*Provides information on stylistic aspects of research papers, theses, and dissertations, including sections on writing fundamentals, MLA documentation style, and copyright law. Organizations have developed a variety of strategies for dealing with the intersection of societal needs, the natural environment, and corresponding business imperatives. At one end of the continuum are organizations that do not acknowledge any responsibility to society and the environment. And on the other end of the continuum are those organizations that view their operations as having a significant impact as well as reliance on society at the economic, social, and ecological levels. This sourcebook presents current knowledge related to what has become known as "corporate social responsibility" (CSR). Ongoing research reveals that a variety of strategies, alliances and partnerships, and approaches are being used around the globe to respond to issues of CSR. The aspirations of many corporations to contribute to a better world is great, but translating that aspiration into reality remains a challenge for organizations the world over.*

Ivan Jablonka's *History Is a Contemporary Literature* offers highly innovative perspectives on the writing of history, relationship between literature and the social sciences, and the way that both social-scientific inquiry and literary explorations contribute to our understanding of the world. Jablonka argues that the act and art of writing, far from afterthought in the social sciences, should play a vital role in the production of knowledge in all stages of the research work and embody or even constitute the understanding obtained. History (along with sociology and anthropology) contends, achieve both greater rigor and wider audiences by creating a literary experience through a broad spectrum narrative modes. Challenging scholars to adopt investigative, testimonial, and other experimental writing techniques of creating and sharing knowledge, Jablonka envisions a social science literature that will inspire readers to become engaged in understanding their own pasts and to relate their histories to the present day. Lamenting the specialization has isolated the academy from the rest of society, *History Is a Contemporary Literature* aims to bring imagination and audacity into the practice of scholarship, drawing on the techniques of literature to strengthen the methods of the sciences.

Do your sentences sag? Could your paragraphs use a pick-me-up? If so, *The Writer's Diet* is for you! It's a short, sharp introduction to great writing that will help you energize your prose and boost your verbal fitness. Helen Sword dispels excessive explanations and overwrought analysis. Instead, she offers an easy-to-follow set of writing principles: use verbs whenever possible; favor concrete language over vague abstractions; avoid long strings of prepositional phrases; employ adjectives and adverbs only when they contribute something new to the meaning of a sentence; and reduce dependence on four pernicious "waste words": it, this, that, and there. Sword then shows the rules in action through examples from William Shakespeare, Emily Dickinson, Martin Luther King Jr., John McPhee, A. S. Byatt, Richard Dawkins, Alison Gopnik, and many more. A writing fitness test encourages you to assess your own writing and get immediate feedback on addressing problem areas. While *The Writer's Diet* is as sleek and concise as the writing ideals contained within, this volume packs a powerful punch. With Sword's coaching writers of all levels can strengthen and tone their sentences with the stroke of a pen or the click of a mouse. As with any fitness routine, adhering to the rules requires energy and vigilance, but the results, however, will speak for themselves.

In the Spring of 1996, hundreds of international leaders in business, law, government, and education gathered at Harvard University to discuss the growing and future impact of the Internet: one of the most potent technological innovations of this century. This volume, which includes the writings, discussion transcripts, and computer demonstrations from this ground-breaking forum, provides an expert assessment of the impact of this rapidly changing technology on business, government, media, and education for the next decade and into the new millennium. CEOs and leaders of Microsoft, Apple Computer, Sun Microsystems, and Digital Equipment Corporation join dozens of business leaders in providing both first-hand accounts of current revolutionary changes in the computer industry, as well as their attending influence on the future of the organization, its workers, its customer relations, and the creation and ownership of products themselves. While these pieces serve as an excellent source for understanding today's hottest Internet technologies, they also explore the important issues regarding precisely what is at stake for a society with greater and growing ties to cyberspace. Topics in this timely collection include privacy and security, property rights, censorship, telecommunications regulation, and the global impact of emerging Internet

technologies.

The Government recognises that many lifestyle-driven health problems are at alarming levels: obesity; high rates of sexually transmitted infections; a relatively large population of drug users; rising levels of harm from alcohol; 80,000 deaths a year from smoking; poor mental health; health inequalities between rich and poor. This white paper outlines the Government's proposals to protect the population from serious health threats; help people live longer, healthier and more fulfilling lives; and improve the health of the poorest. It aims to empower individuals to make healthy choices and give communities and local government the freedom, responsibility and funding to innovate and develop ways of improving public health in their area. The paper responds to Sir Michael Marmot's strategic review of health inequalities in England post 2010 - "Fair society, healthy lives" (available at

<http://www.marmotreview.org/AssetLibrary/pdfs/Reports/FairSocietyHealthyLives.pdf>) and adopts its life course framework for tackling the wider social determinants of health. A new dedicated public health service - Public Health England - will be created to ensure excellence, expertise and responsiveness, particularly on health protection where a national response is vital. The paper gives a timetable showing how the proposals will be implemented and an annex sets out a vision of the role of the Director of Public Health.
