medium-sized studio in the U.S. loved making video games that millions play. Only some, however, can enjoy this dream job, which can be precarious and alienating for many others. That is, the passion of a predominantly white-male labor force relies on material inequalities involving the sacrificial labor of their families, unacknowledged work of precarious testers, and thousands of racialized and gendered workers in the Global South. A Precarious Game explores the politics of doing what one loves. In the context of work, passion and love imply freedom, participation, and choice, but in fact they accelerate self-exploitation and can

impose emotional toxicity on other workers by forcing them to work endless hours. Bulut argues that such ludic discourses in the game industry disguise the racialized and gendered inequalities on which a profitable transnational industry thrives. Within capitalism, work is not just an economic matter, and the political nature of employment and love can still be undemocratic even when based on mutual consent. As Bulut demonstrates, rather than considering work simply as a matter of economics based on trade-offs in the workplace, we should consider the question of work and love as one of democracy rooted in politics.

It's easy to name a superhero--Superman, Batman, Thor, Spiderman, the Green Lantern, Buffy the Vampire Slayer, Rorschach, Wolverine--but it's not so easy to define what a superhero is. Buffy has superpowers, but she doesn't have a costume. Batman has a costume, but doesn't have superpowers. What is the role of power and superpower? And what are supervillains and why do we need them? In *What is a Superhero?*, psychologist Robin Rosenberg and comics scholar Peter Coogan explore this question from a variety of viewpoints, bringing together contributions from nineteen comic book experts--including both

scholars in such fields as cultural studies, art, and psychology as well as leading comic book writers and editors. What emerges is a kaleidoscopic portrait of this most popular of pop-culture figures. Writer Jeph Loeb, for instance, sees the desire to make the world a better place as the driving force of the superhero. Jennifer K. Stuller argues that the female superhero inspires women to stand up, be strong, support others, and most important, to believe in themselves. More darkly, A. David Lewis sees the indestructible superhero as the ultimate embodiment of the American "denial of death," while writer Danny Fingeroth sees superheroes as

embodying the best aspects of humankind, acting with a nobility of purpose that inspires us.

Interestingly, Fingerroth also expands the definition of superhero so that it would include characters like John McClane of the Die Hard movies: "Once they dodge ridiculous quantities of machine gun bullets they're superheroes, cape or no cape."

From summer blockbusters to best-selling graphic novels, the superhero is an integral part of our culture. What is a Superhero? not only illuminates this pop-culture figure, but also sheds much light on the fantasies and beliefs of the American people.

Revealing that AD is not one condition, as it is currently treated, but three, The End of Alzheimer's outlines 36 metabolic factors (micronutrients, hormone levels, sleep) that can trigger "downsizing" in the brain. The protocol shows us how to rebalance these factors using lifestyle modifications like taking B12, eliminating gluten, or improving oral hygiene. The results are impressive. Of the first ten patients on the protocol, nine displayed significant improvement with 3-6 months; since then the protocol has yielded similar results with hundreds more. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals, where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society, and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge.
