A busy boy and his dog learn to slow down and enjoy life together in this lyrical, rhyming picture book perfect for hurried families everywhere. For one busy boy, life is all hurry up, hurry down, hurry round and round and round! That is until he takes a big breath...and a big break...and slows down to see all the wonderful things in the world around him. From celebrated picture book creators Kate Dopyrak and Christopher Silas Neal, this playful yet powerful picture book reminds us to be present, to be mindful, and to appreciate each moment.

Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 "A masterpiece." –Steven D. Levitt, coauthor of Freakonomics "Bursting with insights." –The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the

best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future. According to its citizens, Hampton, Virginia, is the oldest continuously inhabited English-speaking city on the continent. It replaced Kecoughtan, an important Native American settlement. The English established a thriving tobacco port, a planned town centered on the intersection of King and Queen Streets. The British bombarded the town during the Revolutionary War and pillaged it during the War of 1812. Because of the continued Union occupation of Fort Monroe, Confederate troops burnt the town in 1861 during the Civil War. Rebuilding after 1865 was stimulated by the astonishing national success of the local crab and oyster industries. Early images portray Hamptonians on dusty streets with horse-drawn wagons and merchants in front of often ramshackle storefronts. Later photographs show imposing banks and a huge oyster pile dominating "Crabtown" as the first automobiles, electricity, and trolley cars appeared. Hampton's modern heyday of a working waterfront and busy streets, as shown on the cover, springs to life in these images.

In a world where advanced knowledge is widespread and low-cost labor is readily available, U.S. advantages in the marketplace and in science and technology have begun to erode. A comprehensive and coordinated federal effort is urgently needed to bolster U.S. competitiveness and pre-eminence in these areas. This congressionally requested report by a pre-eminent committee makes four recommendations along with 20 implementation actions that federal policy-makers should take to create high-quality jobs and focus new science and technology efforts on meeting the nation's needs, especially in the area of clean, affordable energy: 1) Increase America's talent pool by vastly improving K-12 mathematics and science education; 2) Sustain and strengthen the nation's commitment to long-term basic research; 3) Develop, recruit, and retain top students, scientists, and engineers from both the U.S. and abroad; and 4) Ensure that the United States is the premier place in the world for innovation. Some actions will involve changing existing laws, while others will require financial support that would come from reallocating existing budgets or increasing them. *Rising Above the Gathering Storm* will be of great interest to federal and state government agencies, educators and schools, public decision makers, research sponsors, regulatory analysts, and scholars.

IB World Schools Yearbook 2009

*The assessment of young children's development and learning has recently taken on new importance. Private and government*

organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

*A Practical Resource Guide of Multicultural School Psychology Competencies* presents lecturers and students with material which will help apply the theory of multicultural school psychology and counseling in practice. *Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to*

*national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.*

Foster's classic guide—a lively and entertaining introduction to literature and literary basics, including symbols, themes, and contexts—that shows you how to make your everyday reading experience more rewarding and enjoyable. While many books can be enjoyed for their basic stories, there are often deeper literary meanings interwoven in these texts. How to Read Literature Like a Professor helps us to discover those hidden truths by looking at literature with the eyes—and the literary codes—of the ultimate professional reader: the college professor. What does it mean when a literary hero travels along a dusty road? When he hands a drink to his companion? When he's drenched in a sudden rain shower? Ranging from major themes to literary models, narrative devices, and form, Thomas C. Foster provides us with a broad overview of literature—a world where a road leads to a

The #1 New York Times bestseller by Tom Brady, six-time Super Bowl champion and one of the NFL 's 100 Greatest Players of All Time. Revised, expanded, and updated, the first book by Tampa Bay Buccaneers and former New England Patriots quarterback Tom Brady—who continues to play at an elite level into his forties—a gorgeously illustrated and deeply practical “athlete 's bible” that reveals Brady 's revolutionary approach to enhanced quality of life and performance through recovery for athletes of all abilities and ages. In this new edition of The TB12 Method, Tom Brady further explains and details the revolutionary training, conditioning, and wellness system that has kept him atop the NFL at an age when most players are deep into retirement. Brady—along with the expert Body Coaches at TB12, the performance lifestyle brand he cofounded in 2013—explain the principles and philosophies of pliability, a paradigm-shifting fitness concept that focuses on a more natural, healthier way of exercising, training, and living. Filled with lessons from Brady 's own training regimen, The TB12 Method provides step-by-step guidance on how develop and maintain one 's own peak performance while dramatically decreasing injury risks. This illustrated, highly visual manual also offers more effective approaches to functional strength & conditioning, proper hydration, supplementation, cognitive fitness, restorative sleep, and nutritious, easy-to-execute recipes to help readers fuel-up and recover. Brady steadfastly believes that the TB12 approach has kept him competitive while extending his career, and that it can make any athlete, male or female, in any sport and at any level achieve his or her own peak performance. With instructions, drills, photos, in-depth case studies that Brady himself has used, along with personal anecdotes and experiences from his legendary career, The

TB12 Method gives you a better way to train and get results with Tom Brady himself as living proof. Approximately 4 million U.S. service members took part in the wars in Afghanistan and Iraq. Shortly after troops started returning from their deployments, some active-duty service members and veterans began experiencing mental health problems. Given the stressors associated with war, it is not surprising that some service members developed such mental health conditions as posttraumatic stress disorder, depression, and substance use disorder. Subsequent epidemiologic studies conducted on military and veteran populations that served in the operations in Afghanistan and Iraq provided scientific evidence that those who fought were in fact being diagnosed with mental illnesses and experiencing mental health "related outcomes" in particular, suicide "at a higher rate than the general population. This report provides a comprehensive assessment of the quality, capacity, and access to mental health care services for veterans who served in the Armed Forces in Operation Enduring Freedom/Operation Iraqi Freedom/Operation New Dawn. It includes an analysis of not only the quality and capacity of mental health care services within the Department of Veterans Affairs, but also barriers faced by patients in utilizing those services.

**that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. ***The United Nations Convention on the Rights of Persons with Disabilities (CRPD) recognized that people with disabilities should have the right to exercise their legal capacity and identified 'supported decision-making' as a means by which people with disabilities can be directly involved in decisions that impact their lives. Offering an overview of its emergence in the disability field and highlighting emerging research, theory, and practice from legal, psychology, education, and health fields, this volume provides a much-needed theoretical and evidence base for supported decision-making. Evidence and strengths-based frameworks for understanding disability, supports, and their roles in promoting supported decision-making are synthesized. The authors describe the application of a social-ecological approach to supported decision-making, and focus on implications for building systems of supports based on current environmental demands. This volume introduces and explains empirical research on critical elements of supported decision-making and the applications of supported decision-making that enhance outcomes, including self-determination and quality of life.***

**A shocking inside account of reckless capitalism and injustice in the Purdue Pharma bankruptcy case. In September 2019, Purdue Pharma—the maker of OxyContin and a company controlled by the infamous billionaire Sackler family—filed for bankruptcy to protect itself from 2,600 lawsuits for its role in fueling the U.S. overdose crisis. Author and activist Ryan Hampton served as co-chair of the official creditors committee that acted as a watchdog during the process, one of only four victims appointed among representatives of big insurance companies, hospitals, and pharmacies. He entered the case believing that exposing the Sacklers and mobilizing against Purdue would be enough to right the scales of justice. But he soon learned that behind closed doors, justice had plenty of other competition—and it came with a hefty price tag. Unsettled is the inside story of Purdue’s excruciating Chapter 11 bankruptcy proceedings, the company’s eventual restructuring, and the Sackler family’s evasion of any true accountability. It’s also the untold story of how a group of determined ordinary people tried to see justice done against the odds—and in the face of brutal opposition from powerful institutions and even government representatives. Although America was envisioned as an equitable place, where the vulnerable are protected from the greed of the powerful, the corporate-bankruptcy process betrays those values. In its heart of hearts, this system is built to shield the ultra-wealthy, exploit loopholes for political power, promote gross wealth inequality, and allow**

**companies such as Purdue Pharma to run amok. The real story of the Purdue bankruptcy wasn't that the billion-dollar corporation was a villain, a serial federal offender. No matter what the media said, Purdue didn't do this alone. They were aided and abetted by the very systems and institutions that were supposed to protect Americans. Even on-your-side elected officials worked against Purdue's victims—maintaining the status quo at all costs. Americans deserve to know exactly who is responsible for failing to protect people over profits—and what a human life is worth to corporations, billionaires, and lawmakers. Unsettled is what happened behind closed doors—the story of a sick, broken system that destroyed millions of lives and let the Sacklers off almost scot-free.**
