Pulp, Paper, and Board: Quarterly Industry Report

Technical Paper (United States. Bureau of the Census).

The modern world is wondrous. Its factories produce ten thousand cars every hour and ten trillion transistors every second. We carry supercomputers in our pockets, and nearly a million people are in the air at any time. In Civilization Critical, Darrin Qualman takes readers on a tour of the wonders of the 21st century. But the great strength of our modern world is also its great weakness. Our in powers to turn resources and nature into products and waste imperil our future. And plans to double and redouble the size of the global economy veto sustainability. So, is our civilization doomed? No. Doom is a choice. We can make different choices. Qualman demonstrates that a 19th- and 20th-century transition to linear systems and away from the circular patterns of nature (and of all previous civilizations) is the foundational error—the underlying problem, the root cause of climate change, resource depletion, ocean’s full of plastics, and a host of mega-problems now intensifying and merging, with potentially civilization-cracking results. In this sweeping work, Qualman reinterprets and re-explains the problems we face today, and charts a clear, hopeful path into the future.

The 4th Edition consists of past 8 years Solved papers of Stage 2 (2010 -2017). The book has a separate section ‘PAST EXEMPLAR PROBLEMS’ for SAT, MAT & LCT. This section contains a compilation of selective questions from the past papers of NTSE Stage 1 (2011-2016) of various states Delhi, Andhra Pradesh, Karnataka, Madhya Pradesh, Orissa, Punjab, West Bengal, Rajasthan, Maharashtra. The book also provides 5 MOCK TESTS - separate papers for MAT, SAT & LCT designed exactly on the pattern of the NTSE 1st (State Exams) and 2nd stage (National) Exam.

Institutions, Institutional Change and Economic Performance

Continuing his groundbreaking analysis of economic structures, Douglass North develops an analytical framework for explaining the ways in which institutions and institutional change affect the performance of economies, both at a given time and over time. Institutions exist, he argues, due to the uncertainties involved in human interaction; they are the constraints devised to structure that interaction. Yet, institutions vary widely in their consequences for economic performance; some economies develop institutions that produce growth and development, while others develop institutions that produce stagnation. North first explores the nature of institutions and explains the role of transaction and production costs in their development. The second part of the book deals with institutional change. Institutions create the incentive structure in an economy, and organisations will be created to take advantage of the opportunities provided within a given institutional framework. North argues that the kinds of skills and knowledge fostered by the structure of an economy will shape the direction of change and gradually alter the institutional framework. He then explains how institutional development may lead to a path-dependent pattern of development. In the final part of the book, North explains the implications of this analysis for economic theory and economic history. He indicates how institutional analysis must be incorporated into neo-classical theory and explores the potential for the construction of a dynamic theory of long-term economic change. Douglass C. North is Director of the Center of Political Economy and Professor of Economics and History at Washington University in St. Louis. He is a past president of the Economic History Association and Western Economics Association and a Fellow, American Academy of Arts and Sciences. He has written over sixty articles for a variety of journals and is the author of The Rise of the Western World: A New Economic History (CUP, 1973, with R.P. Thomas) and Structure and Change in Economic History (Norton, 1981). Professor North is included in Great Economists Since Keynes edited by M. Blaug (CUP, 1988 paperback ed.)

The past thirty years have seen a rapid expansion of testing, exposing students worldwide to tests that are now, more than ever, standardized and linked to high-stakes outcomes. The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide. The embedded nature and normative power of high-stakes standardized testing across national contexts can be understood as a global testing culture. The global testing culture permeates all aspects of education, from financing, to parental involvement, to teacher and student beliefs and practices. The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability, which becomes synonymous with education quality. Underlying the global testing culture is a set of values identified from the increasing literature on world culture. These include: education as a human right, academic intelligence, faith in science, decentralization, and neoliberalism. Each of these values highlights different aspects of the dialogue in support of high-stakes standardized testing. The wide approval of these values and their ability to legitimate various aspects of high-stakes testing reinforces the taken-for-granted notion that such tests are effective and appropriate education practices. However, a large body of literature emphasizes the negative unintended consequences - teaching to the test, reshaping the testing pool, the inequitable distribution of school resources and teachers’ attention, and reconstructing the role of the student, teacher, and parent - commonly found when standardized, census-based tests are combined with high-stakes outcomes for educators or students. This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts. The volume makes it clear that testing, per se, is not the problem. Instead it is how tests are administered, used or misused, and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended, undesirable consequences.
