to open the minds of children everywhere.

People's experiences of racial inequality in adulthood are well documented, but less attention is given to the racial inequalities that children and adolescents face. Growing Up in America provides a rich, first-hand account of the different social worlds that teens of diverse racial and ethnic backgrounds experience. In their own words, these American teens describe, conflicts with parents, pressures from other teens, school experiences, and religious beliefs that drive their various understandings of the world. As the book reveals, teens' unequal experiences have a significant impact on their adult lives and their potential for social mobility.

Directly confronting the constellation of advantages and disadvantages white, black, Hispanic, and Asian teens face today, this work provides a framework for understanding the relationship between socialization in adolescence and social inequality in adulthood. By uncovering the role racial and ethnic differences play early on, we can better understand the sources of inequality in American life.

In becoming adults, most people leave behind many of the best characteristics of their childhood, including hope, wonder, dreams, freedom, and play. This loss by relegation leaves us pursuing, but rarely acquiring, the happiness of childhood.

"Up, Not Out" is the adult journey to reclaim the characteristics of childhood and the full life they provide. Along the way, we will receive the vision and tools necessary to make the most of our moments and seize the days we have to

influence the next generation, a generation we can guard as they grow "Up, Not Out."

Adults often believe that children are quick to overcome and forget loss, but there is evidence that children are affected by the memory and impact of loss throughout their lives, and especially during the years that they grow-up. In this sympathetic book, Tamar Granot explains the immediate and long-term effects of loss on children and adolescents. She describes how loss is experienced at different ages, explains the significant consequences it can have at each stage of the children's development and the effects it might have on the development of their personality. The author describes how the circumstances of the loss and its aftermath and the behavior of parents and other significant caregivers influence the child's reaction. She explores the special effects of different kinds of loss, including the suicide of a parent or sibling, murder, the loss of a parent through death and parental abandonment due to divorce, disease, substance abuse, etc. Tamar Granot emphasizes how important it is to stay attuned to the special needs of these children along their growing years and provides practical and sensitive explanations and advice on how best to support them. Adults who experienced loss in childhood will find the book insightful to retrospective understanding of the effects of the loss on their growth and adult life, especially on their emotional state and their functioning in intimate relationships and as parents. Drawing on theories of loss and child development in an accessible way, Without You provides valuable guidance for parents and carers of bereaved children, as well as for the

When D. H. Lawrence wrote his classic study of American literature, he claimed that youth was the "true myth" of America. Beginning from this assertion, Emily A. Murphy traces the ways that youth began to embody national hopes and fears at a time when the United States was transitioning to a new position of world power. In the aftermath of World War II, persistent calls for the nation to "grow up" and move beyond innocence became common, and the child that had long served as a symbol of the nation was suddenly discarded in favor of a rebellious adolescent. This era marked the beginning of a crisis of identity, where literary critics and writers both sought to redefine U.S. national identity in light of the nation's new global position. The figure of the adolescent is central to an understanding of U.S.

national identity, both past and present, and of the cultural forms (e.g., literature) that participate in the ongoing process of representing the diverse experiences of Americans. In tracing the evolution of this youthful figure, Murphy revisits classics of American literature, including J. D. Salinger's *The Catcher in the Rye* and Vladimir Nabokov's *Lolita*, alongside contemporary bestsellers. The influence of the adolescent on some of America's greatest writers demonstrates the endurance of the myth that Lawrence first identified in 1923 and signals a powerful link between youth and one of the most persistent questions for the nation: What does it mean to be an American?

Thanks to Facebook and Instagram, our younger selves have been captured and preserved online. But what happens, Kate Eichhorn asks, when we can't leave our most embarrassing moments behind? Rather than a childhood cut short by a loss of innocence, the real crisis of the digital age may be the specter of a childhood that can never be forgotten.

"To be devoured in one non-stop gulp...fascinating reading."—The New York Post From 1919 to 1986, Grossinger's Catskill Resort Hotel provided a summer retreat from the city heat for New York's Jews, and entertained the great, the near-great, and the not so great, Jews and Gentiles alike. A melting pot of the Borscht Belt, sports, and show-biz worlds, loyal visitors included Red Buttons, Rocky Marciano, Eddie Fisher, and Jackie Robinson. Tania Grossinger grew up there. In her fascinating insider's account of life in the hospitality industry, she sheds light on how hotel children keep up with the frenetic pace of life, and how they come to grips with the outside world (which intrudes now and again), sex (happening in every room), and, occasionally, their intellectual interests. Growing Up at Grossinger's is both a wonderful coming-of-age story and a sentimental reading of a chapter of the Jewish experience in America that has now closed. 25 b/w photographs. It doesn't have to be a celebrity, it doesn't have to be a big-name athlete: some of the most important and exciting people a kid can meet live right nearby, in his or her own hometown! These are the folks who quietly help keep us safe, grow our food, and motivate us with their success. And this engaging book explains who these world-changers are, what they do, why they're important, and how to make contact. Using a fun and appealing notebook-style format filled with lighthearted illustrations, it identifies individuals who might be cool to meet—from farmers and travelers to local entrepreneurs, politicians, and artists. Plus, it gives inquisitive strategies, interview questions, and research ideas, along with plenty of interesting tidbits, great quotes, intriguing profiles, blogs to check out, and Q&As. Every child will find something life-changing in these pages as they explore the lives of animal rescuers, scientists, writers, crafters, chefs, engineers, and so many more. They'll even learn about the teens and tweens who take an active role in making their communities better places—like Maya Shea Penn, a thirteen-year-old entrepreneur, philanthropist, designer, artist, animator, illustrator, and writer who started her own company when she was only eight! Who knows where it will inspire a kid to go?

LGBTQ kids reveal what it’s like to be young and queer today Growing Up Queer explores the changing ways that young people are now becoming LGBT-identified in the US. Through interviews and three years of ethnographic research at an LGBTQ youth drop-in center, Mary Robertson focuses on the voices and stories of youths themselves in order to show how young people understand their sexual and gender identities, their interest in queer media, and the role that family plays in their lives. The young people who participated in this research are among the first generation to

embrace queer identities as children and adolescents. This groundbreaking and timely consideration of queer identity demonstrates how sexual and gender identities are formed through complicated, ambivalent processes as opposed to being natural characteristics that one is born with. In addition to showing how youth understand their identities, Growing Up Queer describes how young people navigate queerness within a culture where being gay is the “new normal.” Using Sara Ahmed’s concept of queer orientation, Robertson argues that being queer is not just about one’s sexual and/or gender identity, but is understood through intersecting identities including race, class, ability, and more. By showing how society accepts some kinds of LGBTQ-identified people while rejecting others, Growing Up Queer provides evidence of queerness as a site of social inequality. The book moves beyond an oversimplified examination of teenage sexuality and shows, through the voices of young people themselves, the exciting yet complicated terrain of queer adolescence.

In this compelling study of the children of serial migrants, Danau Tanu argues that the international schools they attend promote an ideology of being “international” that is Eurocentric. Despite the cosmopolitan rhetoric, hierarchies of race, culture and class shape popularity, friendships and romance on campus. By going back to high school for a year, Tanu befriended transnational youth, often called “Third Culture Kids”, to present their struggles with identity, belonging and internalized racism in their own words. The result is the first engaging, anthropological critique of the way Western-style cosmopolitanism is institutionalized as cultural capital to reproduce global socio-cultural inequalities.

Should teenagers have jobs while they're in high school? Doesn't working distract from schoolwork, cause long-term problem behaviors, and precipitate a precocious transition to adulthood? This report from a remarkable longitudinal study of 1,000 students, followed from the beginning of high school through their mid-twenties resoundingly, no. Examining a broad range of teenagers, Jeylan Mortimer concludes high school students who work even as much as half-time are in fact better off in many ways than students who don't have jobs at all. Having part-time jobs can increase confidence and time management skills, promote vocational exploration, and enhance subsequent academic success. The wider social circle of adults they meet through jobs can also buffer strains at home, and some of what young people learn on the job--at least responsibility and confidence--gives them an advantage in later work life.

Joe Biden's younger sister, trusted confidante and lifelong campaign manager. Valerie is one of the first female campaign managers in United States history, writes of the family, faith, and fate in shaping her life, and the power of empathy and kindness in the face of turmoil and division. *Growing Up Biden* details Valerie's decades-long professional career in politics, and the central role she played in her brother's life as an insightful adviser, an ever-loyal advocate and best friend. This memoir, full of candor and warmth, brings readers into the Biden home and shares stories from growing up in Delaware as the only daughter of the close-knit Irish Catholic family. Valerie writes in a compelling, relatable way about the challenges she faced breaking through gender barriers, the elusive nature of confidence, and navigating professional responsibilities while raising children.

If you are serious about being a disciple of Jesus Christ—really, truly serious—a discipleship group can help you achieve that goal. Jesus established this model for forming and leading the first discipleship group—and it worked. The men who emerged from that group took the gospel to the world and ultimately laid down their lives for Christ. Discipleship groups can create an atmosphere for fellowship, encouragement, and accountability—building an environment where God can work. In *Growing Up to Be a Disciple Who Makes Disciples*, Robby Gallaty presents a practical, easy-to-implement system for growing in one's faith. This guide offers a manual for making

Growing Up provides you with an interactive manual and resource for creating a working with discipleship groups, allowing you to gain positive information both yourself and for others as you learn how to help others become better disciples of Christ.

Follow seventy-six children from birth to thirty to learn about their various developmental life paths and their influences. Children traverse continuous or discontinuous courses. This book describes their life stories, which may transform and enrich the reader's life. In working with these people, the authors heard something new about the stories people tell about themselves. While a life may fall into a group - share characteristics with others - the individual's story remains compelling: to group to some degree against psychoanalysis, a humanizing discipline. The authors allow subjects to speak at length in their own voices, to bring themselves alive for the is the authors hope that they have been able to convey their awe about watching worlds of children and that these stories may evolve in readers minds and hearts be remembered.

As we approach the twenty-first century, biracialism and biculturalism are becoming increasingly common. Skin color and place of birth are no longer reliable signifiers of one's identity or origin. Simple questions like What are you? and Where are you from? aren't answered--they are discussed. How do you measure someone's race or culture? Half this, quarter that, born here, raised there. What name do you give that? These eighteen essays, joined by a shared sense of duality, address both the difficulties of not fitting into and the benefits of being part of two worlds. Danzy Senna parodies the media's fascination with biracials in a futuristic piece about the mulatto millennium. Garrett Hongo writes about watching his mixed-race children play in a sea of blond hair and white faces, realizing that suburban Oregon might swallow up their unique racial identity. Francisco Goldman shares his frustration with having constantly to explain himself in terms of his Latino and Jewish roots. Malcolm Gladwell understands that being

biracial frees him from racial discrimination but also holds him hostage to questions of racial difference. For Indira Ganesan, India and its memory are evoked by the aromas of foods. Through the lens of personal experience, these essays offer a broader spectrum of meaning for race and culture. And in the process, they map a new ethnic terrain that transcends racial and cultural division.

Ma Xiaodong recount their earlier lives in China from the 1950s to the 1980s, a particularly eventful period that included the catastrophic Cultural Revolution. Using their own stories as two case studies, they examine the making of a significant yet barely understood generation in recent Chinese history. They also reflect upon the mixed legacy of the early decades of the People's Republic of China (PRC). In doing so, the book strives for a balance between critical scrutiny of a complex era and the sweeping rejection of that era that recent victim literature embraces. Ultimately Ye and Ma intend to reconnect themselves to a piece of land and a period of history that have given them a sense of who they are. Their stories contain intertwining layers of personal, generational, and historical experiences. Unlike other memoirs that were written soon after the events of the Cultural Revolution, Ye and Ma's narratives have been put together some twenty years later, allowing for more critical distance. The passage of time has allowed them to consider important issues that other accounts omit, such as the impact of gender during this period of radical change in Chinese women's lives.

Growing Up America brings together new scholarship that considers the role of children and teenagers in shaping American political life during the decades following the Second World War. Growing Up America places young people--and their representations--at the center of key political trends, illuminating the dynamic and complex roles played by youth in the midcentury rights revolutions, in constructing and challenging cultural norms, and in navigating the vicissitudes of American foreign policy and diplomatic relations. The authors featured here reveal how young

people have served as both political actors and subjects from the early Cold War through the late twentieth-century Age of Fracture. At the same time, *Growing Up America* contends that the politics of childhood and youth extends far beyond organized activism and the ballot box. By unveiling how science fairs, breakfast nooks, Boy Scout meetings, home economics classrooms, and correspondence functioned as political spaces, this anthology encourages a reassessment of the scope and nature of modern politics itself.

Most resources available for parents come from psychologists, educators, and doctors, offering parents a narrow and technical approach to autism. Sincerely, Your Autistic Child represents an authentic resource for parents written by autistic people themselves. From childhood and education to culture, gender identity, and sexuality, this anthology tackles the everyday joys and challenges of growing up while honestly addressing the emotional needs, sensitivity, and vibrancy of autistic kids, youth, and young adults. Contributors reflect on what they have learned while growing up on the autism spectrum and how parents can avoid common mistakes and overcome challenges while raising their child. Part memoir, part guide, and part love letter, Sincerely, Your Autistic Child is an indispensable collection that invites parents and allies into the unique and often unheard experiences of autistic children and teens.

Society for the Study of Social Problems Riveting stories of how affluent, white children learn about race American kids are living in a world of ongoing public debates about race, daily displays of racial injustice, and for some, an increased awareness surrounding diversity and inclusion. In this heated context, sociologist Margaret A. Hagerman zeroes in on affluent, white kids to observe how they make sense of privilege, unequal educational opportunities, and police violence. In fascinating detail, Hagerman considers the role that they and their families play in the reproduction of racism and racial inequality in America. *White Kids*, based on two years of research involving in-depth interviews with white kids and their families, is a clear-eyed and sometimes shocking account of how white kids learn about race. In doing so, this book explores questions such as, “ How do white kids learn about race when they grow up in families that do not talk openly about race or acknowledge its impact? ” and “ What about children growing up in families with parents who consider themselves to be ‘ anti-racist ’ ? ” Featuring the actual voices of young, affluent white kids and what they think about race, racism, inequality, and privilege, *White Kids* illuminates how white racial socialization is much more dynamic, complex, and varied than previously recognized. It is a process that stretches beyond white parents ’ explicit conversations with their white children and includes not only the choices parents make about neighborhoods, schools, peer groups, extracurricular activities, and media, but also the choices made by the kids themselves. interviewing kids who are growing up in different racial contexts—from racially segregated to meaningfully integrated and from politically progressive to conservative—this important book documents key differences in the outcomes of white racial socialization across families. And by observing families in their everyday lives, this book explores the extent to which white families, even those with anti-racist intentions, reproduce and reinforce the forms of inequality they say they reject. "According to UNICEF, growing up with domestic violence is one of the most pervasive human rights violations in the world, affecting more than a billion people. Yet, too few people are aware of the profound impact it can have. Invincible seeks to change this lack of awareness and understanding with a compelling look at this important issue, informing and inspiring anyone who grew up living with domestic violence--and those who love them, work with them, teach them, and mentor them. Through powerful first-person stories, including the author's own experiences, as well as insightful commentary based on the most recent social science and psychology research, Invincible not only offers a deeper understanding of the concerns and challenges of domestic violence, but also provides proven strategies everyone can use to reclaim their lives and futures"--
