Designed to meet the needs of wide-ability classes, the Camarades French course is divided into four units and fulfils the criteria of the National Curriculum/5-14 Guidelines, fully preparing all pupils for GCSE/Standard Grade examinations. The Teacher's Book contains an overview of each unit; offers clear, concise teaching notes; provides notes for the four assessment sections and the answers to all Pupil's Book exercises; and comprises tapescripts in sequence that are highlighted for ease of reference. The book has been revised for the National Curriculum 2000.

The seven essays gathered in this volume are all concerned, more or less directly, with the "unspeakable sentences" of fictional narration, that is, the sentences that do not bear any explicit mark nor any implicit indication of a first person and which are not interpretable as the expression of a speaker's subjectivity. Chief among them are the sentences of free indirect style, which this book prefers to call sentences of "represented speech and thought." All of these essays were written after the publication of *Unspeakable Sentences: Narration and Representation in the Language of Fiction* (1982). They take up its theoretical frameworks and extend its analyses into other contexts, where they acquire other uses, other functions, and other values. Taken as a whole, this work bears witness to the richness and vitality of the encounter between linguistics, philosophy, and the theory and analysis of narrative and the novel.

Thinking English Grammar. To Honour Xavier Dekeyser, Professor Emeritus contains papers by 34 colleagues of professor Dekeyser on subjects that have interested him throughout his career. His research has mainly been devoted to the history of English, and it is only natural that the first and longest section should consist of 11 papers on variation in English, both diachronic and synchronic. The second, barely shorter with its 9 papers, is devoted to the description of various aspects of modern English; some of these papers shade off into theoretical linguistics. Professor Dekeyser having obtained his Ph.D. on grammaticography, there is a third section on "Grammar from the Past", with 5 papers. The final section, 9 papers on "Language Teaching and Contrast", honours the eminent teacher of literally thousands of budding anglicists.

It's true that some people spend years studying French before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules of French,

#LanguageHacking shows you how to learn and speak French through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks -shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only "other people" can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in French from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with traditional methods. It focuses on the conversations that learners need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately, not after years of study. Each of the 10 units culminates with a speaking 'mission' that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community, you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.

This collection of articles is an important milestone in the history of the study of time conceptions in Greek and Roman Antiquity. It spans from Homer to Neoplatonism. Conceptions of time are considered from different points of view and sources. Reflections on time were both central and various throughout the history of ancient philosophy. Time was a topic, but also material for poets, historians and doctors. Importantly, the contributions also explore implicit conceptions and how language influences our thought categories.

This book provides a jargon-free guide to the forms and structures of French as it is spoken and written in France. It represents a combination of reference grammar and a manual of current usage.

Functional Grammar (FG) as set out by Simon Dik is the ambitious combination of a functionalist approach to the study of language with a consistent formalization of the underlying structures which it recognizes as relevant. The present volume represents the attempts made within the FG framework to expand the theory so as to cover a wider empirical domain than is usual for highly formalized linguistic theories, namely that of written and spoken discourse, while retaining its methodological precision. The book covers an array of phenomena, both from monologue and from dialogue material, relating to discourse structure, speaker aims and goals, action theory, the flow of information, illocutionary force, modality, etc. The central question underlying most of the contributions concerns the relation between, and the division of labour between the existing grammatical module of FG on the one hand, and a discourse or pragmatic module capable of handling such discourse phenomena on the other. What emerges are new proposals for the formal treatment of for instance illocutionary force and the informational status of constituents. Many of the data discussed are from 'real' language rather than being invented, and samples from various languages other than English (Spanish, Polish, Latin, French) are examined and used as illustrations of the theoretical problem to be solved.

French for Success is conceived to facilitate the mastery of the French grammar rules. Conjugation of verbs, which used to be a hard nut to crack, can now be mastered in a day or two. Verbs are placed into categories, rather than groups, according to their patterns of conjugation. A category, therefore, is a group of verbs that share similar patterns of conjugation in all tenses. In a given category or group, the radical is used only once, instead of six, to facilitate memorization. And in any given group, what applies to one verb in a given tense applies to every single verb. Although there are over four thousand verbs in category 1A, it takes only a few minutes to master their conjugations. This is because conjugation is merely a substitution of radicals. Corresponding verb endings do not change. Even some irregular verbs share this concept of common-radical conjugation. They include those ones that have two stems or radicals. The conjugation shortcuts exposed in these manuals will help minimize spelling errors. But the curious might wonder why we prefer categories to groups. The reason is simple. Currently, there are three main groups—first, second, and third groups. However, within each group, there are multiple subgroups, which do not necessarily share the same patterns of conjugation at all. In the first group alone, there are seventeen subgroups. We reduce those seventeen groups to eight; group B comprises verbs ending in *ir*, such as *finir* and *agir*. But there are countless other verbs in *ir* that do not share the same conjugations as *finir* and *agir*. *Partir*, *sortir*, and *mentir* share a pattern of conjugation that is different from *finir* and *agir*. *Courir* and its compound verbs have a totally different pattern of conjugation. So do many other groups of verbs ending in *ir*. In the same vein, group 3 contains, among other groups of verbs, *attendre*, *prendre*, *coudre*, *moudre*, etc., with each group having a conjugation pattern entirely different from the others, although they all end in *re*. Therefore, our definition of category is a group of verbs that have mutually substitutable radicals and mutually interchangeable endings in a given tense. *Aim-*, *parl-*, *cout-*, and *donn-* can replace one another, but they cannot replace *cd-*, *accd-*, etc., although these verbs are said to belong the premier group and end in *er*. Themes are selected to facilitate visual identification. Thus, adjectives of the same form are grouped together both according to the gender and number. It becomes easier to distinguish masculine from feminine or the singular form from the plural. The manuals are divided into four books for the progressive acquisition of the rules of French grammar. Comparative forms are continued in book 3. Also treated in this volume are present and past perfect tenses, direct and indirect objects, negation, and interrogative mood. Students learn to form nouns from verbs, and

the contexts in which those nouns are used. Finally, indirect speech, synonyms, antonyms, suffixes, and prefixes are examined.
