The distinguished diplomat Sir Ernest Satow's retirement began in 1906 and continued until his death in August 1929. From 1907 he settled in the small town of Ottery St. Mary in rural East Devon, England. He was very active, serving as a British delegate at the Second Hague Peace Conference in 1907 and on various committees related to church, missionary and other more local affairs: he was a magistrate and chairman of the Urban District Council. He had a very wide social circle of family, friends and former colleagues, with frequent distinguished visitors. He produced two seminal books: A Guide to Diplomatic Practice (1917, now in its seventh revised edition and referred to as 'Satow') and A Diplomat in Japan (1921). The latter is highly evaluated as a rare foreigner's view of the years leading to the Meiji Restoration of 1868. This book in two volumes is the last in a series of Satow's diaries edited by Ian Ruxton. This is the first-ever publication. Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

This book explores the metaphysical, epistemological, and hermeneutical theories of Schelling's final system concerning the nature and meaning of religious mythology. This perspective is not surprising since Schelling regarded religion (not science or philosophy) as embodying the most complete manifestation of truth. Beach examines Schelling's novel attempt to account for the changing historical forms of religion in terms of a complex theory of dynamic spiritual powers, or "potencies." He shows that these are not mere representations, ideas, or projected feelings created by ancient myth-makers for the benefit of a credulous populace. Instead, Beach demonstrates that these potencies should be seen as animate powers inhabiting the unconscious strata of a people's collective mind.

'The book I have long been waiting for: an unsparing, comprehensive, and thoroughly documented history of the global oil industry and its pernicious influence on human society and the planet we inhabit... Essential reading' Michael Klare Petroleum has always been used by humans: as an adhesive by Neanderthals, as a waterproofing agent in Noah's Ark and as a weapon during the Crusades. Its eventual extraction from the earth in vast quantities transformed light, heat and

power. A Pipeline Runs Through It is a fresh, comprehensive in-depth look at the social, economic, political and geopolitical forces involved in our transition to the modern oil age. It tells an extraordinary origin story, from the pre-industrial history of petroleum through to large-scale production in the mid-nineteenth century and the development of a dominant, fully-fledged oil industry by the early twentieth century. This was always a story of imperialist violence, political disenfranchisement, economic exploitation and environmental destruction. The near total eradication of the Native Americans of New York, Pennsylvania and Ohio has barely been mentioned as a precondition for the emergence of the first industrialised oil region in the United States. Britain's invasion of Upper Burma in 1885 was perhaps the first war fought, at least in part, for access to oil; the growth of Royal Dutch-Shell involved the genocidal subjugation of people of the Dutch East Indies and the exploitation of oil in the Middle East arose seamlessly out of Britain's prior political and military interventions in the region. Finally, in an entirely new analysis, the book shows how the British navy's increasingly desperate dependence on vulnerable foreign sources of oil may have been a catalytic ingredient in the outbreak of the First World War. The rise of oil has shaped the modern world, and this is the book to understand it.

Herodotus: Histories

From the Preface: In the knowledge that the Hebrew faith served as the matrix for our Lord Jesus Christ and the early leaders of the Church, this study may serve as a stimulus to search the Scriptures afresh to equip the man of God for teaching, for reproof, for correction, and for training in righteousness, in fact, for every good work (2 Timothy 3:16-17).

An introduction to the history of documenting history and historians. Beginning with early myths, and then looking at Jewish, Greek, Roman, and Christian historians.

He has been called the "Father of History", and was the first historian known to collect his materials systematically, test their accuracy to a certain extent and arrange them in a well-constructed and vivid narrative. The Histories-his masterpiece and the only work he is known to have produced-is a record of his "inquiry", being an investigation of the origins of the Greco-Persian Wars and including a wealth of geographical and ethnographical information. The Histories, were divided into nine books, named after the nine Muses: the "Muse of History", Clio, representing the first book, then Euterpe, Thaleia, Melpomene, Terpsichore, Erato, Polymnia, Ourania and Calliope for books 2 to 9, respectively.

Herodotus. Bk. VIII

For centuries the myth of Oedipus, the man who unwittingly killed his father and married his mother, has exerted a powerful hold on the human imagination; but no retelling of that myth has ever come close, in passion, drama, and menace to the one that we find in Sophocles' Oedipus the King. This new full-scale edition of that classic play - the first in any language since 1883 - offers a freshly constituted text based on consultation of manuscripts ancient and mediaeval. The introduction explores the play's dating and production, its creative engagement with pre-Sophoclean versions, its major themes, and its reception during antiquity. The commentary offers a
