Norton Commando motorcycles are subjected to considerable confusion surrounding the selection of an appropriate workshop manual from the multitude of originals and reprints that have recently flooded the on-line marketplace. Many of the reprints found on internet websites are

File Type PDF Haynes Chinese Motorcycle

from 'bedroom sellers' at enticingly low prices by individuals that really have no idea what they are selling. Many are nothing more than poor quality comb-bound photocopies that are scanned and printed complete with greasy pages and thumbprints and, as such, are deceptively described as 'pre-owned'. In addition,

File Type PDF Haynes Chinese Motorcycle

they are often advertised for the incorrect series and/or model years of motorcycles. The Norton Commando model range is especially subjected to incorrect identification by these 'bedroom sellers' and you are encouraged to read the paragraph below to help identify the correct manual for your model.

File Type PDF Haynes Chinese Motorcycle

During the 1968 to 1978
Commando model run
there were 4 different
manuals published by
the factory: The original
52 page 750cc manual
(part number 06-3062)
is applicable to the 1968
to 1970 models ONLY
that were fitted with the
external rev-counter
drive and/or the Atlas
style exhaust (refer to
ISBN 9781588502421).

File Type PDF Haynes Chinese Motorcycle

This original manual was followed by part number 06-3419 which covers the 1970 to 1973 750cc models ONLY.

The next, and most comprehensive manual, part number 06-5146, was published in 1973 and the 850cc data was added making this manual applicable to the entire range of 750cc & 850cc models from

File Type PDF Haynes Chinese Motorcycle

1970 to 1975 (refer to ISBN 9781588502438).

Finally, with the introduction of the electric start, left side gear change, rear disc brake Mark 3 models in 1975, a separate manual part number 00-4224 was published which is specific to the 1975 to 1978 MKIII 850cc series from engine no. 325001 & frame no.

F125001. We are pleased to offer this reproduction of the Factory Workshop Manual 00-4224 to owners of the 1975 onwards Commando Mark 3 models and we hope that the explanation above removes any doubt regarding which manual is correct for a particular series of Norton

There is renewed interest in the Moon in recent years, with the news that a Chinese lunar rover landed on the Moon in January 2014, and NASA

announcing that it is looking for private partners to land a robot on the Moon's surface, as the first step in a programme to exploit the commercial opportunities offered by the Moon. Recent lunar expeditions by both orbiting spacecraft and 'landers' have uncovered far more detail about the Moon's surface and

geology, including the trail of Neil Armstrong's first walk on the Moon in 1969.
