Au Canada, la majorité (76 %) de la population vivra un événement traumatique au cours de sa vie. Même si la plupart des personnes arrivent à s'adapter à un tel événement, près de 10 % développeront un trouble de stress post-traumatique (TSPT). Ce nombre peut tripler, voire quadrupler dans les populations plus à risque, comme les militaires, les victimes d'agressions sexuelles et les individus gravement blessés. Outre le TSPT, plusieurs troubles peuvent apparaître à la suite d'un trauma, soit une humeur dépressive, de l'insomnie et des cauchemars, une consommation inappropriée d'alcool ou de drogue, pour ne nommer que ceux-ci. En somme, les cliniciens sont souvent démunis face à cette clientèle des plus complexes. Cet ouvrage est le premier en français à présenter les meilleures pratiques dans l'évaluation et le traitement du TSPT et des troubles connexes, dans un langage accessible aux cliniciens. Ancré rigoureusement à la fois dans la recherche scientifique et dans la pratique clinique, il se veut un exercice de transfert de connaissances de la recherche vers la clinique. Ainsi, il aidera les cliniciens à choisir le traitement le plus approprié pour leur patient et leur apportera les outils et les ressources nécessaires pour mettre les recommandations en pratique. Il pourra aussi être utilisé auprès des futurs intervenants afin de parfaire leur formation concernant l'évaluation et l'intervention auprès des victimes de trauma.

Global problems require global solutions. The United Nations as presently constituted, however, is incapable of addressing many global problems effectively. One nation- one vote decisionmaking in most UN agencies fails to reflect the distribution of power in the world at large, while the allocation of power in the Security Council is both unfair and anachronistic. Hence, nations are reluctant to endow the United Nations with the authority and the resources it needs. Extensive reform is essential. This analysis is rooted in the proposition that the design of decisionmaking systems greatly affects their legitimacy and effectiveness. Joseph Schwartzberg proposes numerous systemic improvements to the UN system, largely through weighted voting formulas that balance the needs of shareholders and stakeholders in diverse agencies. It indicates ways in which the interests of regions can supplement those of nations while voices of nongovernmental organizations and ordinary citizens can also be heard. In numerous contexts, it promotes meritocracy and gender equity. The book's aim is not to create an unrealistic utopia, but rather to establish a workable world in which the force of law supplants the law of force; a world committed to justice and continuous yet sustainable development. The author argues that, given the many existential threats now confronting our planet, the time frame for decisive action is short. The task is daunting and success is not guaranteed, but in view of the urgency of our situation, we can find ways of mustering the will, imagination, and resources to do the job.
