The rationales and tactics invoked to achieve the After-body vary widely, from the patriotic to the market-based, and from talk therapy to feminist empowerment. The genre is unified by its contradictions: to uncover your “true self,” you must be reinvented; to be empowered, you must surrender to experts; to be special, you must look and act like everyone else.*

*Based on her analysis of more than 2,500 hours of makeover TV, Weber argues that the much-desired After-body speaks to and makes legible broader cultural narratives about selfhood, citizenship, celebrity, and Americanness. Although makeovers are directed at both male and female viewers, their gendered logic requires that feminized subjects submit to the controlling expertise wielded by authorities. The genre does not tolerate ambiguity. Conventional (middle-class, white, ethnically anonymous, heterosexual) femininity is the goal of makeovers for women. When subjects*

He proposes an integrated model of social evolution, one that accounts for the complexity, inconclusiveness, and impediments that characterize social transformations. This multi-dimensional approach recognizes that change is always saturated in conflict. Major changes are rarely initiated by conscious decisions that are automatically implemented; power and morality generally control the direction that significant alterations take. He also describes how an "inverse force rule" dictates that small societies are bound together by strong social forces, whereas large ones are secured by weak forces. This suggests that social roles are likely to become professionalized over time. If social change is, in fact, analogous to natural rather than artificial selection, we may be in the midst of an only partially predictable middle class revolution. Indeed, the current impasse between liberals and conservatives may be evidence that we are in the consolidation phase of this process.
