Going Wild Pilot Projects Take Off Childrensmuseums

Be future-proof with the energy licence! Making the economy and society fit for the future begs the question: how will the energy needs of tomorrow be met? What measures need to be implemented by companies and communities today in order to be future-proof tomorrow? Current developments like power line conflicts, the phase-out of nuclear energy and meeting growing

Read Free Going Wild Pilot Projects Take Off Childrensmuseums

supply expectations demonstrate that, to solve this strategic challenge, decision-makers from business, politics and the wider community have to develop new sets of skills and foresight competencies. In this book, the authors set out the possible scenarios, their consequences and the essential factors for securing tomorrow's energy supply. They also provide the information needed by readers to earn their 'energy licence'. It's a licence designed to qualify the holder to

This report summarizes the state of biodiversity for food and agriculture in Near East and North Africa based on the information provided in country reports submitted to FAO as part of the reporting process for The State of the World's Biodiversity for Food and Agriculture.

Over one hundred presentations from the 35th annual Charleston Library Conference (held November 4–7, 2015) are included in this annual proceedings volume. Major themes of the meeting included streaming video, analysis and assessment, demand-driven acquisition, the future of university presses, and open access publishing. While the Charleston meeting remains a core one for

acquisitions librarians in dialog with publishers and vendors, the breadth of coverage of this volume reflects the fact that this conference is now one of the major venues for leaders in the publishing and library communities to shape strategy and prepare for the future. Almost 1,800 delegates attended the 2015 meeting, ranging from the staff of small public library systems to the CEOs of major corporations. This fully indexed, copyedited volume provides a rich source for the latest evidence-based research and lessons from practice in a range of information science fields. The contributors are leaders in the library, publishing, and vendor communities.

production parameters without sacrificing the quality and punch of their screenplays, whether they're creating a sizzle short for an unproduced feature script, an independent creative work, or a soapbox to promote a cause. Write to Shoot: Writing Short Films for Production is a must-have guide for anyone who wants to be sure there will be no surprises on set that come from a script that's not ready for production. Effective project management is becoming a critical mission skill for individuals and organizations in every industry. Faster product life cycles, the widespread adoption of cross-functional teams, and the increasing demands of customers are all contributing to the growing need for professional managers who know how to marshal resources, make decisions,

Resulting from the authors' deep research into these two pre-Shuttle astronaut groups, many intriguing and untold stories behind the selection process are revealed in the book. The often extraordinary backgrounds and personal ambitions of these skilled pilots, chosen to continue NASA's

exploration and knowledge of the space frontier, are also examined. In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth-orbiting Skylab space station. Three years later, following the sudden cancellation of the USAF's highly classified Manned Orbiting Laboratory (MOL) project, seven military astronauts were also co-opted into NASA's space program. This book represents the final chapter by the authors in the story of American astronaut selections prior to the era of the

Space Shuttle. Through personal interviews and original NASA documentation, readers will also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s, and the men who flew those historic missions.

Developing Indicators for Policy

Analysis

Markets are usually discussed in abstract terms, as an economic organizing principle, a generalized alternative to government planning, or even as powerful actors in their own right, able to shape local and national economic destinies. But markets are not abstract. Even as the idea of the market seduces politicians around the world to take advantage of their abstract qualities, they constantly run up against material reality. Markets are always somewhere, in place, and it is in place

that the smooth theories of markets falter and fail. More than simply being embedded in particular places, markets necessarily emerge in the various political, social, cultural, and environmental relations that exist in and between places. Markets shape places, but the reverse is also true. This collection of essays approaches markets from the ground up, and from a part of the world often still regarded as peripheral to global capitalism: the South Pacific. With a wide variety of case studies, including on indigenous economies, childcare, agriculture, wine, electricity metering, finance, education, and housing, the authors show how complex local, social and cultural politics matter to how markets are made within and between places, and the insights that can be gleaned from studying markets in this part of the

world. They explore the way superficially similar markets work out differently in different places, and why, as well as examining how market relations are constructed in places outside and on the edges of the centres of Western capitalism, and what this says back to how markets are understood in those centres. The book will be of particular interest to scholars and students working in and between economic geography, cultural economy, political economy, economic sociology, and more.

A startling, shape-shifting book of prose and images that draws on an unexpected pair of inspirations—the poetry of Fernando Pessoa and the history of air disasters—to investigate con men, identity politics, failures of leadership, the privilege of ineptitude, the slave trade, and the nature of

consciousness. Early in 2017, on a plane from Cape Verde to Lisbon, author and visual artist James Hannaham started reading Pessoa & Co., Richard Zenith's English translation of Fernando Pessoa's selected poetry. This was two months after Trump's presidential election; like many people, ideas about unfitness for service and failures of leadership were on his mind. Imagine his consternation upon discovering the first line of the first poem in the book: "I've never kept sheep/But it's as if I did." The Portuguese, Hannaham had been musing, were responsible for jump-starting colonialism and the slave trade. Pessoa published one book in Portuguese in his lifetime, Mensagem, which consisted of paeans to European explorers. He also invented about seventy-five alter egos, each with a unique name and style, long before

aliases and avatars became a feature of modern culture. Hannaham felt compelled to engage with Pessoa's work. Once in Lisbon, he began a practice of reading a poem from Zenith's anthology and responding in whatever mode seemed to click. Even before his trip, however, he had become fascinated by Air Disasters, a TV show that tells the story of different plane crashes in each of its episodes. These stories—as well as the textures and squares of the city he was visiting—began to resonate with his concerns and Pessoa's, and make their way into the book. Through its inspirations and juxtapositions and its agile shifts of voice and form—from meme to fiction to aphorism to screenshot to lyric—the book leads us to reckon with the most universal questions. What is the self? What holds the self—multiple, fragmented,

This book deals with convergences of legal doctrine despite jurisdictional, cultural, and political barriers, and of divergences due to such barriers, examining topics that are of vital importance to contemporary legal scholars. Written by leading scholars from more than twenty countries, its thirty-two chapters present a comparative analysis of cutting-edge legal topics of the 21st century. While each of the countries covered stands alone as a sovereign state, in a technologically advanced world their disparate systems nonetheless show comparable strategies in dealing with complex legal issues. The book is a critical addition to the library of any scholar hoping to keep abreast of
