Designed to teach nurses about the development, motivational, and sociocultural differences that affect teaching and learning, this text combines theoretical and pragmatic content in a balanced, complete style. --from publisher description.

When we think about young people dealing drugs, we tend to picture it happening on urban streets, in disadvantaged, crime-ridden neighborhoods. But drugs are used everywhere—even in upscale suburbs and top-tier high schools—and teenage users in the suburbs tend to buy drugs from their peers, dealers who have their own culture and code, distinct from their urban counterparts. In Code of the Suburb, Scott Jacques and Richard Wright offer a fascinating ethnography of the culture of suburban drug dealers. Drawing on fieldwork among teens in a wealthy suburb of Atlanta, they carefully parse the complicated code that governs relationships among buyers, sellers, police, and other suburbanites. That code differs from the one followed by urban drug dealers in one crucial respect: whereas urban drug dealers see violent vengeance as crucial to status and security, the opposite is true for their suburban counterparts. As Jacques and Wright show, suburban drug dealers accord status to deliberate avoidance of conflict, which helps keep their drug markets more peaceful—and, consequently, less likely to be noticed by law enforcement. Offering new insight into both the little-studied area of suburban drug dealing, and, by extension, the more familiar urban variety, Code of the Suburb will be of interest to scholars and policy makers alike.

With more than 630 unique questions, this review contains completely up-to-date and evidence-based exam preparation. Practice questions are organized into body system review, special populations, and legal/ethical issues, and culminate in a 175-question practice test that represents the length, variety, and complexity of the certification exam. Have accompanying rationales based on clinical practice guidelines. Completely unique to this publication, the last section of Adult-Gerontology Acute Care Nurse Practitioner Q&A Review guides one through the next steps after the exam—how to progress into practice with your new certification. KEY FEATURES Over 630 practice questions with answers and rationales designed specifically to prepare students for the AG-ACNP exams Contains the most current information and practice using published guidelines Exam tips and pitfalls to avoid in test-taking Includes free access to interactive ebook and Q&A app—track and sync your progress on up to three devices!

For all nursing programs The state-of-the-art three-volume, concept-based, student-centered introduction to nursing professional and healthcare concepts; and more than 435 nursing skills. Today, nurses must be able to transfer their knowledge to new situations, and stay current with new disorders, treatments, and evidence-based practice. Nursing: A Concept-Based Approach to Learning, Volumes I-III, Second Edition with MyNursingLab for Concepts will help them achieve all that and more. This text requires students to participate actively, assume more responsibility for their knowledge, integrate concepts, apply information, and use clinical reasoning. Instead of memorizing thousands of alterations, students gain in-depth knowledge of selected alterations, and learn how to apply that knowledge as new challenges and client presentations come their way. VOLUME I: The first volume focuses on 21 crucial biophysical concepts: acid-base balance; cellular regulation; comfort; digestion; elimination; fluids/electrolytes; health, wellness, and illness; immunity; infection; inflammation; intracranial regulation; metabolism; mobility; nutrition; oxygenation; perfusion; perioperative care; sensory perception; sexuality; thermoregulation, and tissue repair. VOLUME II: The second of two volumes, the fully-updated Volume II focuses on 30 crucial concepts every nurse needs to master. It begins with several Psychosocial Modules covering addiction, cognition, culture/diversity, development, family, grief/loss, mood/affect, self, spirituality, stress/coping, and the nursing domain, covering assessment, caring interventions, clinical decision making, collaboration, communication, care management, professional behaviors, and client teaching/learning. Finally, it turns to the nurse's broader roles, focusing on accountability, advocacy, evidence-based practice, healthcare systems, health policy, informatics, legal issues, and quality of care. VOLUME III: The third and final volume, the fully-updated Volume III focuses on 30 crucial concepts every nurse needs to master. It begins with several Developmental Considerations - Alterations - Related Concepts - Physical Assessment - Diagnostic Tests - Interventions & Therapies Each EXEMPLAR follows the following template: Overview - Pathophysiology and Etiology - Clinical Manifestations and Therapies - Nursing Process - Nursing Care Plan - Relate and Reflect VOLUME III: The only skills book of its kind, Clinical Nursing Skills: A Concept-Based Approach presents more than 435 of the most important skills performed by nurses including common variations. This second edition has been revised, restructured, and assessment program that truly prepares students for the certification exam. Support the concepts and exemplars included in Volumes I and II of Nursing: A Concept-based Approach to Learning, 2e. MyNursingLab for Concepts helps students review, remember, and apply key concepts—resulting in better performance in the course—and provides educators with a dynamic set of tools for gauging individual and class progress. 0133937364 / 9780133926842 MyNursingLab with Pearson eText -- Access Card Package Package consists of: 0132934264 / 9780132934268 Nursing: A Concept-Based Approach to Learning, Volume I 0132934272 / 9780132934275 Nursing: A Concept-Based Approach to Learning, Volume II 013351793 / 978013351798 Clinical Nursing Skills: A Concept-Based Approach to Learning

The first medical specialty selection guide written by residents for students! Provides an inside look at the issues surrounding medical specialty selection, blending first-hand knowledge with useful facts and statistics, such as salary information, employment data, and match statistics. Focuses on all the major specialties and features firsthand portrayals of each by practitioners and residents of each specialty. "A terrific mixture of objective information as well as factual data make this book an easy, informative, and interesting read." --Review from a 4th year Medical Student

Available on the book ' s companion website, Nursing Care Plans based on case scenarios guide you through the diagnostic stages and plan of care for patients with a particular diagnosis.

This must-have workbook helps students learn the prioritization and delegation skills needed to survive nursing school, pass the NCLEX-RN® examination, and make the transition to practice in today's healthcare environment. Consisting of three parts plus an answer key, this resource provides numerous opportunities for students to review cases and answer questions similar to those they will see on the NCLEX-RN examination - including questions in alternate-item formats . Part 1, written by delegation expert Ruth Hansten, is an introduction that provides a practical review of clinical delegation skills and serves as a framework for the exercises that follow. Part 2 consists cases of patients who have relatively straightforward health problems followed by NCLEX examination-style questions focusing on prioritization, delegation, and assignment. Part 3 consists of complex, unfolding cases involving patients who have multiple health conditions, as well as complex patient assignments. An introduction by prioritization and delegation expert Ruth Hansten explains the importance of developing sound clinical skills and judgment in the areas of prioritization, delegation, and assignment. NCLEX-style questions help students develop fundamental skills in prioritization, delegation, and assignment and become familiar with the NCLEX examination format. Questions in Parts 2 and 3 are organized by body system and by complexity, respectively, to allow for easy use with any medical-surgical nursing text. Both sections of exercises give students essential hands-on practice in prioritizing (deciding what to do first), delegating (giving specific tasks to assistive personnel and supervising satisfactory completion of those tasks), and assignment (giving responsibility for the overall care of particular patients to appropriate personnel). The questions in Part 3 are more complex than those in Part 2, allowing students to master core concepts using unambiguous cases before applying this knowledge to patients with more complicated, multidimensional case presentations. Flexible organization allows the workbook to be used with any Elsevier medical-surgical nursing text. The answer key provides rationales for correct as well as incorrect answers, reinforcing the concepts presented in each unit. Questions follow NCLEX style, and about 10% represent the new alternate-item question format. The workbook is three-hole punched and perforated for convenience.

This is the first textbook designed to introduce the six areas of nursing competencies, as developed by the Quality and Safety Education for Nurses (QSEN) initiative, which are required content in undergraduate nursing programs.
