The Real Lives of Prisoners of War in the Second World War

Concepts and Models for Service-learning in History

The English Catalogue of Books [annual].

Writing for Social Justice

Feature films have created the stereotype of the Second World War prisoner of war. He is the spruce, stiff-upper-lipped Alec Guinness in *The Bridge on the River Kwai*, or Steve McQueen's cunning and opportunist 'Cooler King' in *The Great Escape*, the all-American motorbike hero. If he is imprisoned in Europe it will have to be in the forbidding North German Schloss of Colditz or the tunnel-riddled Stalag Luft III. But, as Midge Gillies shows in this groundbreaking work of social history, the true experiences of nearly half a million Allied servicemen held captive during the Second World War were nothing like the Hollywood myth - and infinitely more extraordinary. The real lives of POWs saw them respond to the tedium of a German stalag or the brutality of a Japanese camp with the most amazing ingenuity and creativity. They staged glittering shows, concerts and elaborate sporting fixtures, made exquisite ornaments - even, amid the terrible privations of the Thailand-Burma railway, improvised daring surgical techniques to save their fellow men's lives. Whatever skills or hobbies they took with them to captivity they managed to continue and adapt - to the extent of laying out a 9-hole golf course between the huts of one German camp. They took up crafts and pastimes using materials they found around them: even the string from a Red Cross food parcel was used to make cricket balls, football nets and wigs for theatrical performances. Men studied, attended lectures, learned languages, sat for qualifications and exams, on such a scale that one camp was nicknamed 'The Barbed-Wire University'. A number of books written by POWs in captivity are still in print today. And often the years in captivity proved a turning-point in their lives, as the new interests and skills they took out of the camp enabled them to embark on a post-war career in which they would succeed at the highest level - whether actors like Clive Dunn and Denholm Elliott, artists like Sir Terry Frost and Ronald Searle, or the birdwatchers who studied rooks and jackdaws beyond the perimeter wire in distant parts of the German Reich and went on to run the Royal Society for the Protection of Birds. Drawing on letters home, diaries and interviews with redoubtable survivors now into their nineties, Midge Gillies recreates the daily lives of a truly remarkable group of men. It is a story by turns thrilling, funny, desperate and moving, but never less than inspirational.

The purpose of this book is to draw readers' attention to various legal intricacies associated with deploying self-directed artificial intelligence systems (AIS), particularly emphasizing the limits of the law, vis-à-vis liability problems that may emerge within third-party contracts. With the advent of today's ostensive "Amazon Halo or Alexa," consumers are having to conclude contracts (e.g., sale of goods and distant financial services) in much more complex (cybernetic) environments. Generally, with one party acting in the capacity of a human being while the other (as an autonomous thing/device [AIS] with capabilities well beyond that of humans) representing the interests of others (not just other humans). Yet traditional jurisprudence is limited in scope for holding these systems legally accountable if they were to malfunction and cause harm. Interestingly, within the judicial system itself, the use of AIS is more prevalent now, including within the criminal justice system in some jurisdictions. In the United States, for instance, AIS algorithms are utilized to determine sentencing and bail processing. Still, jurists find themselves limited to traditional legal methodologies and tools when tackling novel situations brought about by these systems. For example, traditional strict liability concept, as applied in tort law, typically ties responsibility to the person(s) (e.g., AIS developers) influencing the decision-making process. In contract law, particularly where third parties are concerned, AIS are equated to tools for the purposes of traditional strict liability rules. Thus, binding anyone on whose behalf they would have acted (irrespective of whether such acts were intentional or foreseeable).

Students in public schools serving poor and working-class students are inundated by the effects of high-stakes examinations. Teachers are demoralized and students suffer from substandard curricular and pedagogical experiences. These effects are articulated by students and teachers in the high school that provided the setting for the critical ethnography on which this text is based. Teachers resent being judged on the basis of students' performance on standardized assessments. They are deprofessionalized as their roles are oriented toward working-class norms. Students feel alienated by content that is meaningless and test-based pedagogies that are disempowering. While these findings are disturbing, critical theory provides a foundation for seeking hope. By incorporating inquiry and dialogue, this theoretical framework opens a space where resistance can be revealed and examined. In this case, the study exposed glimmers of resistance, spaces in the structure of schooling where students and teachers critique the status quo and suggest ways of subverting the negative effects of the neoliberal reforms through dialogic, empowering, culturally responsive pedagogies. Collective resistance, achieved through dialogic pedagogies that build on understandings of resistance and power, can cultivate theoretical and material spaces where a cycle of praxis can enhance possibilities for social justice. To that end, the conclusion is devoted to the implementation of critical, dialogic approaches to literacies, approaches intended to interrupt the hegemony that perpetuate social reproduction by capitalizing on the potential for solidarity and collective agency among the students and teachers who populate and educate these classes. This book would interest teacher educators, teachers, and school administrators.
