"Build a better brew by mastering 10 manual methods, from French Press to Chemex, with this comprehensive guide." —Imbibe Magazine Named a top food & drink book of 2017 by Food Network, Wired, Sprudge, and Booklist This comprehensive handbook is for the average coffee lover who wants to make better coffee at home. Unlike other coffee books, this one focuses exclusively on coffee—not espresso—and explores multiple pour-over, immersion, and cold-brew techniques of coffee. From a small but growing number of dedicated farmers, importers, roasters, and baristas, coffee quality is at an all-time high. But for nonprofessionals, achieving café quality at home can seem out of reach. With dozens of equipment options, coffee-making tips, and advice on how to use that equipment, and an industry language that, at times, doesn't seem made for the rest of us, it can be difficult to know where to begin. Craft Coffee: A Manual, written by a coffee enthusiast for coffee enthusiasts, provides all the information you need to discover what they like in a cup of specialty coffee—and how to replicate the perfect cup day after day. From the science of extraction and brewing techniques to choosing equipment and deciphering coffee bags, Craft Coffee focuses on coffee-making techniques that are accessible to everyone. Craft Coffee is accessible— that home coffee brewers negotiate and shows that no matter where you are in your coffee journey, you can make a great cup at home. “Engaging and fun . . . The National Jury Verdict Review and Analysis

***The current trend toward machine-scoring of student work, Ericsson and Haswell argue, has created an emerging issue with implications for higher education across the disciplines, but with particular importance for those in English departments and in administration. The academic community has been silent on the issue—some would say excluded from it—while the commercial entities who develop essay-scoring software have been very active. Machine Scoring of Student Essays is the first volume to seriously consider the educational mechanisms and consequences of this trend, and it offers important discussions from some of the leading scholars in writing assessment. Reading and evaluating student writing is a time-consuming process, yet it is a vital part of both student placement and coursework at post-secondary institutions. In recent years, commercial computer-evaluation programs have been developed to score student essays in both of these contexts. Two-year colleges have been especially drawn to these programs, but four-year institutions are moving to them as well, because of the cost-savings they promise. Unfortunately, to a large extent, the programs have been written, and institutions are installing them, without attention to their instructional validity or adequacy. Since the education software companies are moving so rapidly into what they perceive as a promising new market, a wider discussion of machine-scoring is vital if scholars hope to influence development and/or implementation of the programs being created. What is needed, then, is a critical resource to help teachers and administrators evaluate programs they might be considering, and to more fully envision the instructional consequences of adopting them. And this is the resource that Ericsson and Haswell are providing here.***

Yearning for a life of leisure? In 24 chapters representing each hour of a typical working day, this book will coax out the loafer in even the most diligent and schedule-obsessed worker. From the founding editor of the celebrated magazine about the freedom and fine art of doing nothing, The Idler, comes not simply a book, but an antidote to our work-obsessed culture. In How to Be Idle, Hodgkinson presents his learned yet whimsical argument for a new, universal standard of living: being happy doing nothing. He covers a whole spectrum of issues affecting the modern idler—sleep, work, pleasure, relationships—bemoaning the cultural skepticism of idleness while reflecting on the writing of such famous apologists for it as Oscar Wilde, Robert Louis Stevenson, Dr. Johnson, and Nietzsche—all of whom have admitted to doing their very best work in bed. It 's a well-known fact that Europeans spend fewer hours at work a week than Americans. So it 's only befitting that one of them—the very clever, extremely engaging, and quite hilarious Tom Hodgkinson—should have the wittiest and most useful insights into the fun and nature of being idle. Following on the quirky, call-to-arms heels of the bestselling Eat, Shoots and Leaves: The Zero Tolerance Approach to Punctuation by Lynne Truss, How to Be Idle rallies us to an equally just and no less worthy cause: reclaiming our right to be idle.
