"History of the American society of mechanical engineers. Preliminary report of the committee on Society history," issued from time to time, beginning with v. 30, Feb. 1908. Considered as one of the most sensitive and creative writers of his times, Rabindranath Tagore elevated the genre of short stories to an art-form. Most of his stories revolve around the life in rural and urban Bengal, beautifully portraying intricate aspects of the nature of society and the people in it. Tagore's style merged stark realism with poetic idealism. One can find this reflecting in over a hundred short stories written by him. Known as a prolific writer from Bengal, his poems became famous and appreciated across the globe as they carried a message of India's spiritual heritage. Rabindranath Tagore became the first Indian to be awarded a Nobel laureate when he won the Nobel Prize for his collection of poems, Gitanjali, in 1913. In spite of their inherent simplicity, Tagore's stories lead to profound insights of the human mind. They have a capacity to touch your core and leave you thinking deeply about human values. This collection contains some famous short stories including: The Postmaster The Cabuliwallah Subha The Castaway The Hungry Stones The Son of Rashmani The Babus of Nayanjore Master Mashai The Child's Return The Home-coming The Skeleton The Auspicious Vision The Riddle Solved Once There Was a King The Victory and many more Tagore, during his time and even today continues to remain a ?literary institution? that every Indian would love to read. Embassy Books proudly presents this book as part of the Embassy Classics Series, which comprises of some of the best literary works of great authors.

You'll find tips and tricks to tackle each stage of your twins' development plus ideas to improve what you're already doing.

Give your kids the decluttering guide that will encourage their independence and create a more peaceful home for your family. Allie Casazza has created a resource for you to show kids how to create and design their own space, offering practical ideas on organization and productivity, kid-friendly inspiration for mindfulness, and interactive pages for creativity. Allie has encouraged women to simplify and unburden their lives as the host of The Purpose Show podcast and through her first book Declutter Like a Mother. Now she's helping you equip your kids and tweens to discover the same joy of decluttering as they design and create a space that supports their interests and goals, make more room in their lives for playtime and creativity, increase productivity and find renewed focus for schoolwork, learn valuable life skills, and cut down on cleaning time, reduce stress, and feel more peaceful. Your kids will start to understand that the less they own, the more time they have for what's important. Written in Allie's fun, motivational voice, Be the Boss of Your Stuff is ideal for boys and girls ages 8 to 12, includes photography and interactive activities with space to write, draw, imagine, and plan, shares step-by-step instructions for decluttering, offers added practical, personalized instruction from Allie's children, Bella and Leeland, and is a great gift for coming-of-age celebrations, the first day of spring, New Year's, Easter, birthdays, back-to-school, or school milestones. As your kids become more proactive in taking care of their stuff, you'll find your whole family has more time and space for creativity and fun. After all, less clutter, less stress, and less chaos in your kids' lives means more peace, more independence, and more opportunity to grow into who they're meant to be. Read Allie's first book, Declutter Like a Mother, to further equip yourself in decluttering while you empower your kids to embrace their space.

The Very Best Of Rabindranath Tagore - Short Stories

The Advertising Red Books: Business classifications

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. The Wonder Weeks

The Wonder Weeks reveals what's going on inside baby's mind. Including a bonus chapter with everything about the relationship between sleep and leaps, as well as unique insight into your baby's sleeping behavior. The book includes: * Week-by-week guide to baby's behavior* When to expect the fussy behavior, what this implies (cranky, clingy, crying (the three C's) behavior) and how to deal with these regression periods (leaps)* A description from your baby's perspective of the world around him and how you can understand the changes he's going through* Fun games and gentle activities you can do with your child* Unique insight into your baby's sleeping behaviour The book is based on the scientific- and parental-world-changing discovery of a phenomenon: all normal, healthy babies appear to be more fussy at very nearly the same ages, regression periods, and sleep less in these phases. These age-related fluctuations in need for body contact and attention (regression periods) are related to major and quite dramatic changes in the brains of the children. These changes enable a baby to enter a whole new perceptual world and, as a consequence, to learn many new skills. This should be a reason for celebration, but as far as the baby is concerned these changes are bewildering. He's taken aback--everything has changed overnight. It is as if he has woken up on a strange planet. He needs you to guide him and understand what he is going through! Get ready to rediscover the world all over again with your baby... Bonus: Sleep, and the lack of sleep... that's something we all have to deal with when we have a baby. The bonus chapter includes everything about the relationship between sleep and leaps, as well as unique insight into your baby's sleeping behavior. Hint: did you know your baby learns (and there's a lot of brain activity) during those little, 'light' sleeps?

Since the 1960s, the class action lawsuit has been a powerful tool for holding businesses accountable. Yet years of attacks by corporate America and unfavorable rulings by the Supreme Court have left its future uncertain. In this book, Brian T. Fitzpatrick makes the case for the importance of class action litigation from a surprising political perspective: an unabashedly conservative point of view. Conservatives have opposed class actions in recent years, but Fitzpatrick argues that they should see such litigation not as a danger to the economy, but as a form of private enforcement of the law. He starts from the premise that all of us, conservatives and libertarians included, believe that markets need at least some rules to thrive, from laws that enforce contracts to laws that prevent companies from committing fraud. He also reminds us that conservatives consider the private sector to be superior to the government in most areas. And the relatively little-discussed intersection of those two beliefs is where the benefits of class action lawsuits become clear: when corporations commit misdeeds, class action lawsuits enlist the private sector to intervene, resulting in a smaller role for the government, lower taxes, and, ultimately, more effective solutions. Offering a novel argument that will surprise partisans on all sides, The Conservative Case for Class Actions is sure to breathe new life into this long-running debate.
