Cautionary Tales is drawn from over 30 years experience as a General Practitioner. Taken primarily from Professor Murtaghs own practice in rural Victoria, these cautionary tales are authentic cases in clinical practice and the mistakes and

problems that GPs can encounter. Each story is an engaging example of the common mistakes which can occur in general practice and provides the reader with valuable insights. Each tale is enriched with psychological, social and environmental

factors that form part of every patient problem. The addition of a section called Discussions and lessons learned at the end of each tale further enhances the value and application of each case to real life practice. An invaluable source for
