The atomic arrangement and subsequent properties of a material are determined by the type and conditions of growth leading to epitaxy, making control of these conditions key to the fabrication of higher quality materials. Epitaxial Growth of Complex Metal Oxides reviews the techniques involved in such processes and highlights recent developments in fabrication quality which are facilitating advances in applications for electronic, magnetic and optical purposes. Part One reviews the key techniques involved in the epitaxial growth of complex metal oxides, including growth studies using reflection high-energy electron diffraction, pulsed laser deposition, hybrid molecular beam epitaxy, sputtering processes and chemical solution deposition techniques for the growth of oxide thin films. Part Two goes on to explore the effects of strain and stoichiometry on crystal structure and related properties, in thin film oxides. Finally, the book concludes by discussing selected examples of important applications of complex metal oxide thin films in Part Three. Provides valuable information on the improvements in epitaxial growth processes that have resulted in higher quality films of complex metal oxides and further advances in applications for electronic and optical purposes Examines the techniques used in epitaxial thin film growth Describes the epitaxial growth and functional properties of complex metal oxides and explores the effects of strain and defects Meet Gossie, a small yellow gosling who loves to wear bright red boots—every day. Excerpt from Our County and Its People: A Descriptive and Biographical Record of Genesee County, New York A word should be said with reference to that portion of this work devoted to personal sketches. It has not been attempted to go much further than to include the subscribers to the work and their kindred. To have attempted to include a sketch of every family in the county would have been out of the question, while any effort to discriminate by arbitrarily selecting from among living residents those who might be considered prominent would have been more impossible. The chapter referred to therefore is distinctly a subscribers' chapter. Those who are paying for this work are afforded an opportunity to preserve in permanent form a family sketch, with some detail as to ancestry. It is believed that upon reflection no subscriber can complain that a like opportunity has not been given to all others or that those who have prepared the work have not attempted the task of selecting from non subscribers those especially deserving of notice.
