"Dental disease is the most widespread public health problem among the school-age population in the United States today," states the author of this first-of-its-kind book to combine dental health information and lesson plans for K-6 teachers, hygienists, and school nurses. Loaded with valuable information, the up-to-date workbook addresses the role of the dental health educator in getting children to learn how to properly take care of their teeth. Reader friendly, it offers simple ways to achieve excellence in oral hygiene beyond trips to the dentist, along with the rationale for proven modern techniques. Educators will welcome Lori Gagliardi's complete lesson plans, visual aids, supplemental material, and tips on integrating dental health into academic curricula. It is also an essential companion for any comprehensive dental disease prevention program in the community. Outstanding features:

- Engaging visual aids enhance the lesson plans.
- Background information and objectives accompany lesson plans.
- Guided practice activities reinforce the subjects covered.
- Includes a section targeting children with exceptional needs.
- Lesson plans, including time frames, focus on specific information.

New to the Third Edition:

- Improved organization.
- National Action Plan to Improve Health Literacy.
- USDA MyPlate healthy eating tool.
- Updated information regarding reading labels and serving sizes.
- New chapter, Community Education Program Development.
- Updated appendix material.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Business process modelling is referred to as a complex, time consuming, and error prone task. The correction and improvement of badly designed process models becomes increasingly expensive in the later phases of the process management life cycle. This thesis develops the principles of guided process modelling and provides a contribution towards simplifying process modelling activities. The general research question this thesis answers is what are the difficulties in the usage of process modelling tools and which methods, techniques, and tools can guide users in modelling processes to target the existing problems. The question is addressed by following a research methodology of design sciences. Amongst others, it includes a detailed analysis of the research problem, a definition of the objective, the design and development of solutions, and an evaluation of the developed concepts. In summary, the thesis presents innovative concepts to support modellers and provides a step towards end-user enablement in process modelling.
