*Moto-journalist Clement Salvadori has been riding motorcycles since the age of 15 and traveling all of his life, accumulating well over a million miles in the saddle across more than 70 countries on six continents. No Thru Road covers 30 different trips he has taken, to places like Afghanistan and Zimbabwe, since his first ride through western Europe in 1957. The stories are all original, though the subject may have appeared as a magazine article in a very different rendition. The book will appeal to adventure-travel enthusiasts and to motorcyclists and travelers of all persuasions. Adventurous riders will thoroughly appreciate the book, as in the description of kick-starting a 500cc single - never easy to do - at 17,200 feet in the Tibetan Himalayas. Or going up to Cape Tribulation in Australia's Queensland in 1974 when the only access was via a once-a-week ferry across the Daintree River. Or riding a bike to Pamplona, Spain, in 1960 in order to run with the bulls. Activists who want to get on their motorcycles and ride down into Mexico's Copper Canyon will enjoy the book, as will the arm-chair traveler who is happy reading about traveling from Peru's Great Ica Desert over the Andes Mountains to the Amazon basin. Clement's adventures are arranged so the reader can open the book to any chapter, be it India, Nepal, the Sahara, New Zealand or Viet Nam, and not have to worry about following a thread. Lots of adventures, lots of good reading, lots of photos and illustrations. This book promises excellent entertainment and a glimpse into life as a moto-journalist.*

The Harley-Davidson WLA and other American military motorcycles performed crucial roles during the Second World War in the U.S. armed forces and other Allied armies worldwide. *Liberator: The Harley-Davidson WLA in the Second World War* for the first time tells the full story of how the U.S. Army and Marine Corps and other Allied armed forces used the Harley-Davidson WLA and other American military motorcycles during the war. The book traces the development of the WLA in 1940-42 from the civilian Forty-Five models of 1929-39, describes the evolution of U.S. Army and Marine Corps usage of motorcycles through the motorcycle-borne mechanized cavalry experiments of 1940-41, and addresses wartime use of motorcycles in each major type of U.S. Army unit (mechanized cavalry, armored divisions, infantry divisions, airborne divisions, military police, etc.) and in Marine Divisions, with detailed tables of organization and equipment for each. Moreover, *Liberator: The Harley-Davidson WLA in the Second World War* describes the use of the WLA, Indians, and other Harley-Davidsons in each Allied army that used them. It especially emphasizes their use by the Soviet Union, which was the largest user of the WLA, receiving more through Lend-Lease than the number used by the U.S. armed services. These countries include:- Soviet Union- Canada- United Kingdom- Australia- New Zealand- South Africa- India- Poland - France - Brazil- Iran- Republic of China Although primarily focused on the Harley-Davidson WLA, the book also describes use of other Harley-Davidsons, Indians, and small motorcycles designed for airborne troops, in the U.S. armed services and other allied armies. These other models include:- Harley-Davidson WL- Harley-Davidson "Big Twins"- Indian 741, 640, 344, and 340- Cushman Model 53 scooter - Simplex Servicycle Unique human perspectives on the Harley-Davidson WLA and other American military motorcycles during the war come from the stories of several individual U.S. Army soldiers who fought on motorcycles, and the histories of a U.S. Army military police unit and a Red Army motorcycle

battalion. These stories, several of them previously unpublished, are reminders of the men who once rode these machines during the war. This book will be of interest to enthusiasts of Harley-Davidson, Indian, and military motorcycles, and to military historians and preservationists worldwide.

The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. *From NPR editor Krishnadev Calamur comes an engrossing murder mystery set in the heart of the new India. Mumbai, India: a city of beauty and squalor, old and new, wealth and poverty, honest work and deep corruption... and inevitable target of scandal and condemnation if Inspector Vijay Gaikwad doesn't solve the murder of American businesswoman Liz Barton, and quickly. Just as invested is newspaper reporter Jay Ganesh, looking for the one big story to repair his once-prestigious reputation. Both men soon discover, however, that the case is as difficult to navigate as Mumbai's infamous traffic. From her cheating husband to the billionaire industrialist with whom she was "close"; from her jealous colleague to the environmentalist protesting her company, Barton was not short on potential enemies... and nor are they short on lies. But the pressure is on for Gaikwad, the family man trying to do right on an often unscrupulous force, to place the blame on someone, anyone, and Jay is determined to be the first with the scoop--no matter how deadly.*

WINNER OF THE 2021 JOYCE CAROL OATES PRIZE NAMED A BEST BOOK OF 2020 BY O MAGAZINE, THE NEW YORKER, THE WASHINGTON POST, REAL SIMPLE, THE GUARDIAN, AND MORE FINALIST FOR: THE STORY PRIZE, THE L.A. Danielle Evans is widely acclaimed for her blisteringly smart voice and X-ray insights into complex human relationships. With *The Office of Historical Corrections*, Evans zooms in on particular moments and relationships in her characters' lives in a way that allows them to speak to larger issues of race, culture, and history. She introduces us to Black and multiracial characters who are experiencing the universal confusions of lust and love, and getting walloped by grief—all while exploring how history haunts us, personally and collectively. Ultimately, she provokes us to think about the truths of American history—about who gets to tell them, and the cost of setting the record straight. In "Boys Go to Jupiter," a white college student tries to reinvent herself after a photo of her in a Confederate-flag bikini goes viral. In "Richard of York Gave Battle in Vain," a photojournalist is forced to confront her own losses while attending an old friend's unexpectedly dramatic wedding. And in the eye-opening title novella, a black scholar from Washington, DC, is drawn into a complex historical mystery that spans generations and puts her job, her love life, and her oldest friendship at risk.

Don't consider yourself deviant? Well, that just may be a career breaker. Odds are the idea or product that will transform your business or industry tomorrow is out there right now, hiding in the shadows of the Fringe, raw, messy, untamed, and just waiting to be exploited. Trapping, taming, and marketing it is the key to burying your competition and staying ahead of your market. Deviance is nothing more than a marked separation from the norm and is the source of innovation, the kind of breakthrough thinking that creates new markets and tumbles traditional ones. Positive deviation is an inexhaustible font of new ideas, products, and services. It's the source of all creative thinking and dynamic new market development and ultimately the basis of

*all incremental profit. The Deviant's Advantage describes how deviance proceeds along a traceable trajectory from the Fringe, where it originates but has zero commercial potential; to the Edge, where word of mouth creates a limited audience; to the Realm of the Cool, where the buzz and market momentum really start to build; to the Next Big Thing, where demand is honed and intensifies; finally landing at Social Convention, the heart of the mass market. Ryan Mathews and Watts Wacker, two of America's most respected futurists, trace the "Path of the Devox" (the voice, spirit, or incarnation of deviant ideas, products, and individuals), using it as a way to explain how and why: \**

*Christian fundamentalism morphed from college Bible studies to Republican party king-making \* Reebok cares more about what's on the feet of kids in Detroit and Philadelphia than what the so-hip-it-hurts set is wearing in New York or on Rodeo Drive \* Napster exploded from an idea germinating inside a sixteen-year-old to a movement with 60 million subscribers that very nearly destroyed the music industry \* Hugh Hefner went from America's most public pornographer to a cultural icon with decidedly Puritan sensibilities Mathews and Wacker also look at what happens to formerly deviant products and ideas after they are replaced by the next wave from the Fringe—how they morph into Cliché (where their commercial potential may actually increase), become Icons or even Archetypes, or fade into Oblivion, and how you can profitably manage even a fading concept. Looking for the next big idea for your business? Then it's past time to quit staring at the Social Convention for inspiration and start scouring the Fringes of society. Tomorrow's breakthrough concept is lurking out there right now, in the mind of a deviant individual. Your choice is simple: find it and exploit it, or be buried by those who do. Mary Reed Newland wrote numerous beloved books for Catholic families, but *The Year and Our Children* is her undisputed masterpiece. Read it, cherish it, share it, put it into practice and give your kids the gift of a fully lived faith, every day and in every season.

In the twelfth Longmire novel, Walt, Henry, and Vic discover much more than they bargained for when they are called in to investigate a hit-and-run accident involving a young motorcyclist near Devils Tower—from the New York Times bestselling author of *Land of Wolves*. In the midst of the largest motorcycle rally in the world, a young biker is run off the road and ends up in critical condition. When Sheriff Walt Longmire and his good friend Henry Standing Bear are called to Hulett, Wyoming—the nearest town to America's first national monument, Devils Tower—to investigate, things start getting complicated. As competing biker gangs; the Bureau of Alcohol, Tobacco, and Firearms; a military-grade vehicle donated to the tiny local police force by a wealthy entrepreneur; and Lola, the real-life femme fatale and namesake for Henry's '59 Thunderbird (and, by extension, Walt's granddaughter) come into play, it rapidly becomes clear that there is more to get to the bottom of at this year's Sturgis Motorcycle Rally than a bike accident. After all, in the words of Arthur Conan Doyle, whose *Adventures of Sherlock Holmes the Bear* won't stop quoting, "There is nothing more deceptive than an obvious fact."

**Would life be better without alcohol? It's the nagging question more and more of us are finding harder to ignore, whether we have a "problem" with alcohol or not. After all, we yoga. We green juice. We meditate. We self-care. And yet, come the end of a long work day, the start of a weekend, an awkward social situation, we drink. One glass of wine turns into two turns into a bottle. In the face of how we care for ourselves otherwise, it's hard to avoid how alcohol really makes us feel... terrible. How different would our lives be if we stopped drinking on autopilot? If we stopped drinking altogether? Really different, it turns out. Really better. Frank, funny, and always judgment free, Sober Curious is a bold guide to choosing to live hangover-free, from Ruby Warrington, one of the leading voices of the new sobriety movement. Drawing on research, expert interviews, and personal narrative, Sober Curious is a radical take down of the myths that keep so many of us drinking. Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art

historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Over the past seventy years, a staggering array of new pigments and binders has been developed and used in the production of paint, and twentieth-century artists readily applied these materials to their canvases. Paints intended for houses, boats, cars, and other industrial applications frequently turn up in modern art collections, posing new challenges for paintings conservators. This volume presents the papers and posters from "Modern Paints Uncovered," a symposium organized by the Getty Conservation Institute, Tate, and the National Gallery of Art and held at Tate Modern, London, in May 2006. Professionals from around the world shared the results of research on paints that have been available to artists since 1930--the date that synthetic materials began to significantly impact the paint industry. Modern Paints Uncovered showcases the varied strands of cutting-edge research into the conservation of contemporary painted surfaces. These include paint properties and surface characteristics, analysis and identification, aging behavior, and safe and effective conservation techniques.

*The mind-bending miniature historical epic is Sjón's specialty, and Moonstone: The Boy Who Never Was is no exception. But it is also Sjón's most realistic, accessible, and heartfelt work yet. It is the story of a young man on the fringes of a society that is itself at the fringes of the world--at what seems like history's most tumultuous, perhaps ultimate moment. Máni Steinn is queer in a society in which the idea of homosexuality is beyond the furthest extreme. His city, Reykjavik in 1918, is homogeneous and isolated and seems entirely defenseless against*

*the Spanish flu, which has already torn through Europe, Asia, and North America and is now lapping up on Iceland's shores. And if the flu doesn't do it, there's always the threat that war will spread all the way north. And yet the outside world has also brought Icelanders cinema! And there's nothing like a dark, silent room with a film from Europe flickering on the screen to help you escape from the overwhelming threats--and adventures--of the night, to transport you, to make you feel like everything is going to be all right. For Máni Steinn, the question is whether, at Reykjavik's darkest hour, he should retreat all the way into this imaginary world, or if he should engage with the society that has so soundly rejected him.*
