#1 NEW YORK TIMES BESTSELLER • Bren é Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Look for Bren é Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Bren é Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read Daring Greatly and Rising Strong or you're new to Bren é Brown's work, this book is for anyone who wants to step up and into brave leadership.

College Student Leadership Development introduces the idea that we all play a part in producing leadership and that learning how to participate in the process of leadership is something that all college students need to learn as part of their college academic experience. Rather than approaching leadership from the traditional model emphasizing specific skill sets, this book acquaints students with how to learn leadership using the ReAChS model of leadership development (Reflection, Assessment, Challenge, Support). It then encourages students to directly engage their own experiences to hone their leader identity and understanding of leadership as well as improve their leadership knowledge and skills. Step-by-step exercises lead students in reflecting on their experiences, assessing themselves, choosing challenges, creating support networks, and finally capturing and communicating to others what they have learned. Throughout, examples of student leaders' experiences provide readers with powerful examples of others' successes and struggles in leadership alongside the latest psychological research on learning and development.

*Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.*

How do students’ social identities, particularly their gender, influence their leadership practices and development? Using Kimberlé Crenshaw’s concept of intersectionality as a framework, this volume discusses existing and emergent research on gender and leadership and offers key strategies and on how leadership educators can engage students in these topics and provide contemporary critical thinking on how gender and leadership inform one another. This volume examines: the ways intersectionality can be used as a lens for gender and leadership, key considerations for developing and advancing leadership among women, men, and trans\* students, programs and experiences grounded in critical self-reflection and leadership learning among students of all genders, and opportunities for leadership educators to navigate topics of gender and leadership, emphasizing their own self-work and avenues for affecting positive change. Contributing scholars share examples that are developmentally appropriate for high school and college students. This work is designed with leadership educators in mind, emphasizing theory into practice and highlighting the ways that leadership and gender can promote holistic, transformative learning for all students. The Jossey-Bass quarterly report series *New Directions for Student Leadership* explores leadership concepts and pedagogical topics of interest to high school and college leadership educators. Issues are grounded in scholarship and feature practical applications and best practices in youth and adult leadership education.

While leaders may desire or have been told that they must put certain structures into place in order to enhance their leadership capabilities, they may not know exactly what structures are needed, or the skills that are required for implementation. Authors Michael Fullan and Lyle Kirtman go beyond simply telling you what you need to put in place to enhance leadership—they detail the route to successful leadership. *Coherent School Leadership* will show you how to combine the components of Fullan's Coherence Framework (the Framework) with Kirtman's 7 Competencies for Highly Effective Leaders (the Competencies) to drive coherence—the shared depth of understanding about the nature of the work and how it impacts the results desired for student achievement—to change the culture in schools from reactive to proactive. Fullan and Kirtman, whose work is based in practice, will:

- Show you how to use specific competencies to drive coherence
- Provide examples that show how other leaders have successfully created coherence
- Guide you through the day-to-day distractions/stresses so that you can stay on course
- Show you how to

use the Competencies in relation to the Framework Taking a world view of the forces that could destabilize education and the work of coherence, Coherent School Leadership will show how proven frameworks such as the Framework and the Competencies can help you cope with even the most complex scenarios.

*"Sarah Marshall and Anne Hornak have done a magnificent job exploring diverse contexts in which college students expand their individual leadership capacity and learn and practice engaging in relational leadership with others. These cases are realistic because they were gathered from their interviews with real students engaging in leadership. From whatever perspective, students can learn that they are doing leadership when they work with others to address shared issues, solve shared problems, and work toward positive change."—from the Foreword by Susan R. Komives*  
*This book presents over 230 case studies that reflect typical issues faced by undergraduate student leaders. The scenarios cover the range of functional areas of student life. These cases are intended for use by faculty and student affairs professionals as training tools for new student leaders who generally receive little preparation before assuming their positions. Cases provide an opportunity for students to roleplay and discuss scenarios before they encounter potentially similar events in their daily lives as leaders; engage students intensely in their learning, as they work through the issues and problems; and promote meaningful dialogue and discussion of relevant theory. The cases are based on real life dilemmas, and reflect both contemporary and historical campus issues. They are derived from interviews with 110 undergraduates and 11 student affairs administrators from large public research institutions, small privates, community colleges, and mid-sized comprehensive schools. The book begins with guidance on how to use case studies effectively, and on how to incorporate theory in analyzing them. The cases are then grouped into chapters, each of which focuses on a*

*particular type of student organization. The cases vary in length to allow for multiple uses. Shorter cases can be role played and discussed in leadership training workshops, while longer cases can be used as take home assignments or debated during longer training sessions. The book concludes with general advice for student leaders. To assist with the facilitation process, the authors provide discussion questions to begin the analysis of each case. The cases are written broadly enough to allow for a variety of possible solutions.*
