This book focuses on the realistic challenges faced by the implementation of Gender Responsive Budgeting in India. It gives insight about the various tools and implementation methods for the gender equality. Assessing budgets through a gender lens requires thinking about government finances in a new way. It calls for including equity in budget performance indicators and examining the impact of budget policies on gender equality outcomes. It also focuses on the relation between government spending and women's spent in unpaid care work such as water and fuel collection, caring for the sick, children and many others. Conducting a gender-responsive budget analysis can be seen as a step not only towards accountability to women's human rights, but also towards greater transparency and economic efficiency. However, the work argues to focus on the broad framework because that would show the actual commitment of the state. Vacuum analysis would provide wrong inputs thus there is need to see gender budgeting in consonance with the entire budgetary allocations and concerned ministries allocation.

Defence Expenditure Is A Very Significant Part Of Central Government Expenditure. These Book Looks At Various Issues Regarding Defence Budgets In A Detailed And Analytic Manner. Without Dust Jacket.

A lucid and analytical presentation of the Union Government budgets, with their financial implications. A valuable book for economists, policy makers and legislators in identifying the problems leading to fiscal imbalance.

historical trends and composition of public expenditure at the central and the sub national levels; the effectiveness of public expenditure control systems and accountability issues; the political economy of spending decisions; public expenditure reforms undertaken in India and international best options that can guide the corrective process in India. Given the global shift in focus from 'outlays' to 'outcomes' it is important to put in place a sound framework to track the results of government expenditure programs to guide the informed expenditure decision making process. The book documents the features of useful frameworks and steps involved in adopting a robust results framework. Fiscal management of Covid-19 is an important component of the book. The purpose of this volume is to reach out a comprehensive and updated understanding of empirical issues in public expenditure and its management in India to the students of Public Finance.

Gender Budgeting and Women Empowerment in India

(The Indian Context)

This book explores public budgeting in India. As government finances play an important role in the social and economic development of a nation, it focuses on public budgeting in the context of India. The respective chapters not only discuss the underlying principles of budgeting, but also address the practical issues related to the government's financial operations and their macro-economic implications.

Recently there has been considerable debate surrounding the size of government, with the neo-liberal framework advocating a very limited governmental role. This book provides comprehensive information on the practical aspects of public budgeting with regard to how governments raise revenues, how they are spent, the nature of public services provided, and their implications for the social and economic development of the country against the backdrop of public budgeting theory. The topics covered include the constitutional fiscal framework; theories, structure and issues related to budgets; mechanisms of budget construction, budget execution, public budgeting and performance assessment; government accounting; and financial accountability.

This book provides an exhaustive and analytical account of budgetary developments in India since Independence in 1947 with focus on post-1991 reforms. The work is organised into 8 parts, each part containing chapters/information dealing with some aspect of budgetary policy in India. Part I

explains the economic role of modern governments, particularly in developing countries. It describes various reasons for state intervention in the working of an economic system with special reference to the provision of public goods. Part II of this work explains (a) constitutional provisions and parliamentary procedures and controls applicable to the budgetary exercise of the Government of India, (b) structure of the Central Government budget, (c) functional, economic and cross-classification of the budget and (d) recent budgetary reforms in India including gender budgeting. Part III is devoted to taxes, expenditure, subsidies and debt liabilities of the Central Government. Defence Budget is one of the most important segments of government expenditure in India. Firstly, it is to do with the secretive nature of information pertaining to defence related issues. The second reason is due to general apathy towards defence related issues. From the national security point of view it is important that issues concerning defence are debated more widely that could lead to viable decision

and policy making besides ensuring accountability by those in power. Contrary to popular perception a large amount of data, both official and otherwise, is indeed available through open sources to facilitate such a process. It is with this focus as a backdrop, the current book addresses certain pertinent issues concerning defence budgeting process in the country.

In India, the Central Government budget is designed mainly to ensure Parliamentary control and accounting scrutiny. Each year the Government has to obtain the authority of the Parliament to raise revenues to meet its expenditure. Budget of the government is perhaps the most important annual item

on the agenda of the Parliament. Budget papers of the Government of India provide glimpses of the events, challenges, and perceptions of the leaders. They highlight contemporary problems of the Indian economy and policy measures taken by the government to solve them, making for a fascinating study of India's march towards development. Fiscal federalism is a subject of topical interest in India in view of some recent developments of historical importance. The Constitution (Eightieth Amendment) Act, 2000, significantly changed the manner of distribution of Central tax collections between the Central and State Governments. Spread over 29 chapters, the book is organized into 2 parts. Part I (chapters 1 to 7) is titled Government Budgeting Procedures in India. Part II (chapters 8 to 29) is titled Centre-State Financial Relations (Fiscal Federalism) in India.

Globally, women are facing social, economic, and cultural barriers impeding their autonomy and agency. Accelerated women empowerment programs often fail to attain their targets as envisaged by the policymakers due to a variety of reasons, with the most prominent being the deep-rooted cultural norms ingrained within society. In the era of globalization, empowerment of women demands new approaches and strategies that encourage the mainstreaming of gender equality as a societal norm. The Handbook of Research on New Dimensions of Gender Mainstreaming and Women Empowerment is a critical scholarly publication that examines global gender issues and new strategies for the promotion of women empowerment and gender mainstreaming in various spheres of women's lives, including education and ICT, economic participation, health and sexuality, mental health, aging, law and judiciary, leadership, and decision making. It provides a comprehensive coverage of all major gender issues with novel ideas on gender mainstreaming being contributed by men and women authors from multidisciplinary backgrounds. Gender perspective and intersectional approach in the discourses make this handbook a unique contribution to the scholarship of social sciences and humanities. The book provides new

theoretical inputs and practical directions to academicians, sociologists, social workers, psychologists, managers, lawyers, policy makers, and government officials in their efforts at gender mainstreaming. With a wide range of conceptual richness, this handbook is an excellent reference guide to students and researchers in programs pertaining to gender/women's studies, cultural studies, economics, sociology, social work, medicine, law, and management.

Budgets and Budgetary Procedures in India, 1947-48 to 2009-10

Traditionally, economics training in public finances has focused more on tax than public expenditure issues, and within expenditure, more on policy considerations than the more mundane matters of public expenditure management. For many years, the IMF's Public Expenditure

Management Division has answered specific questions raised by fiscal economists on such missions. Based on this experience, these guidelines arose from the need to provide a general overview of the principles and practices observed in three key aspects of public expenditure management: budget preparation, budget execution, and cash planning. For each aspect of public expenditure management, the guidelines identify separately the differing practices in four groups of countries - the francophone systems, the Commonwealth systems, Latin America, and those in the transition economies. Edited by Barry H. Potter and Jack Diamond, this publication is intended for a general fiscal, or a general budget, advisor interested in the macroeconomic dimension of public expenditure management.

In this comprehensive essay on best practices for government budget officers, author Edward Anthony Lehan discusses budgeting as a craft rather than an art requiring virtuoso talent. This distinction is important because "craftsmanship" implies that the intellectual and practical aspects of budgeting can be codified and that the requisite knowledge and skill can be taught and learned. Lehan strikes a critical note in the opening paragraph by identifying the necessity to ration scarce resources as the focus of the occupation. Governments employ budget officers to help publicly accountable officials ration the resources made available to them by the society they serve. Because the rationing process is

inherently competitive in nature, good budget officers are particularly concerned with equity. Their recommendations must rest on a deserved reputation for impartial analysis. Lehan explores in depth the prescriptive task of rendering judgments on the merits of public programs through the application of certain standards, concepts, and measurements that emphasize efficacy and reduce subjectivity. In examining key concepts, defining various roles, and providing models of effective thinking and practice for an array of concerns within the typical budget cycle, Budgetary Thought for Budget Officers promotes a dynamic intellectual approach to budget implementation.

Government budgeting is a subject of increasing importance and interest in India. The high level of administrative, welfare and developmental activities of the Central Government make for colossal amounts of both receipts and disbursements. This book explains the concepts and processes involved in the budgetary exercise of the Government of India. It describes the Parliamentary procedures and controls applicable to budgetary activities of the Government, the structure of the Central budget, and the interface between the Central and State finances. It also explains the relatively technical aspects of the Central budget, viz. its functional, economic and cross-classification. More importantly, it also brings at one place, carefully selected extracts from the budget speeches of the Union Finance Ministers since Independence. Furthermore, it

provides a ready source of comprehensive statistical information on Central Government finances in India.

the budgetary context and process, budget shares and results regarding virtually any government of interest. Chapters cover the constitutional and statutory provisions for budgeting in selected governments. Budget and policy agenda setting and executive leadership, legislative budget powers and the influence of the judiciary on modern government budgets are exposed. Budget execution requirements of the bureaucracy, the input of customers, clients and citizens to government budgets, and media influences on public budgets and agencies are highlighted. Budget mechanics—budget types, formats, timelines and reforms—are introduced and compared. Taxes and intergovernmental revenues are considered, with predominant tax choices at every level of government in the United States and those in a select, developing country represented. The book introduces an emerging method for investigating the outcomes of government spending—human rights budget analysis—and includes as an example the assessment of budget reform and results of public health spending in one selected government.
