Cantonese is a language from southern China that is spoken by roughly 70 million people worldwide. It is the language of Hong Kong cinema and has traditionally been the most prominent language spoken in Chinatowns around the world. People choose to learn Cantonese for a variety of social and economic reasons: because it is a heritage language that one's relatives speak; because it is the language of one's partner and monolingual in-laws; because it is necessary for living and working in Hong Kong, Macau, Guangzhou, or other Cantonese-speaking

communities; because it is the bridge to fully appreciating and understanding Cantonese culture; or simply because it is an irresistible challenge. Whatever the motivation, more and more people are choosing to learn Cantonese as an additional language. This book discusses many issues related to both acquiring and teaching Cantonese. If you are a learner of Cantonese, this long overdue volume is essential to understanding both the grammatical and the social issues involved with learning this notoriously difficult language. If you are a teacher, this book will be invaluable to gaining insight into your students' motivations and needs. And finally, if you are an applied linguist, the unique aspects related to the acquisition of

Cantonese offer a fascinating contribution to the literature.

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages.

Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them!

Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference

between them. Here are some of the questions I have asked and have since been asked many times by students:

How do I learn characters efficiently?  
How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a

better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently
