A Curriculum Vitae (CV), Latin for "the course of my life," is meant to be a detailed, yet succinct, description of your professional and academic achievements, qualifications, education, and experience. In short, it presents a summary of your knowledge, abilities, and competencies accomplished throughout your lifetime. And yes, it differs from a resume! Unlike a resume, the CV format can be (and often is) longer than just one or two pages. It may include information not usually found on resumes such as theses written, works published and research undertaken. CVs don't have to be flashy - nor should they be - but they should reflect an accurate and complementary account of the journey you've taken to arrive at a point where you feel you're a good candidate for the job to which you're applying. In this book, I am going to walk you through the entire process of creating a professional, well-organized, and impressive CV that will easily communicate your accomplishments and qualifications to your prospective employer. Let's get started!

A good research paper is more than just a clear, concise, scientific expose. It is a document that needs to go beyond the science to attract attention. There are both strict and less definable norms for doing this, but many authors are unaware as to what they are or their use. Publishing is rapidly changing, and needs to be explained with a fresh perspective. Simply writing good, clear, concise, science is no longer enough-there is a different mind-set now required that students need to adopt if they are to succeed. The purpose of this book is to provide the foundations of this new approach for both young scientists at the start of their careers, as well as for more experienced scientists to teach the younger generation. Most importantly, the book will make the reader think in a fresh, creative, and novel way about writing and publishing science. This is an introductory guide suitable for advanced undergraduates, graduate students, and professional researchers in both the life and physical sciences.
