In this intelligent, accessible work, acclaimed poet and meditation teacher Stephen Levine introduces readers to meditation. Filled with practical guidance and advice—as well as extensive personal recollections—A Gradual Awakening explains the value of meditation as a means of attaining awareness, and provides readers with extensive advice on how establish a practice. Drawing on his own personal experiences with and insights into vipassana meditation, Levine has crafted an inspiring book for anyone interested in deep personal growth.

A STANDALONE NOVEL IN THE NEW YORK TIMES BESTSELLING SERIES *She dressed professionally, wearing a plum-colored fuzzy v-neck sweater that contoured to the swell of a rack I remembered so well, legs encased in a slim pencil skirt that embellished those creamy hips I could imagine naked with a flicker of memory, lips painted fire-engine red and that maniac-inducing flites pin-up girl look that I'd dismissed as silly when the girls in college wore it - but that made her smoking hot.* Down, boy. God damn Charlotte, my ex-girlfriend, had to be here, of all places. At a bachelorette party where I was a stripper, dressed in a cop uniform with pants that suddenly got way too tight. And she had to be so fine. "Ooooh, honey, you're one big officer," said a sultry voice behind me as I watched Charlotte in the other room, chatting with the bride. A hand stroked my hip and hesitated before sliding a bit lower, filling a palm with my ass. "Arrest me, Officer. I've been a bad, bad girl." With one look at the source of the voice, my night went from Oh, man to Oh, no. That voice? That hand? That was my mother. ----- *Random Acts of Hope is the fourth book in the romantic comedy Random series, and features guitar player Liam McCarthy from the band, Random Acts of Crazy. Five years ago, Liam and his girlfriend, Charlotte Greyson, were deeply in love. When a betrayal evicerates them both, each clings to their separate truths as an anchor to navigate the perfect storm. But when the biggest ego in the band reconnects with the only woman who stole his heart, sparks fly in this sequel that asks whether you can believe in the impossible without sacrificing every ideal you hold - in order to find a love bigger than you ever imagined. Topics: contemporary romance, romantic comedy, new adult romance, rockstar romance, rock star romance, coming of age romance, erotic romance, seductive story, hot romance, women's fiction, women's romance, bbw romance, college romance, contemporary woman Julia Kent, julie kent romance*

Despite being an intimate part of our lives, most of us know almost nothing about the "computer on a chip". As a result, we are constantly making crucial business, political and personal decisions based on the future of the microprocessor, while intellectually standing in the dark. If we can understand how the microprocessor came into being, the state it is in today and where its future lies, we can learn a whole lot more about where we are now and where we are going. Now, for the very first time, Michael S. Malone tells the complete story of this amazing invention in his well-known and witty style. However, this is anything but an electronics textbook. Rather, it is a riveting and incisive adventure story about extraordinary people and the legendary companies they have built. It is a tale of huge success and devastating failure, steadfast partnerships and bitter rivalries - plus a liberal sprinkling of greed and wealth. Malone closes with a tantalising look into the future: emerging technologies, new software, and even speculation about what might lie beyond the microprocessor era.

Vampires, werewolves, witches, shapeshifters -- they live among us without our knowledge. Night World is their secret society, a secret society with very strict rules. And falling in love breaks all the laws of the Night World. Sarah Strange's life was what you might call ordinary. Then her mother died. Now Sarah has visions -- visions of a place where dragons darken the sky and a young girl is fighting to survive. When Sarah confides in her best friends, Mal and Kieran, about the devastation in her dreams, she discovers that her friends are not what they seem. They are part of the Night World -- and they believe Sarah has a special role in their world. And if Sarah's visions are any indication of the impending danger and destruction, there is no time to lose....

The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

Ballads. Or can we say them poems? They acquaint the audience with the emotions and thoughts and bring out the emotions of the audience from deep of the heart. This book also does the same. It contains ballads that emphasize the different aspects, emotions, and life events of the balladist. From love to lust to philosophy, this book is the perfect concoction of different emotions. It's sure that the readers will drift into a different macrocosm while reading this book.

What Makes a New Product a Winner? : an Empirical Study of Successful Versus Unsuccessful Industrial Product Innovation

A Gradual Awakening

Desert Views & Flower Hues

The PDMA Handbook of New Product Development

This book presents a vivid description of the solutions that researchers have discovered for ethical dilemmas that pose themselves at studying disadvantaged, vulnerable and victimized populations. Ethical codes prescribe that the scholar should in all circumstances avoid potential harm, that informed consent is necessary and that the limits of confidentiality should always be respected. However, in the practice of research among women involved in prostitution, illegal immigrant workers, enslaved children, people who sell their organs and all the traffickers thereof, the ethical rules cannot always be followed. This book shows that there is a surprising variety of arguable possibilities in dealing with ethical dilemmas in the field. Authors reflect on concrete experiences from their own fieldwork in a wide variety of settings such as the USA, Singapore, Kosovo and The Netherlands. Some choose to work on the basis of conscientious partiality, others negotiate the rules with their informants and still others purposely break the rules in order to disclose and damage the exploiters. Researchers may find themselves in a vulnerable position. Their experiences, as presented in this volume, will help field workers, university administrators, representatives of vulnerable groups, philosophers of ethics and most of all students to go into the field well-prepared. This is a book that every researcher planning to do fieldwork in the difficult field of hidden, illicit and victimized people should read in advance. Dr. Frank Bovenkerk, Professor (Emeritus), Willem Pompe Institute for Criminal Law and Criminology, Universiteit Utrecht, The Netherlands This book allows a peek in the kitchen of empirical fieldwork, going into not only "best practices," but mistakes made, in a frank, courageous and honest way. Dr. Brenda C. Oude Breuil, Willem Pompe Institute for Criminal Law and Criminology, Universiteit Utrecht, The Netherlands

In the predawn hours of a gloomy February day in 1994, two thieves entered the National Gallery in Oslo and made off with one of the world's most famous paintings, Edvard Munch's Scream. It was a brazen crime committed while the whole world was watching the opening ceremonies of the Winter Olympics in Lillehammer. Baffled and humiliated, the Norwegian police turned to the one man they believed could help: a half English, half American undercover cop named Charley Hill, the world's greatest art detective. The Rescue Artist is a rollicking narrative that carries readers deep inside the art underworld -- and introduces them to a large and colorful cast of titled aristocrats, intrepid investigators, and thick-necked thugs. But most compelling of all is Charley Hill himself, a complicated mix of brilliance, foolhardiness, and charm whose hunt for a purloined treasure

would either cap an illustrious career or be the fiasco that would haunt him forever.

The Rescue Artist

People spend a fortune on their bodies, their faces, their hair, their clothes. Cosmetics, plastic surgery, diets, gym membership - everyone's trying to be more attractive. But there's an easier way to become a beautiful person. It doesn't have to be physical. No matter how you look, if you have a mind that's fascinating, creative, exciting - if you're a good thinker - you can be beautiful. And being attractive doesn't necessarily come from being intelligent or highly-educated. It isn't about having a great personality. It's about using your imagination and expanding your creativity. And it's when talking with people that we make the greatest impact. A person may be physically beautiful, but when speaking to others a dull or ugly or uncreative mind will definitely turn them off. In clear, practical language, de Bono shows how by applying lateral and parallel thinking skills to your conversation you can improve your mind. By learning how to listen, make a point, and manoeuvre a discussion, you can become creative and more appealing - more beautiful.

A lively examination of the spirit and practices that have made the indie movement into a powerful cultural phenomenon You know the look: skinny jeans, Chuck Taylors, perfectly smoothed bed-head hair. You know the music: Modest Mouse, the Shins, Pavement. You know the ethos: DIY with a big helping of irony. But what does it really mean to be "indie"? As popular television shows adopt indie soundtracks and the signature style bleeds into mainstream fashion, the quirky individuality of the movement seems to be losing ground. In Stanted and Enchanted, Kaya Oakes demonstrates how this phase is part of the natural cycle of a culture that reinvents itself continuously to preserve its core ideals of experimentation, freedom, and collaboration. Through interviews and profiles of the artists who have spearheaded the cause over the years—including Mike Watt, David Berma, Kathleen Hanna, and Dan Clowes—Oakes examines the collective creativity and cross-genre experimentation that are the hallmarks of this popular lifestyle trend. Her visits to music festivals, craft fairs, and smaller collectives around the country round out the story, providing a compelling portrayal of indie life on the ground. Culminating in the current indie milieu of music, crafting, style, art, comics, and zines, Oakes reveals from whence indie came and where it will go next.

Designing and Evaluating Usable Technology in Industrial Research

This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Claire-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research

Sketching User Experiences approaches design and design thinking as something distinct that needs to be better understood-by both designers and the people with whom they need to work- in order to achieve success with new products and systems. So while the focus is on design, the approach is holistic. Hence, the book speaks to designers, usability specialists, the HCI community, product managers, and business executives. There is an emphasis on balancing the back-end concern with usability and engineering excellence (getting the design right) with an up-front investment in sketching and ideation (getting the right design). Overall, the objective is to build the notion of informed design: molding emerging technology into a form that serves our society and reflects its values. Grounded in both practice and scientific research, Bill Buxton's engaging work aims to spark the imagination while encouraging the use of new techniques, breathing new life into user experience design. Covers sketching and early prototyping design methods suitable for dynamic product capabilities: cell phones that communicate with each other and other embedded systems, "smart" appliances, and things you only imagine in your dreams Thorough coverage of the design sketching method which helps easily build experience prototypes-without the effort of engineering prototypes which are difficult to abandon Reaches out to a range of designers, including user interface designers, industrial designers, software engineers, usability engineers, product managers, and others Full of case studies, examples, exercises, and projects, and access to video clips that demonstrate the principles and methods

2020 Weekly Planner For Positive People

A True Story of Art, Thieves, and the Hunt for a Missing Masterpiece

Yvonne Weaver created this coloring book to provide hours of enjoyment. Yvonne has chosen to make each page something children of all ages can color and enjoy with their family and friends. She has included desert scenes as well as reptiles and migratory birds who visit the wetland areas. The flowers are just for fun; she loves to color them herself. The desert comes alive in the spring with many beautiful colored wildflowers. The desert scenery changes colors as the sun rises and sets. Yvonne saw a need for a coloring book to encourage children to love our planet and care for our wildlife. She suggests, "Just have fun with it."
