Wild pigs inhabit vast areas in Europe, Southern Asia and Africa, and have been introduced in North and South America, while feral pigs are widespread in Australia and New Zealand. Many wild pig species are threatened with extinction, but Eurasian wild boar populations, however, are increasing in many regions. Covering all wild pig and peccary species, the Suidae and Tayassuidae families, this comprehensive review presents new information about the evolution, taxonomy and domestication of wild pigs and peccaries alongside novel case studies on conservation activities and management. One hundred leading experts from twenty five countries synthesise understanding of this group of species; discussing current research, and gaps in the knowledge of researchers, conservation biologists, zoologists, wildlife managers and students. This beautifully illustrated reference includes the long history of interactions between wild pigs and humans, the benefits some species have brought us and their role and impact on natural ecosystems.

*This book succinctly interrogates Pan-Africanism from its early beginning to the present and into the future. It deviates from the traditional approach of many scholars and instead offers a more engaging and instructive approach to the study and understanding of a global phenomenon. A lot has changed about the Pan-African movement, yet it continues to be the starting point for those with interest in modern Africa and the African diaspora.*

Today, the voices from the secular left are hard at work removing any trace of religion from government and the law. Meanwhile, secular historians have successfully limited Christianity's contribution in history to the Crusades and Inquisitions; as if that is all Christians have to speak for. The real story is quite different, primarily that everything good in Western Civilization has its roots in the Christian religion. *How Christianity Built Western Civilization* is the epic tale of how our Christian forefathers stood up to history's darkest forces, to forge a new way of life, grounded in the biblical worldview. Over the centuries it has become evident that Western Civilization has emerged as mankind's greatest achievement. It is here where the greatest political and economic systems were born, and here that we see the concept of human rights emerge, along with the modern scientific process and the greatest discoveries. It is in the West that we find the most advanced educational institutions, along with the greatest charities, artistic masterpieces and architectural innovations. Is this a coincidence, or the deliberate result of our worldview? *How Christianity Built Western Civilization* answers this question with chapters on human rights, modern science, universal education, charity, art and architecture; focusing entirely on the revolutionary milestones and individuals that made these achievements possible. Each chapter unfolds chronologically, starting with the biblical foundation and moving through the work of the early and Medieval Church, arriving at modern times. The author builds a compelling case demonstrating how Western Civilization would be indistinguishable from India, China or Africa today, if not for the teachings of Christ and the Bible.

***"Greek debt" means one thing to the country's creditors. But for millions who prize culture over capital, it means the symbolic debt we owe Greece for democracy, philosophy, mathematics, and fine art. Johanna Hanink shows that our idealized image of ancient Greece dangerously shapes our view of the country's economic hardship and refugee crisis.***
