

Go Math Assessment Guide Kindergarten

Mathematics program integrating math, science, and language arts.

It has been shown that students learn best and retain more when they are engaged in the material and actively apply concepts to everyday life. Here is the foundation course for Math Lessons for a Living Education that is designed to engage students through exciting stories, teach them how to apply mathematical concepts through everyday life situations, and allow them to learn smarter instead of harder! Learn to count to 10 and numbers 0-10, develop critical thinking skills and build stamina. Make connections to their world by noticing basic patterns, shapes, and concepts of time. This book was written to be used by you and your young students together. It begins the story of a twin brother and sister as they interact with their family, friends, and town. They make connections in life and find it full of learning opportunities! Students will learn about counting, basic shapes, opposites, positional words, graphing, and more. They will also learn about the weather, nature, and how unique God created them to be. Come join the twins as they encounter living math adventures.
