'(Un)Making the Monarchy' offers a kaleidoscopic view on the British monarchy – an institution that today seems integral, almost inevitable, to the British political system and the very texture of Britishness/Englishness. The contributions in this volume seek to historicise, contextualise, and politicise such dominant myths of the monarchy. They look at the strategies through which monarchical power

has been legitimised and naturalised in the texts and practices of (not only) British culture and at the way in which the monarchy has, in turn, been used to legitimise and naturalise other hegemonic structures in society. They also engage with the forms and practices that have sought to contest and subvert monarchical power. Contributors thus tackle the psychological, performative, and political dimensions of monarchical reign, examine supportive as well as critical, satirical, and anti-monarchist representations in literature, theatre, the media, and deal with some of the monarchy's

movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more

influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the

opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

treatment, and overall case management. Experienced Coeditors Karen Tobias and Spencer Johnston provide the definitive reference for veterinary surgery, invaluable preparation for the ACVS and ECVS board examinations. Blend of clinical and basic science information provides the best possible understanding of clinical issues surrounding operative situations. Specific procedures are covered in great detail and are brought to life with full-color drawings and photographs. Highly recognized contributors provide authoritative coverage that is useful for surgical specialists as well as practicing veterinarians who perform surgery or refer cases for surgery. Detailed coverage of small animal surgery

Verification is increasingly complex, and SystemVerilog is one of the languages that the verification community is turning to. However, no language by itself can guarantee success without proper techniques. Object-oriented programming (OOP), with its focus on managing complexity, is ideally suited to this task. With this handbook—the first to focus on applying OOP to

SystemVerilog—we'll show how to manage complexity by using layers of abstraction and base classes. By adapting these techniques, you will write more "reasonable" code, and build efficient and reusable verification components. Both a learning tool and a reference, this handbook contains hundreds of real-world code snippets and three professional verification-system examples. You can copy and paste from these examples, which are all based on an open-source, vendor-neutral framework (with code freely available at www.trusster.com).
