Since 2010 the European Union has been plagued by crises of democracy and the rule of law, which have been spreading from Central and Eastern Europe (CEE), catching many by surprise. This book argues that the professed success of the 2004 big bang enlargement mirrored the Potemkin

villages erected in the new Member States on their accession to Europe. Slovenia is a prime example. Since its independence and throughout the accession process, Slovenia has been portrayed as the poster child of the 'New Europe'. This book claims that the widely shared narrative of the Slovenian EU dream is a myth. In many ways, Slovenia has fared even worse than its contemporary, constitutionally-backsliding, CEE counterparts. The book's discussion of the depth and breadth of the democratic crises in Slovenia should contribute to a critical intellectual awakening and better comprehension of the real causes of the present crises across the other CEE Member States, which threaten the viability of the EU

Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide

over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of "informational text" instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping "reform" of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and

arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as "an absolute game-changer in public education," yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation's

the scandal that shook Harvard. In 2012, Dr. Karen King, a star religion professor at Harvard, announced a breathtaking discovery just steps from the Vatican: she'd found an ancient scrap of papyrus in which Jesus calls Mary Magdalene "my wife." The mysterious manuscript, which King provocatively titled "The Gospel of Jesus's Wife," had the power to topple the Roman Catholic Church. It threatened not just the all-male priesthood, but centuries of sacred teachings on marriage, sex, and women's leadership, much of it premised on the hallowed tradition of a celibate Jesus. Award-winning journalist Ariel Sabar covered King's announcement in Rome but left with a question that no one seemed able to answer: Where in the world did

Sabar's dogged sleuthing led from the halls of Harvard Divinity School to the former headquarters of the East German Stasi before landing on the trail of a Florida man with an unbelievable past. Could a motorcycle-riding pornographer with a fake Egyptology degree and a prophetess wife have set in motion one of the greatest hoaxes of the century? A propulsive tale laced with twists and trapdoors, *Veritas* is an exhilarating, globe-straddling detective story about an Ivy League historian and a college dropout--and how they worked together to pass off an audacious forgery as a long-lost piece of the Bible.

Most of these appointments was a "first" in terms of the gender of the chief justice. At the same time, women are being appointed in record numbers as magistrates, judges and justices across the continent. While women's increasing numbers and roles in African executives and legislatures have been addressed in a burgeoning scholarly literature, very little work has focused on women in judiciaries. This book addresses the important issue of

the increasing numbers and varied roles of women judges and justices, as judiciaries evolve across the continent. Scholars of law, gender politics and African politics provide overviews of recent developments in gender and the judiciary in nine African countries that represent north, east, southern and west Africa as well as a range of colonial experiences, postcolonial trajectories and legal systems, including mixes of common, civil, customary, or sharia law. In the process, each chapter seeks to address the following questions: What has been the historical experience of the judicial system in a given country, from before colonialism until the present? What is the current court structure and where are the women judges,

Timely and relevant in this era in which governmental accountability and transparency are essential to the consolidation of democracy in Africa and when women are accessing significant leadership positions across the continent, this book considers the substantive and symbolic representation of women's

And in light of the recent decision to make all subjects at GCSE linear, so that students will be tested in one-off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, Exam Literacy provides teachers with user-friendly advice on how they can make the content they cover stick, and shares up-to-date,

However, beginning in the 1990s, this plan was gradually dismantled. Today, the level of resegregation in Charlotte has almost returned to what it was prior to 1971. pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others?
