"A book for the ages." —Los Angeles Times Book Review
Four Days in November is an extraordinarily exciting, precise, and definitive narrative of the assassination of President John F. Kennedy on November 22, 1963, by Lee Harvey Oswald. It is drawn from Reclaiming History: The Assassination of President John F. Kennedy, a monumental and historic account of the event and all the conspiracy theories it spawned, by Vincent Bugliosi, legendary prosecutor of Charles Manson and author of Helter Skelter. For general readers, the carefully documented account presented in Four Days is utterly persuasive: Oswald did it and he acted alone.

*During the course of American history, wrongful events have occurred and certain Americans have stood up and spoken out against these wrongs: Tom Paine, Edward R. Murrow, Daniel Ellsberg. Vincent Bugliosi takes his place in this special pantheon of patriots with his powerful, brilliant, and courageous expose of crime by the highest court in the land. When an article he wrote on this topic appeared in The Nation magazine in February 2001, it drew the largest outpouring of letters and e-mail in the magazine's 136-year history, tapping a deep reservoir of outrage. The original article is now expanded, amended, and backed by amplifications, endnotes, and the relevant Supreme Court decisions.*

*In Nicholas Meyer's The Return of the Pharaoh, Sherlock Holmes returns in an adventure that takes him to Egypt in search of a missing nobleman, a previously undiscovered pharaoh's tomb, and a conspiracy that threatens his very life. With his international bestseller, The Seven Per Cent Solution, Nicholas Meyer brought to light a previously unpublished case of Sherlock Holmes that reinvigorated the world's interest in the first consulting detective. Now, many years later, Meyer is given exclusive access to Dr. Watson's unpublished journal, wherein he details a previously unknown case. In 1910, Dr. John Watson travels to Egypt with his wife Juliet. Her tuberculosis has returned and her doctor recommends a stay at a sanitarium in a dry climate. But while his wife undergoes treatment, Dr. Watson bumps into an old friend—Sherlock Holmes, in disguise and on a case. An English Duke with a penchant for egyptology has disappeared, leading to enquiries from his wife and the Home Office. Holmes has discovered that the missing duke has indeed vanished from his lavish rooms in Cairo and that he was on the trail of a previous undiscovered and unopened tomb. And that he's only the latest Egyptologist to die or disappear under odd circumstances. With the help of Howard Carter, Holmes and Watson are on the trail of something much bigger, more important, and more sinister than an errant lord.*

*The #1 True Crime Bestseller of All Time—7 Million Copies Sold in the summer of 1969, in Los Angeles, a lavish of brutal, seemingly random murders captured headlines across America. A famous actress (and her unborn child), an heiress to a coffee fortune, a supermarket owner and his wife were among the seven victims. A thin trail of circumstances eventually tied the Tate-LaBianca murders to Charles Manson, a would-be pop singer of small talent living in the desert with his "family" of devoted young women and men. What was his hold over them? And what was the motivation behind such savagery? In the public imagination, over time, the case assumed the proportions of myth. The murders marked the end of the sixties and became an immediate symbol of the dark underside of that era. Vincent Bugliosi was the prosecuting attorney in the Manson trial, and this book is his enthralling account of how he built his case from what a defense attorney dismissed as only "two fingerprints and Vince Bugliosi." The meticulous detective work with which the story begins, the prosecutor's view of a complex murder trial, the reconstruction of the philosophy Manson inculcated in his fervent followers...these elements make for a true crime classic. Helter Skelter is not merely a spellbinding murder case and courtroom drama but also, in the words of The New Republic, a "social document of rare importance." *"Gives us a portrait close to the truth" of the man responsible for the Tate-LaBianca murders that changed Hollywood and ended the sixties (The New York Times Book Review). This astonishing book lays bare the life and the mind of a man whose acts have left us horrified. His story provides an enormous amount of new information about his life and how it led to the Tate-LaBianca murders and reminds us of the complexity of the human condition. Born in the middle of the Depression to an unmarried fifteen-year-old, Manson lived through a bewildering succession of changing homes and substitute parents, until his mother finally asked the state authorities to assume his care when he was twelve. Regimented and often brutalized in juvenile homes, Manson became immersed in a life of petty theft, pimping, jail terms, and court appearances that culminated in seven years of prison. Released in 1967, he suddenly found himself in the world of hippies and flower children, a world that not only accepted him, but even glorified his anti-establishment values. It was a combination that led, for reasons only Charles Manson can fully explain, to tragedy. Manson's story, distilled from seven years of interviews and examinations of his correspondence, provides sobering insight into the making of a criminal mind, and a fascinating picture of the last years of the sixties. "A glimpse of part of the American experience that is rarely described from the inside. . . . It compels both interest and horror."—The Washington Post "Provides a fascinating glimpse into the mind of a truly dangerous human being."—Los Angeles Herald Examiner*

*An account of one of the most notorious criminals in American history puts Manson in the context of his times, the turbulent end of the 1960s, revealing a rock star wannabe whose killings were directly related to his musical ambitions.*

Robbed of her daughter and her career, Emily Stanton, a beautiful 1920s actress, seeks vindication—a quest that leads her through the illicit world of New York speakeasies and ultimately to a courtroom trial for murder.

With no twentieth century writer was so observant and elegant a chronicler of his times as Truman Capote. Whether he was profiling the rich and famous or creating indelible word-pictures of events and places near and far, Capote's eye for detail and dazzling style made his reportage and commentary undeniable triumphs of the form. Portraits and Observations is the first volume devoted solely to all the essays ever published by this most beloved of writers. From his travel sketches of Brooklyn, New Orleans, and Hollywood, written when he was twenty, to the art at the peak of his career, to the brief works penned during the isolated denouement of his life, these essays provide an essential window into mid-twentieth-century America as offered by one of its canniest observers. Included are such celebrated masterpieces of narrative nonfiction as "The Muses Are Heard" and the short nonfiction novel "Handcarved Coffins," as well as many long-out-of-print essays, including portraits of Isak Dinesen, Mae West, Marcel Duchamp, Humphrey Bogart, and Marilyn Monroe. Among the highlights are "Ghosts in Sunlight: The Chameleons, in which Capote candidly recounts the highs and lows of his long career, and a playful self-portrait in the form of an imaginary self-interview. The book concludes with the author's last written words, composed the day before his death in 1984, the recently discovered "Remembering Willa Cather," Capote's touching recollection of his encounter with the author when he was a young man at the dawn of his career. Portraits and Observations puts on display the full spectrum of Truman Capote's brilliance. Certainly, Capote was, as Somerset Maugham said, But as the pieces gathered here remind us, he was also an artist of remarkable substance.

A journalist's twenty-year fascination with the Manson murders leads to shocking new revelations about the FBI's involvement in this riveting reassessment of an infamous case in American history. Over two grim nights in Los Angeles, the young followers of Charles Manson murdered seven people, including the actress Sharon Tate, then eight months pregnant. With no mercy and seemingly no motive, the Manson Family followed their leader's every order -- their crimes lit a flame of paranoia across the nation, spelling the end of the sixties. Manson became a forever attached to an era when charlatans mixed with prodigies, free love was as possible as brainwashing, and utopia -- or dystopia -- was just an acid trip away. Twenty years ago, when journalist Tom O'Neill was reporting a magazine piece about the murders, he worried there was nothing new to say. Then he unearthed shocking evidence of a cover-up behind the "official" story, including police carelessness, legal misconduct, and potential surveillance by intelligence agencies. When a tense interview with Vincent Bugliosi -- prosecutor of the Manson Family -- into the cover-up and the FBI's involvement was onto the news, O'Neill's questions were: Why did the law enforcement, including Manson's own parole officer, act on their many chances to stop him? And how did Manson -- an illiterate ox-con -- turn a group of peaceful hippies into remorseless killers? O'Neill's quest for the truth led him from reclusive celebrities to seasoned spies, from San Francisco's summer of love to the shadowy sites of the CIA's mind-control experiments. The product of two decades of reporting, hundreds of new interviews, and dozens of never-before-seen documents from the LAPD, the FBI, and the CIA, Chaos mounts an argument that could be, according to Los Angeles Deputy District Attorney Steven Kay, strong enough to overturn the verdicts on the Manson murders. This is a book that overturns our understanding of a pivotal time in American history.

Summary and Analysis of Helter Skelter: The True Story of the Manson Murders

Manson in His Own Words

*The most authoritative account ever written of how an ordinary juvenile delinquent named Charles Manson became the notorious murderer whose crimes still shock and horrify us today. More than forty years ago Charles Manson and his mostly female commune killed nine people. It was the culmination of a criminal career that traces back to Manson's childhood. Manson puts the killer in the context of his times, the turbulent late sixties, an era of race riots and street protests when authority in all its forms was under siege. Manson created and refined his message to fit the times, persuading confused young women (and a few men) that he had the solutions to their problems. At the same time he used them to pursue his long-standing military ambitions, relocating to Los Angeles in search of a recording contract. His frustrated ambitions, combined with his bizarre race-war obsession, would have lethal consequences as he convinced his followers to commit heinous murders on successive nights. We will look at the life and crime of America's most horrific cult leader. And explore where "The Manson Family" is today.*

**As acclaimed psychological researcher and author David Buss writes, "People are mesmerized by murder. It commands our attention like no other human phenomenon, and those touched by its ugly tendrils never forget." Though we may like to believe that murderers are pathological misfits and hardened criminals, the vast majority of murders are committed by people who, until the day they kill, would seem to be perfectly normal. David Buss's pioneering work has made major national news in the past, and this provocative book is sure to generate a storm of attention. The Murderer Next Door is a riveting look into the dark underworld of the human psyche—an astonishing exploration of when and why we kill and what might push any one of us over the edge. A leader in the innovative field of evolutionary psychology, Buss conducted an unprecedented set of studies investigating the underlying motives and circumstances of murders, from the bizarre outlier cases of serial killers to those of the friendly next-door neighbor who one day kills his wife. Reporting on findings that are often startling and counterintuitive—the younger woman involved in a love triangle is at a high risk of being killed—the puts forth a bold new general theory of homicide, arguing that the human psyche has evolved specialized adaptations whose function is to kill. Talking readers through the surprising twists and turns of the evolutionary logic of murder, he explains exactly when each of us is most at risk, both of being murdered and of becoming a murderer. His findings about the high-risk situations alone will be news making. Featuring gripping storytelling about specific murder cases—including a never used FBI file of more than 400,000 murders and a highly detailed study of 400 murders conducted by Buss in collaboration with a forensic psychiatrist, and a pioneering investigation of homicidal fantasies in which Buss found that 91 percent of men and 84 percent of women have had at least one such vivid fantasy—The Murderer Next Door will be necessary reading for those who have been fascinated by books on profiling, lovers of true crime and murder mysteries, as well as readers intrigued by the inner workings of the human mind.**

**CSI Told You Lies is a gripping account of the work of the forensic scientists on the frontline of Australia's major crime and disaster investigations. They are part of the team at the Victorian Institute of Forensic Medicine (VIFM), a state-of-the-art facility in Melbourne. VIFM is a world-renowned centre of forensic science, and its team members have led major recovery operations over the years, from the 2004 Boxing Day tsunami to the 2009 Black Saturday bushfires to the shooting down of flight MH17 over Ukraine in 2014. VIFM forensics experts have also played pivotal roles in some of Australia's highest-profile homicide cases, including the Frankston Serial Killer, the murders of Eurydice Dixon and Aya Maasarwe, and the arrest of convicted serial killer Peter Dupas. Join Meshel Laurie as she goes 'behind the curtain' at VIFM, interviewing the Institute's talented roster of forensic experts about their daily work. Her subjects also include others touched by Australia's major crime and disaster investigations, including homicide detectives, defence barristers and families of victims as they confront their darkest moments. After reading CSI Told You Lies you'll never read another homicide headline without wondering about the forensic pathologist who happened to be on call, the evidence they found and the truth they uncovered.**

**"The cumulative effect is overwhelming. Eleanor Roosevelt was right: Hoover's FBI was an American gestapo." —Newsweek Shocking, grim, frightening, Curt Gentry's masterful portrait of America's top policeman is a unique political biography. From more than 300 interviews and over 100,000 pages of previously classified documents, Gentry reveals exactly how a paranoid director created the fraudulent myth of an invincible, incorruptible FBI. For almost fifty years, Hoover held virtually unchecked political power, manipulating every president from Franklin D. Roosevelt to Richard Nixon. He kept extensive blackmail files and used illegal wiretaps and hidden microphones to destroy anyone who opposed him. The book reveals how Hoover helped create McCarthyism, blackmailed the Kennedy brothers, and influenced the Supreme Court; how he retarded the civil rights movement and forged connections with mobsters; as well as insight into the Watergate scandal and what part he played in the investigations of President John F. Kennedy and Martin Luther King Jr. Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available as Breakfast at Tiffany's and Other Voices, Other Rooms (In one volume), Portraits and Observations, and The Complete Stories Truman Capote's masterpiece, In Cold Blood, created a sensation when it was first published, serially, in The New Yorker in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.**

American based Foreign correspondent Ivor Davis, delivers a gripping, 'I was there' eye witness, inside story about the most notorious murder spree of the 20th century. In Manson Exposed: A Reporter's Fifty-Year Journey into Madness and Murder, Davis is the brutally honest guide to this true crime horror story. In this mix of personal memoir, criticism, and investigative journalism, Davis delivers a truly original take on the byzantine case that terrified and mesmerized the nation, including his new conclusion that THE BEATLES DIDN'T MAKE THEM DO IT.

Davis was on the front lines of the story and offers vivid, personal accounts, interviews and hitherto unknown details from the very beginning right up to the death of the blue collar psycho named Charles Manson. He charts the tragic inside stories not only of the those murdered but of the long list of Collateral Damage victims: the rock star, the Oscar winning director and the entertainment legends, whose lives were also destroyed by Charles Manson and his crackpot acolytes.

"Bugliosi, the quintessential prosecutor, has written a crime book that should be read by every lawyer and judge in America."—F. Lee Bailey On December 11, 1966, a mysterious assassin shot Henry Stockton to death, set his house on fire, and left the scene without a trace. A year later, when a woman was found brutally killed, shreds of evidence suggested a connection between the two murders. In the Palitko-Stockton trial, prosecutor Vincent Bugliosi offered a brilliant summation that synthesized for the jury the many inferences and shades of meaning in the testimony, fitting all the pieces together in a mosaic of guilt. But will the jury be persuaded?

This book presents a counter-point to the book Helter Skelter. Susan Atkins, a member of the group involved in the Charles Manson murders of 1969, attempts to demystify the crimes and show them for what they really were.
