*In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. **Communities in Action: Pathways to Health Equity** seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.*

Fully revised and updated, Tom de Waal's The Caucasus is an essential and authoritative introduction to this complex region. Armenia, Azerbaijan, Georgia, and the breakaway territories that have tried to split away from these states constitute one of the most diverse and challenging regions on earth, impressing the visitor with their multi-layered history, ethnic complexity, and seemingly intractable conflicts. Over the last few years, the South Caucasus region has captured international attention again because of its role in disputes between the West and Russia, its unsolved conflicts, and its role as an energy transport corridor to Europe. De Waal begins with a historical overview and then shifts his attention to the contemporary era, particularly the rolling conflicts over Nagorny Karabakh, South Ossetia, and Abkhazia. He also analyzes the energy politics of the region, the 2008 "Five-Day War" between Georgia and Russia, and recent political changes in all three countries. In addition, the book features brief snapshots of fascinating side topics such as Georgian wine, Baku jazz, and how the coast of Abkhazia came to be known as the "Soviet Florida." Concise, stimulating, and rich in detail, The Caucasus is the perfect guide to this fascinating and misunderstood region.

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

Thirty-six major contemporary writers examine life in a deeply divided America—including Anthony Doerr, Ann Patchett, Roxane Gay, Rebecca Solnit, Hector Tobar, Joyce Carol Oates, Edwidge Danticat, Richard Russo, Eula Bliss, Karen Russell, and many more America is broken. You don't need a fistful of statistics to know this. Visit any city, and evidence of our shattered social compact will present itself. From Appalachia to the Rust Belt and down to rural Texas, the gap between the wealthiest and the poorest stretches to unimaginable chasms. Whether the cause of this inequality is systemic injustice, the entrenchment of racism in our culture, the long war on drugs, or immigration policies, it endangers not only the American Dream but our very lives. In Tales of Two Americas, some of the literary world's most exciting writers look beyond numbers and wages to convey what it feels like to live in this divided nation. Their extraordinarily powerful stories, essays, and poems demonstrate how boundaries break down when experiences are shared, and that in sharing our stories we can help to alleviate a suffering that touches so many people.

What do traditional Indigenous institutions of governance offer to our understanding of the contemporary challenges faced by the Navajo Nation today and tomorrow? Guided by the Mountains looks at the tensions between Indigenous political philosophy and the challenges faced by Indigenous nations in building political institutions that address contemporary problems and enact "good governance." Specifically, it looks at Navajo, or Diné, political thought, focusing on traditional Diné institutions that offer "a new (old) understanding of contemporary governance challenges" facing the Navajo Nation. Arguing not only for the existence but also the persistence of traditional Navajo political thought and policy, Guided by the Mountains asserts that "traditional" Indigenous philosophy provides a model for creating effective governance institutions that address current issues faced by Indigenous nations. Incorporating both visual interpretations and narrative accounts of traditional and contemporary Diné institutions of government from Diné philosophers, the book is the first to represent Indigenous philosophy as the foundation behind traditional and contemporary governance. It also explains how Diné governance institutions operated during Pre-Contact and Post-Contact times. This path-breaking book stands as the first-time normative account of Diné philosophy.

Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Pakistan has exercised different forms of Political systems like Presidential, Parliamentary, Federation and One Unit. Local Bodies system has also been influenced by these experiences. It has been facing Political, non-political, dictators and bureaucratic influence. Pakistan has poor facts of democracy. It has been ruled by the military, while the Military governments always generated mistakes with the politicians. Pakistan 's capacity to protract the low cost conflict in Kashmir is beyond any doubt. Although the likely spillover effects of this on Pakistan 's polity are obvious, they will be, to a great degree, manageable. The Islamist organisations, in spite of their opposition to elements of the state and its armed forces, are in favour of maintaining the unity of the country that is, for them, " the fortress of Islam " and " the only Islamic nuclear power ". And though the US wants to tame the Pakistan army, and especially ISI its intelligence agency, it knows it will not benefit from the disintegration of the country. Nevertheless the pressures that imperialism and neoliberalism are putting on the country are creating a complex mesh of ethnic and nationalist tensions that could lead to a spiralling war. Only by fighting for a unified working class response to the pressures of globalisation and war can we hope to be able to offer an alternative.

City Psalms was Benjamin Zaphaniah's first collection from Bloodaxe back in 1992. It includes some of his best-known poems, including 'Die Poetry', 'Money' and 'Us and Dem'.

In this new edition of his classic 1970 memoir about the notorious U-2 incident, pilot Francis Gary Powers reveals the full story of what actually happened in the most sensational espionage case in Cold War history. After surviving the shoot-down of his reconnaissance plane and his capture on May 1, 1960, Powers endured sixty-one days of rigorous interrogation by the KGB, a public trial, a conviction for espionage, and the start of a ten-year sentence. After nearly two years, the U.S. government obtained his release from prison in a dramatic exchange for convicted Soviet spy Rudolph Abel. The narrative is a tremendously exciting suspense story about a man who was labeled a traitor by many of his countrymen but who emerged a Cold War hero.
