On January 20, 1942, black oil mill worker Cleo Wright assaulted a white woman in her home and nearly killed the first police officer who tried to arrest him. An angry mob then hauled Wright out of jail and dragged him through the streets of Sikeston, Missouri, before burning him alive. Wright's death was, unfortunately, not unique in American history, but what his death meant in the larger context of life in the United States in the twentieth-century is an important and compelling story. After the lynching, the U.S. Justice Department was forced to become involved in civil rights concerns for the first time, provoking a national reaction to violence on the home front at a time when the country was battling for democracy in Europe. Dominic Capeci unravels the tragic story of Wright's life on several stages, showing how these acts of violence were indicative not only of racial tension but the clash of the traditional and the modern brought about by the war. Capeci draws from a wide range of archival sources and personal interviews with the participants and spectators to draw vivid portraits of Wright, his victims, law-enforcement officials, and members of the lynch mob. He places Wright in the larger context of southern racial violence and shows the significance of his death in local, state, and national history during the most important crisis of the twentieth-century.

In the 1930s, the Air Corps Tactical School at Maxwell Field, Alabama, was the nurturing ground for American air doctrine. Those who studied and taught there were the same individuals who prepared America for war, and then led its airmen into combat.

The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume, space, and form. Sacred architecture is far less determined than other building tasks by functional requirements, norms, and standards. As a rule, it is free to unfold as pure architecture. Thus in design terms this building task offers enormous freedoms to the architect. At the same time, however, the special atmospherics of sacred spaces call, on the part of the architect, for a highly sensitive treatment of religion and the relevant cultural and architectural traditions. In a systematic section, this volume introduces the design, technical, and planning fundamentals of building churches, synagogues, and mosques. In its project section, it also presents about seventy realized structures from the last three decades. Drawing upon his in-depth knowledge of the subject and his many years of publishing experience, the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces (e.g., the ground plan, the shapes of the spaces, the incidence of light, and materiality).

This is the first book to provide a comprehensive investigation of gender and the law in the United States. Deborah Rhode describes legal developments over the last two centuries against a background of historical and sociological changes in women's activities and attitudes toward these new developments. She shows the way cultural perceptions of gender influence and in turn are influenced by legal constructions, and what this complicated interaction implies about the possible change. Dodd, Bimonthly Review of Law Books Review of the history of law and gender...The book is important in a number of ways...[It] paints in stark, irrefutable colors the irrational prejudices that have served to justify legal determinations limiting equality...[I]t has the audacity to ask the law to turn on itself and work more justly. --Sheila James Kuehl, California Lawyer Reviews of this book: Encyclopedic. . Thorough, carefully nuanced ... [Rhode] gives all sides their fair due on every issue she takes up... A valuable resource for many years Inquiry Justice and Gender breaks the impasse created by legal and theoretical debates over 'sameness' and 'difference.' Deborah Rhode's brilliant analysis of gender and the law in the United States from the nineteenth century to the present argues persuasively for theories rooted in careful contextual analysis and for a legal emphasis on gender disadvantage rather than gender difference. This book offers a new vantage point from which to think about the role of law in building a better Minnesota
