Crime directed against business is a serious problem embracing theft of property, fraud, embezzlement, burglary, criminal damage, bribery and corruption, theft of corporate information, and other similar activities. Apart from having a disruptive effect on the running of a company, the results can be financially disastrous. Few businesses can afford to employ security specialists to manage these risks and most managers find it difficult to assess the threats and to select the appropriate countermeasures. The Handbook of Business Security, fully revised to include updated information on changing technology, addresses all of these aspects.
