Offering innovative approaches to thinking about orchestras, Global Perspectives on Orchestras: Collective Creativity and Social Agency adopts ethnographic, historical and comparative perspectives on a variety of traditions, including symphony, Caribbean steel, Indonesian gamelan, Indian film and Vietnamese court examples. The volume presents compelling analyses of orchestras in their socio-historical, economic, intercultural and postcolonial contexts, while emphasizing the global and historical connections between musical traditions. By drawing on new ethnographic and historical data, the essays describe orchestral creative processes and the politics shaping performance practices. Each essay considers how musicians work together in ensembles, focusing on issues such as training, rehearsal, creative choices, compositional processes, and organizational infrastructures. Testimonies of orchestral musicians highlight practitioners' views into the diverse world of orchestras. As a whole, the volume discusses the creative roles of performers, arrangers, composers and arts agencies, as well as the social environments supporting musical collaborations. With contributions from an international team of researchers, Global Perspectives on Orchestras offers critical insights gained from the study of orchestras, collective creativity and social agency, and the connections between orchestral performances, colonial histories, postcolonial practices, ethnographic writings and comparative theorizations.

Although many countries have created effective strategies to recruit more international students due to proven economic and social benefits, recruiting international students as a field of research lacks coherence. Filling this gap, this book provides a holistic and comprehensive overview of this emerging research area. Gender Equality in a Global Perspective looks to discuss whether Gender Equality can be adopted as it has been defined in international documents anywhere, or whether it needs to be adapted in a more local context; discuss which factors and perspectives need to be taken into account when adapting Gender Equality to specific contexts; suggest research approaches for studies on whether a universal (Western) concept of Gender Equality fits in certain specific contexts; and finally suggests challenges to the existing interpretation of Gender Equality (e.g., theory of intersectionality); and the development of legal and policy framework. This book is situated within the tradition of comparative gender studies. While most other such books take up and compare various ways of implementing (or not implementing) gender equality, this book studies and compares whether or not (and to what extent) a specific definition of Gender Equality (GE) could be adopted by various nations. Thus, all chapter contributors will engage with the same definition of GE, which will be presented within the book, and discuss the possibilities and constraints related to applying such a definition in their particular national context. The readers will learn about the problems of applying a universal concept of Gender Equality and the possible reasons for and modes of adapting Gender Equality to different contexts. Gender Equality in a Global Perspective looks to maintain a critical and reflexive stance towards the issues raised and will seek to present multiple perspectives and open-ended answers. As such it hopes to contribute to the international discussion of human rights more broadly and Gender Equality specifically. The intended audience is not limited only to but will include policy makers, scholars and students with an interest in Gender issues, Organizational Theory, Political Science, Human Development, Policy Analysis, Globalization and other management sub-disciplines.

Teachers today must prepare students for an increasingly complex, interconnected, and interdependent world. Being a globally competent teacher requires embracing a mindset that translates personal global competence into professional classroom practice. It is a vision of equitable teaching and learning that enables students to thrive in an ever-changing world. This thought-provoking book introduces a proven self-reflection tool to help educators of all grade levels and content areas develop 12 elements of such teaching. The book is divided into three sections: dispositions, knowledge, and skills. Each chapter is devoted to an element of globally competent teaching and includes a description of that element, tips for implementation delineated by developmental levels, and links to additional resources for continuing the journey. Examples of globally competent teaching practices include - Empathy and valuing multiple perspectives. - A commitment to promoting equity worldwide. - An understanding of global conditions and current events. - The ability to engage in intercultural communication. - A classroom environment that values diversity and global engagement. Throughout, you'll also find examples of these practices at work from real teachers in real schools. No matter what your experience with global teaching, the information in this book will help you further develop your practice as a global educator—a teacher who prepares students not only for academic success but also for a life in which they are active participants in their own communities and the wider world.

The existence and urgency of global climate change is a matter of scientific consensus. Yet the global politics of climate change have been anything but consensual. In this context, a wave of global climate activism has emerged in the last decade in response to the perceived failure of the political negotiations. This book provides a unique comparative study of environmental movements in USA, Japan, Denmark and Sweden, analyzing their interaction with the international climate institutions of the United Nations, with national governments, and with currents in the global climate movement. It documents how and why the movement evolved between the Copenhagen Summit of 2009 and the Paris Summit of 2015, altering its strategies and tactics while attracting new actors to the issue area. Further, it demonstrates how the development of global environmental networks has increased contact between environmental movements in the Global North and those from the Global South, resulting in the establishment of 'climate justice' as a political cause and unifying frame for global climate activism.

Human Rights and Social Justice in a Global Perspective: An Introduction to international social work provides an updated introduction to a variety of social issues in the Global South, including AIDS, human trafficking, as well as refugees and asylum seekers. The Universal Declaration of Human Rights, as well as other UN human rights documents, is used as a framework to examine examples of social injustice and human rights violations. The issues are examined in their cultural contexts to help the reader understand how they developed and why they persist. Each chapter for a particular issue ends in a "Culture Box" which offers an in-depth look at the issue in a particular country, enabling the reader to gain a deeper understanding of how culture impacts the development of social issues. Interventions based on the human rights-based approach are integrated throughout the book. Suggestions for affecting change, both in one's personal as well as professional life are listed for each chapter and an Appendix offers a variety of resources for engaging in international social work.*

The book provides a global perspective of local government response towards the COVID-19 pandemic through the analysis of a sample of countries in all continents. It examines the responses of local government developed in articulation with other tiers of government and with civil society organizations, and explores the social, economic and policy impacts of the pandemic. The book offers an innovative contribution on the role of local government during the pandemic and discusses lessons for the future. The COVID-19 pandemic had a global impact on public health, in the well-being of citizens, in the economy, on civic life, in the provision of public services, and in the governance of cities and other human settlements, although in an uneven form across countries, cities and local communities. Cities and local governments have been acting decisively to apply the policy measures defined at national level to the specific local conditions. COVID-19 has exposed the inadequacy of the crisis response infrastructures and policies at both national and local levels in these countries as well as in many others across the world. But it also exposed much broader and deeper weaknesses that result from how societies are organized, namely the insecure life a substantial proportion of citizens have, as a result of economic and social policies followed in previous decades, which accentuated the impacts of the lockdown measures on employment, income, housing, among a myriad of other social dimensions. Besides the analysis of how governments, and local government, responded to the public health issues raised by the spread of the virus, the book deals also with the diversity of responses local governments have adopted and implemented in the countries, regions, cities and metropolitan areas. The analysis of these policy responses indicates that previously unthinkable policies can surprisingly be implemented at both national and local levels.

Dorothy N. Gamble and Marie Weill differentiate among a range of intervention methods to provide a comprehensive and effective guide to working with communities. Presenting eight distinct models grounded in current practice and targeted toward specific goals, Gamble and Weill take an unusually inclusive step, combining their own extensive experience with numerous case and practice examples from talented practitioners in international and domestic settings. The authors open with a discussion of the theories for community work and the values of social justice and human rights, concerns that have guided the work of activists from Jane Addams and Martin Luther King Jr. to Cesar Chavez, Wangari Maathai, and Vandana Shiva. They survey the concepts, knowledge, and perspectives influencing community practice and evaluation strategies. Descriptions of eight practice models follow, incorporating real-life case examples from many parts of the world and demonstrating multiple applications for each model as well as the primary roles, competencies, and skills used by the practitioner. Complexities and variations encourage readers to determine, through comparative analysis, which model at which time best fits the goals of a community group or organization, given the context, culture, social, economic, and environmental issues and opportunities for change. An accompanying workbook stressing empowerment strategies and skills development is also available from Columbia University Press.

This book explores issues of creation, distribution, and control of images through official and unofficial sources, asking what impact that has had on human rights and what the ethical implications are. The volume includes research from healthcare advocates, human rights scholars and activists, photographers, and visual anthropologists who see a need for more careful contextual interpretation of images in global and local settings. It represents diverse forms of scholarship and the ever-changing field of research methodologies, and it examines how human rights issues take advantage of visual methodologies and how the visual works to communicate these issues with the public. As such, this collection will be useful for researchers studying in the fields of visual culture and human rights.

This volume gathers contributions from a range of global experts in teacher education to address the topic of language teacher education. It shows how teacher education involves the agency of teachers, which forms part of their identity, and which they take on when integrating into the teaching community of practice. In addition, the volume explores the teachers' situated practice—the dynamic negotiation of classroom situations, socialization into the professional teaching culture, and "on the ground experimentation" with pedagogical skills/techniques.

Kris Manjapra weaves together a study of colonialism over the past 500 years, across the globe's continents and seas. This captivating work vividly evokes living human histories, introducing the reader to interlocking pasts and ongoing legacies of colonialism through the study of: war, conquest, militarization, extractive economies, migration and diaspora, racialization, biopolitical management, and unruly and creative responses and resistance. He describes some of the most salient political, social, and cultural constellations of our present across the Americas, Africa, Asia, and Europe. By exploring the dissimilar, yet entwined, histories of settler colonialism, racial slavery, and empire across Asia, Manjapra exposes the enduring role of colonial force and freedom struggle in the making of our modern world.

Becoming a Globally Competent Teacher

2013 saw the launch of the largest, most influential investment initiative in recent memory: China's Belt and Road Initiative (BRI). This globe-spanning strategy has reshaped local economies and regionals networks, and it has become a contested subject for scholars and practitioners alike. How should we make sense of the complex interactions that the BRI has enabled? Understanding these processes requires truly global perspectives alongside careful attention to the role that local actors play in giving shape to individual BRI projects. The contributions in this volume provide both 'big picture' assessments of China's role in regional and global interactions and detailed case studies that home in on the role agency plays in BRI dynamics. Written by leading area studies scholars with diverse disciplinary expertise, this book reveals how Chinese efforts to recalibrate the world are taken up, challenged, revamped, and reworked in diverse contexts around the world.

This series has been developed for the Cambridge Lower Secondary Global Perspectives Curriculum Framework (L129). This learner's skills book for Stage 7 has been created to help students develop key 21st century skills. Written by experienced teacher and author, Keely Laycock, students are encouraged to reflect on topics at a personal, national and global level, while developing skills for their future in a scaffolded and measurable way. Produced with feedback from teachers and students all around the world, teachers will benefit from a flexible resource that they can tailor to their classroom needs.

This book offers a critical and reflexive note by looking at science education in 50 years' time with a recommendation, among others, for stakeholders to take the responsibility of preparing children towards a blossoming science education sector in an anticipated future world. The book is suitable for use by discerning researchers, teachers, undergraduate and postgraduate students in science education, and policy makers at all levels of education. Other educationalists and personnel in science and technology vocations will also find it interesting and useful as the reader-motivated approach has guided the presentation of ideas. Science Education: A Global Perspective is 'global' both in content and authorship. Its 17 chapters by an assemblage of seasoned and knowledgeable science educators from many parts of the world seek to bring to the fore current developments in science education and their implications. The book thus covers a wide range of topics in science education from various national and international perspectives. These include the nature of science, science and religion, evolution, curriculum and pedagogy, context-based teaching and learning, science and national development, socially-responsible science education, equitable access for women and girls in science and technology education, and the benefits of science education research. It ends on an optimistic note by looking at science education in 50 years' time with a recommendation, among others, for stakeholders to take the responsibility of preparing children towards a blossoming science education sector in an anticipated future world. This book is suitable for use by discerning researchers, teachers, undergraduate and postgraduate students in science education, and policy makers at all levels of education. In recent years, historians across the world have become increasingly interested in transnational and global approaches to the past. However, the debates surrounding this new border-crossing movement have remained limited in scope as theoretical exchanges on the tasks, responsibilities and potentials of global history have been largely confined to national or regional academic communities. In this groundbreaking book, Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows, sociologies of knowledge and hierarchies that are an intrinsic part of historical practice. Taking the United States, Germany and China as his main case studies, he reflects upon the character of different approaches to global history as well as their social, political and cultural contexts. He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue, cooperation and exchange.

This edited book offers culturally-situated, critical accounts of Content and Language Integrated Learning (CLIL) approaches in diverse educational settings, showcasing authentic examples of how CLIL can be applied to different educational levels from primary to tertiary. The contributors offer a research-based, critical view of CLIL opportunities, challenges and implications in the following areas: teacher-student dialogue, translinguaging, coursebooks, bilingual education, authenticity, language development and thinking skills. This wide-ranging volume will appeal to students and scholars of English Language Teaching (ELT), language policy and planning, bi- and multilingualism, and applied linguistics more broadly.

This book provides students with a comprehensive overview of Australian and international public health issues and contexts. It explores recent changes in the local public health field, as well as complex global public health issues, and engages with the political and cultural impacts that have on public health systems. The book aims to deepen students' understanding of the determinants of health research. Through consideration of new perspectives, it introduces the latest public health discourses and explores issues of health promotion and health inequalities that inform much of the understanding of public health today. Drawing on more than 25 years' experience, Pranee Liamputtong leads a stellar author team to present this essential resource. Each chapter includes learning objectives, informative case studies to aid students' understanding of key concepts.
