*Formed by a small group of university students in the early 1980s, Studio Gainax is now one of the most adventurous and widely esteemed anime companies on the scene. And it is fascinating for its unique approach to animation. Formal experimentation, genre-straddling, self-reflexivity, unpredictable plot twists, a gourmet palate for stylishness, proverbially controversial endings, and a singularly iconoclastic worldview are some of the hallmarks. This documentation of the studio's achievements*

Since its inception, cinema has evolved into not merely a ' reflection ' but an indispensable index of human experience – especially our experience of time ' s passage, of the present moment, and, most importantly perhaps, of the past, in both collective and individual terms. In this volume, Kilbourn provides a comparative theorization of the representation of memory in both mainstream Hollywood and international

art cinema within an increasingly transnational context of production and reception. Focusing on European, North and South American, and Asian films, Kilbourn reads cinema as providing the viewer with not only the content and form of memory, but also with its own directions for use: the required codes and conventions for understanding and implementing this crucial prosthetic technology — an art of memory for the twentieth-century and beyond.

Data Mining aims at the automatic discovery of underlying non-trivial knowledge from datasets by applying intelligent analysis techniques. The interest in this research area has experienced a considerable growth in the last years due to two key factors: (a) knowledge hidden in organizations' databases can be exploited to improve strategic and managerial decision-making; (b) the large

volume of data managed by organizations makes it impossible to carry out a manual analysis. Yannick Pouliot recently burst onto the art scene and immediately earned critical acclaim for the originality of his work. Using various media, notably sculpture, photography and sound, he assigns a leading role to architecture and furniture, with which he creates environments that enfold and isolate visitors. The viewer is thrust into a specific environment with an experience more akin to disembodiment than disorientation. This first monograph documents a new series of works revolving around issues of domesticity in architecture and furnishings.
