documented the  
many ways in  
which a person's

IQ matters. But,  
research suggests  
that a nation's IQ  
matters so much  
more. As Garrett  
Jones argues in  
Hive Mind,  
modest  
differences in

national IQ can  
explain most cross-  
country

inequalities.

Whereas IQ

scores do a

moderately good

job of predicting

individual wages,

information

processing power,

and brain size, a

country's average score is a much stronger bellwether of its overall prosperity. Drawing on an expansive array of research from psychology, economics, management, and political science,

Jones argues that intelligence and cognitive skill are significantly more important on a national level than on an individual one because they have "positive spillovers." On average, people who do better on

standardized tests  
are more patient,  
more cooperative,  
and have better  
memories. As a  
result, these  
qualities—and  
others necessary  
to take on the  
complexity of a  
modern  
economy—become

more prevalent in  
a society as  
national test  
scores rise.

What's more,  
when we are  
surrounded by  
slightly more  
patient, informed,  
and cooperative  
neighbors we take  
on these qualities

a bit more  
ourselves. In  
other words, the  
worker bees in  
every nation  
create a "hive  
mind" with a  
power all its own.  
Once the hive is  
established, each  
individual has  
only a tiny impact

on his or her own  
life. Jones makes  
the case that,  
through better  
nutrition and  
schooling, we can  
raise IQ, thereby  
fostering higher  
savings rates,  
more productive  
teams, and more  
effective

bureaucracies.

After

demonstrating  
how test scores  
that matter little  
for individuals can  
mean a world of  
difference for  
nations, the book  
leaves readers  
with policy-  
oriented

conclusions and  
hopeful  
speculation:

Whether we lift  
up the bottom  
through changing  
the nature of  
work, institutional  
improvements, or  
freer immigration,  
it is possible that  
this period of

massive global  
inequality will be  
a short season by  
the standards of  
human history if  
we raise our  
global IQ.

When they took
