Medicine is grounded in the natural sciences, among which biology stands out with regard to the understanding of human physiology and conditions that cause dysfunction. Ironically though, evolutionary biology

Read Book Grade 7 The Respiratory System And

Lungs Lesson 1
The
is a relatively
disregarded field. One
reason for this
omission is that
evolution is deemed a
slow process. Indeed,
macroanatomical
features of our species
have changed very
little in the last
300,000 years. A more
detailed look,
however, reveals that

Read Book Grade 7 The Respiratory System And

novel ecological contingencies, partly in relation to cultural evolution, have brought about subtle changes pertaining to metabolism and immunology, including adaptations to dietary innovations, as well as adaptations to the exposure to novel pathogens.

Read Book Grade 7 The Respiratory System And

Lungs Lesson 1

The evolution of cancer cells cause major problems for the immune system to find adequate responses. In addition, many adaptations to past ecologies have turned into risk factors for somatic disease and psychological
