing campaigns and evaluating the success of ongoing marketing programs.

This book analyzes the current Islamic marketing environment. Since the Muslim world is extremely diverse in terms of economic development, customs and traditions and political and legal systems, it is vital for companies and marketers to analyze the environment before attempting to address these markets. The author emphasizes that it is ineffectual to elaborate the distribution and promotion strategies if the market does not exist in terms of purchasing power or demographics, if potential consumers do not believe that products and services answer their needs and demands or if there are political and legal barriers to companies wanting to enter these markets. The book offers detailed insights into the economic, socio-cultural, and politico-legal environment in the Muslim world, which are essential for marketers to understand and form the foundations of effective marketing strategies.

"Using the most current concepts, up-to-date data, and a wide range of examples, this authoritative text illustrates how excellent management strategies lead to unsurpassed marketing success."--Page 4 of cover.

It has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events. It is not that the facts of history have changed. No one will dispute that the battle of Waterloo occurred on June 11, 1815 or that the allied invasion of Europe began on June 6, 1944. What each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the historical, social, intellectual, and cultural milieu of their own generation. By examining the facts of history from a new perspective, today's historians hope to reveal some new truth that will not only illuminate the course of history but also validate contemporary values and societal ideals. Although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns, inventory replenishment, and income statements, the goal of the management scientist, like the historian, is to merge the facts and figures of the discipline with today's organizational, cultural, and economic realities. Hopefully, the result will be a new synthesis, where a whole new perspective will break forth, exposing new directions and opportunities.
