This book analyzes the development and evolution of the F-35 Joint Strike Fighter, a multinational aircraft endeavor involving the U.S. and many of its

security trends the F-35 may see combat in. By examining the role of defense industries, domestic politics, and governmental oversight of the Joint Strike Fighter in various countries, the author concludes that this aircraft will be

amidst a number of competing strategic interests. The difficulties arising from US engagement in Iraq and Afghanistan are leading many scholars and policy makers to question whether a reinvigorated nuclear triad has any role in deterring

China's extraordinarily

that China's future growth
prospects could be equally

China, published by PIIE in 2014. This book mobilizes new data to trace how President Xi Jinping has consistently championed state-owned or controlled enterprises, encouraging local political leaders and

financial institutions to prop up ailing, underperforming companies that are a drag on China's potential. As with his previous book, Lardy's perspective departs from conventional wisdom,

especially in its contention that China could achieve a high growth rate for the next two decades—if it reverses course and returns to the path of market-oriented reforms.

This book explores whether

Get Free Global Strike A Strike Back Novel 3 Strikeback

the new capabilities made possible by precision-strike technologies are reshaping approaches to international intervention. Since the end of the Cold War, US technological superiority has led to a more proactive

Get Free Global Strike A Strike Back Novel 3 Strikeback

and, some would argue, high risk approach to international military intervention. New technologies including the capacity to mount precision military strikes from high-level bombing campaigns and,

Get Free Global Strike A Strike Back Novel 3 Strikeback

more recently, the selective targeting of individuals from unmanned aerial vehicles (UAVs) have facilitated air campaigns, supported by Special Forces, without the commitment of large numbers of troops on

Get Free Global Strike A Strike Back Novel 3 Strikeback

the ground. Such campaigns include, for example, NATO's high-level aerial bombardment of Milosevic's forces in Kosovo in 1999 and of Gaddafi's in Libya in 2011, and the US operation involving Special Forces

against Osama Bin Laden. The development of UAVs and electronic data intercept technologies has further expanded the potential scope of interventions, for example against Islamic militants in the tribal

areas of Pakistan. This volume examines three key and interrelated dimensions of these new precision-strike capabilities: (1) the strategic and foreign policy drivers and consequences; (2) the legal and moral
