Doris Penka delivers a unified analysis of the semantics and syntax of negative indefinites - as in the expressions nobody, nothing, never and nowhere - and their counterparts in other languages. Contrary to standard assumptions, the author argues that these expressions are not inherently negative and are only licensed by a covert negation.

A collection of historical essays about the Afrikaners in Namibia. Turn any student into a bookworm with a few easy and practical strategies Donalyn Miller says she has yet to meet a child she can't turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year. Miller's unconventional approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they pick out themselves. Her love of books and teaching is both infectious and inspiring. In the book, you'll find: Hands-on strategies for managing and improving your own school library Tactics for helping students walk on their own two feet and continue the reading habit after they've finished with your class Data from student surveys and end-of-year feedback that proves how well the Miller Method works The Book Whisperer includes a dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read.

Chris van der Merwe vertel in hierdie boek die verhaal van sy eie omgang met die letterkunde ? ?n persoonlike verhaal, maar ook ?n stimulus vir lesers en navorsers wat belangstel in verbande tussen letterkunde en lewe. resensies, ander as essays. Die resensies en essays is meer informeel in toon en bevat minder verwysings en bibliografiese besonderhede as die akademiese artikels. ?n Paar opstelle is in Engels ? getuienis van die skrywer se verlange om die boeiende veld van die Afrikaanse letterkunde te deel met mense wat Afrikaans nie magtig is nie of nie genoegsaam van Afrikaans notisie neem nie.

A New Laager for a New South Africa

Woordeboek van die Afrikaanse taal

**For the first time, the 92-metre frieze of the Voortrekker Monument in Pretoria, one of the largest historical narratives in marble, has been made the subject of a book. The pictorial narrative of the Boer pioneers who conquered South Africa's interior during the 'Great Trek' (1835-52) represents a crucial period of South Africa's past. Conceptualising the frieze both reflected on and contributed to the country's socio-political debates in the 1930s and 1940s when it was made. The book**

considers the active role the Monument played in the rise of Afrikaner nationalism and the development of apartheid, as well as its place in post-apartheid heritage. The frieze is unique in that it provides rare evidence of the complex processes followed in creating a major monument. Based on unpublished documents, drawings and models, these processes are unfolded step by step, from the earliest discussions of the purpose and content of the frieze, through all the stages of its design, to its shipping to post-war Italy to be copied into marble from Monte Altissimo, up to its final installation in the Monument. The book examines how visual representation transforms historical memory in what it chooses to recount, and the forms in which it is depicted. The second volume expands on the first, by investigating each of the twenty-seven scenes of the frieze in depth, providing new insights into not only the frieze, but also South Africa's history. François van Schalkwyk of African Minds, co-publisher with De Gruyter writes: *From Memory to Marble* is an open access monograph in the true sense of the word. Both volumes of the digital version of the book are available in full and free of charge from the date of publication. This approach to publishing

democratises access to the latest scholarly publications across the globe. At the same time, a book such as *From Memory to Marble*, with its unique and exquisite photographs of the frieze as well as its wealth of reproduced archival materials, demands reception of a more traditional kind, that is, on the printed page. For this reason, the book is likewise available in print as two separate volumes. The printed and digital books should not be seen as separate incarnations; each brings its own advantages, working together to extend the reach and utility of *From Memory to Marble* to a range of interested readers. *Study & Master Life Skills* has been specially developed to support the Curriculum and Assessment Policy Statement (CAPS). The innovative Teacher's Guide with CD-ROM includes: \* a detailed work schedule for the whole year \* step-by-step guidance on the teaching of each lesson and form of assessment, as well as Remedial and Extension activities for each Unit \* photocopiable record sheets and templates \* recordings to support the Performing Arts topic.

The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The score of Western music was writ large during the Renaissance. Secular music rivaled church music for prominence, harmonic lines intertwined and changed music forever with the emergence of polyphony, and, in general, musical composition was taken to new heights. The composers and musicians who provided the soundtrack to this remarkable period are the subject of this comprehensive volume, which also takes an in-depth look at instruments of the day.

imaginary.

In September of 1893, Norwegian zoologist Fridtjof Nansen and a crew manned the schooner Fram, intending to drift, frozen in the Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and his companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go "farthest north." They survived a winter in a moss hut eating walrus and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration.
