Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

Get an in-depth understanding of how to create fun, engaging, and challenging performance assessments that require students to elaborate on content and demonstrate mastery of skills. This update of an ascd (Association for Supervision and Curriculum Development) classic includes new scoring methods, reading assessments, and insights on navigating one's way through Response to Intervention. Using real classroom experiences, the authors describe dozens of inventive assessment tasks, including: (1) Visual representations such as graphic organizers, time lines, comic strips, and electronic slide shows; (2) Written assignments such as persuasive letters, rafts, and informational brochures; (3) Oral presentations such as round-robin mini-speeches, press conferences, and debates; and (4) Large-scale products and performances such as prototypes, museum exhibits, and achievement conventions. Step-by-step guidelines and scoring methods for each project help you adapt these tasks to one's classroom right away. Following a preface, the following chapters are contained in this book: (1) Great Performances: Our Journey Begins; (2) Info in: How Students Learn New Content Information; (3) Info Out: Assessing Students' Understanding with Visual Representations; (4) Info Out: Assessing Students' Understanding Using the Written Mode; (5) Info Out: Assessing Students' Understanding Through Oral Presentations; (6) Info Out: Assessing Students' Understanding Through Large-Scale Projects or Performances; (7) a Scenic Tour of Reading Assessment; and (8) Sparkles and Blemishes; and (8) a Study Guide for Great Performances: Creating Classroom-Based Assessment Tasks, 2nd Edition. [For the first edition, "Great Performances: Creating Classroom-Based Assessment Tasks," see ed428109.].

Introductory Statistics is designed for the one-semester, introductory to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them. Math in Focus Workbook, Book a Grade 5

Mathematics - Analysis and Approaches

How does the organization define, manage, and improve its Microsoft Teams processes? What tools do you use once you have decided on a Microsoft Teams strategy and more importantly how do you choose? How would one define Microsoft Teams leadership? Whats the best design framework for Microsoft Teams organization now that, in a post industrial-age if the top-down, command and control model is no longer relevant? How can you negotiate Microsoft Teams successfully with a stubborn boss, an irate client, or a deceitful coworker? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company, organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?'' For more than twenty years, The Art of Service's Self-Assessments empower people who can do just that - whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT Manager, CxO etc... - they are the people who rule the future. They are people who watch the process as it happens, and ask the right questions to make the process work better. This book is for managers, advisors, consultants, specialists, professionals and anyone interested in Microsoft Teams assessment. All the tools you need to an in-depth Microsoft Teams Self-Assessment. Featuring 607 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Microsoft Teams improvements can be made. In using the questions you will be better able to: - diagnose Microsoft Teams projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Microsoft Teams and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Microsoft Teams Scorecard, you will develop a clear picture of which Microsoft Teams areas need attention. Included with your purchase of the book is the Microsoft Teams Self-Assessment downloadable resource, which contains all questions and Self-Assessment areas of this book in a ready to use Excel dashboard, including the self-assessment, graphic insights, and project planning automation - all with examples to get you started with the assessment right away. Access instructions can be found in the book. You are free to use the Self-Assessment contents in your presentations and materials for customers without asking us - we are here to help.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Includes Common Core standards practice in PARCC format - Beginning, middle, and end of year benchmark tests with performance tasks - Year-end performance assessment task - Student record forms - Print and digital intervention resources correlated to Common Core Standards.
