Introductory Macroeconomics Based on NCERT Guidelines Class XII by Dr. Anupam Agarwal, Smt. Sharad Agarwal

*The adoption and management of the common currency has led the Eurozone to a critical point. This book analyzes in an interdisciplinary way the fundamental causes of distress, making sure to relate economic issues to the social and political aspects of the problem. The book explores the reasons why the Eurozone has fallen into a policy trap, as well as what Europe did and should do to exit the crisis, and why this is proving to be so difficult. The book also considers what role the United States has played, and could play to help foster a solution for the Eurozone. The main topics explored are the complex nature of the crisis, the short*

*... circuit between policies and the given institutional architecture, the controversial role of Germany, and the importance of an active role of the US. The book brings together a transatlantic group of scholars in order to offer an interdisciplinary analysis of the deep causes of the Eurozone distress. The authors recognize that the Eurozone countries have contrasting situations and interests and face different problems with complex consequences for the vexed question of national sovereignty within the EU; and pay attention to the social and political consequences of the economic and financial distress and of the perceived strain of the common currency.*

Across Africa, a burgeoning middle class has become the poster child for the 'Africa rising' narrative. Ambitious, aspirational and increasingly affluent, this group is said to embody the values and hopes of the new Africa, with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change. This narrative, however, obscures the complex and often ambiguous role that this group actually plays in African societies. Bringing together economists, political scientists, anthropologists and

**SPECIAL QUESTIONS (FOR GRADE 11, THE AGE OF DEEPENING)** *The book series is all about education in human sexuality, based on the nourishment and cultivation of the natural gift of a person's character. The series is based on the premise that SEXUALITY EDUCATION is, basically, CHARACTER EDUCATION, which in turn is founded on human dignity and encompasses formation in moral standards and human conduct; hence, covering the key elements of "life and love, and everything in between". Comprising an introductory volume for parents and teachers; a volume for classroom use of teachers; a volume for parents; and eight volumes for Grades 5 to 12, respectively, this*

*current volume is specifically addressed to Grade 6 pupils, about 17 to 18 year olds in their late adolescence. It talks about SPECIAL QUESTIONS: on issues concerning life; sex; marriage; and human identity. Since men and women have been gifted with intellect and will, one becomes highly capable of using well or abusing these powers for the good or damage of self and fellowmen. It is thus extremely important that students at this age have a deep appreciation of the issues confronting the modern world, especially in the realm of sexuality and the channels of its development. The book series is characterized by sound, perennial concepts and by teaching and learning tools geared towards the age group being addressed.*

*with a focus on their economic structure and performance, and the impact of EU membership (past, actual and potential) on the economy. The small states to be covered are those with a population of 3 million or less, namely: Cyprus, Estonia, Iceland, Latvia, Lithuania, Luxembourg, Malta, Macedonia, Montenegro and Slovenia. This title adds to the literature on the EU, on regional integration generally and on small states. It delves into the special constraints of small economic size, and examines why and how the small states of Europe manage to compete, albeit not without difficulty, with the larger states in the block, where free trade prevails. The book answers the following research questions: What are the special economic development constraints faced by the small states of the EU? What policy options have been used by, or are available to, these small states to address these constraints?*

*How can the economic resilience and competitiveness of these states be enhanced? Has EU membership been mostly advantageous for these small states? What are the economic prospects for these states as EU member states? The book is aimed primarily for students of EU affairs and of regional integration in general. It will also be useful for students of subjects relating to small states. It may also appeal to policy makers of small states, and to officials of international and regional organisations that have a constituency that includes small states.*
