WRITING ANALYTICALLY treats writing as a tool of thought, offering prompts that lead students through the process of analysis and help them to generate original, well-developed ideas. The authors of this brief, popular rhetoric believe that learning to write well requires learning to use writing as a tool to think well. Rosenwasser and Stephen Terrell's *Writing Analytically* is a new mode of enriching understanding that precedes and in some cases supplants argument. Materials in the eighth edition are better integrated, more contextualized and--when possible--condensed. A new chapter, Thinking Like a Writer, contains a broad array of strategies for integrating opportunities for writing into a course. It makes explicit the ways in which writing as a tool to think well can be used in a variety of ways. The new edition of *Writing Analytically* is a book: that to think of yourself as a writer is to see more, to think differently and to engage the meaning of things more earnestly. Why do we overeat time and time again? Why do we make poor diet choices while we want to be healthy? What makes losing weight so difficult? These and many other vital questions are addressed in 12 Steps to Raw Foods in an open and sincere dialogue. Based on the latest scientific research, Victoria Boutenko explains the numerous benefits of raw foods. Raw foods are fresh rather than cooked foods. This book contains self-tests and questionnaires that help the reader to determine if they have hidden eating patterns that undermine their health. Using examples from life, the author explores the most common reasons for people to make unhealthy eating choices. Rather than simply praising the benefits of raw foods, the author provides helpful tips and coping techniques to form and maintain new, healthy patterns. Learn how to make a raw food restaurant card that makes dining with co-workers easy and enjoyable. Discover three magic sentences that enable you to refuse your mother-in-law's apple pie without offending her. Find out how to sustain your chosen diet with a variety of raw foods. The author also discusses a few of the many scenarios that Boutenko outlines. Written in a convenient 12-step format, this book guides the reader through the most significant physical, psychological, and spiritual phases of the transition from cooked to raw foods. Embracing the raw food lifestyle is more than simply turning off the stove. Such a radical change in the way we eat can have a profound impact on our health. Boutenko touches on the human relationship with nature, the value of supporting others, and the importance of living in harmony with people who don't share the same point of view on eating. Already a classic, this enhanced second edition is aimed at anyone interested in improving their health through diet.

Discourses in Place is essential reading for anyone with an interest in language and the way we communicate. Written by leaders in the field, this text argues that we can only interpret the meaning of public texts like road signs, notices and brand logos by considering the social and physical world that surrounds them. Drawing on a wide range of real examples, from signs in the Chinese mountains, to urban centres in Austria, Italy, North America and Hong Kong, this textbook equips students with the methodology and models they need to undertake their own research in 'geosemiotics', the key interface between semiotics and the physical world. Discourses in Place is highly illustrated, containing real examples of language in the material world, including a 'how to use this book' section, group and individual activities, and a glossary of key terms.

Calling for a radical reexamination of the traditional foundation of composition instruction--the thesis/support form, this book argues that the essay, with its informality, conversational tone, meditative mood, and integration of form and content, is better suited to developmental, epistemological, ideological, and feminist rhetorical perspectives. The book first traces the origins of the essay in the 16th century. It then examines 20th-century theories of the form to illustrate what constitutes the fundamental qualities of the essay--epistemological skepticism, anti-scholasticism, and the use of an "anti-Ciceronian chrono-logic" organization ("we can only have one thought in our heads at a time, one thought leads to another, and time flows in only one direction"). This leads to writing that is well developed and well ordered, consistent, and methodical. The book shapes a "rehabilitative theory" of the essay by applying the theories of Mikhail Bakhtin to advance a conception of the essay as a centrifugal, novelistic, dialogic, and carnivalesque form. The book then examines the practice of some contemporary essayists--Aldous Huxley, Joan Didion, Charles Simic, Alice Walker, Scott Russell Sanders, Gretel Ehrlich, and Joseph Epstein. Extensive, detailed accounts of assignments and classroom activities on the essay form that have been used effectively with students are offered. Several student essays are presented in their entirety and analyzed in the book. An afterword and appendixes on sources and works cited conclude the book. (NKA)

*"At long last, a discussion of plagiarism that doesn't stop at 'Don't do it or else,' but does full justice to the intellectual interest of the topic!" ---Gerald Graff, author of Clueless in Academe and 2008 President, Modern Language Association This collection is a timely intervention in national debates about what constitutes original or plagiarized writing in the digital age. Somewhat ironically, the Internet makes it both easier to copy and easier to detect copying. The essays in this volume explore the complex issues of originality, imitation, and plagiarism, particularly as they concern students, scholars, professional writers, and readers, while also addressing a range of related issues, including copyright conventions and the ownership of original work, the appropriate dissemination of innovative ideas, and the authority and role of the writer/author. Throughout these essays, the contributors grapple with their desire to encourage and maintain free access to copyrighted material for noncommercial purposes while also respecting the reasonable desires of authors to maintain control over their own work. Both novice and experienced teachers of writing will learn from the contributors' practical suggestions about how to fashion unique assignments, teach about proper attribution, and increase students' involvement in their own writing. This is an anthology for anyone interested in how scholars and students can navigate the sea of intellectual information that characterizes the digital/information age. "Eisner and Vicinus have put together an impressive cast of contributors who cut through the war on plagiarism to examine key specificities that often get blurred by the rhetoric of slogans. It will be required reading not only for those concerned with plagiarism, but for the many more who think about what it means to be an author, a student, a scientist, or anyone who negotiates and renegotiates the meaning of originality and imitation in collaborative and information-intensive settings." ---Mario Biagioli, Professor of the History of Science, Harvard University, and coeditor of Scientific Authorship: Credit and Intellectual Property in Science "This is an important collection that addresses issues of great significance to teachers, to students, and to scholars across several disciplines. . . . These essays tackle their topics head-on in ways that are both accessible and provocative." ---Andrea Lunsford, Louise Hewlett Nixon Professor of English, Claude and Louise Rosenberg Jr. Fellow, and Director of the Program in Writing and Rhetoric at Stanford University and coauthor of Singular Texts/Plural Authors: Perspectives on Collaborative Writing digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. *The brilliant, controversial, bestselling critique of American culture that “hits with the approximate force and effect of electroshock therapy” (The New York Times)—now featuring a new afterword by Andrew Ferguson in a twenty-fifth anniversary edition. In 1987, eminent political philosopher Allan Bloom published The Closing of the American Mind, an appraisal of contemporary America that “hits with the approximate force and effect of electroshock therapy” (The New York Times) and has not only been vindicated, but has also become more urgent today. In clear, spirited prose, Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis: the result of a dangerous narrowing of curiosity and exploration by the university elites. Now, in this twenty-fifth anniversary edition, acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom’s argument caused such a furor at publication and why our culture so deeply resists its truths today.*

Continuously evolving to address the needs of today's students, THE HODGES HARBRACE HANDBOOK, 19th Edition, guides student writers in developing their understanding of the rhetorical situation. information, arrange it well, and use the most appropriate language when writing for an audience. Like all of its predecessors, the nineteenth edition provides both teachers and students the ease of reference and attention to detail that have made the HARBRACE handbooks THE standard of reliability since 1941. This edition has been updated to reflect guidelines from the 2016 MLA HANDBOOK, Eighth Edition. A timely collection of essays by prominent scholars in the field—on the past, present, and future of rhetoric instruction. From Isocrates and Aristotle to the present, rhetorical education has consistently been regarded as the linchpin of a participatory democracy, a tool to foster civic action and social responsibility. Yet, questions of who should receive rhetorical education, in what form, and for what purpose, continue to vex teachers and scholars. The essays in this volume converge to explore the purposes, problems, and possibilities of rhetorical education in America on both the undergraduate and graduate levels and inside and outside the academy. William Denman examines the ancient model of the "citizen-orator" and its value to democratic life. Thomas Miller argues that English departments have embraced a literary-research paradigm and sacrificed the teaching of rhetorical skills for public participation. Susan Kates explores how rhetoric is taught at nontraditional institutions, such as Berea College in Kentucky, where Appalachian dialect is espoused. Nan Johnson looks outside the academy at the parlor movement among women in antebellum America. Michael Halloran examines the rhetorical education provided by historical landmarks, where visitors are encouraged to share a common public discourse. Laura Gurak presents the challenges posed to traditional notions of literacy by the computer, the promises and dangers of internet technology, and the necessity of a critical cyber-literacy for future rhetorical curricula. Collectively, the essays coalesce around timely political and cross-disciplinary issues. Rhetorical Education in America serves to orient scholars and teachers in rhetoric, regardless of their disciplinary home, and help to set an agenda for future classroom practice and curriculum design.

"Deserves a place alongside George Orwell's 'Politics and the English Language'. . . . one of the most important political books of this perilous summer."—The Washington Post "A must-read"—Salon "Highly recommended"—Jack Shafer, Politico Featured in "The Best New Books to Read This Summer" and "Lit Hub's Most Anticipated Books of 2020"—Literary Hub Historic levels of polarization, a disaffected and frustrated electorate, and widespread distrust of government, the news media, and traditional political leadership set the stage in 2016 for an unexpected, unlikely, and unprecedented presidential contest. Donald Trump's campaign speeches and other rhetoric seemed on the surface to be simplistic, repetitive, and disorganized to many. As Demagogue for President shows, Trump's campaign strategy was anything but simple. Political communication expert Jennifer Mercieca shows how the Trump campaign expertly used the common rhetorical techniques of a demagogue, a word with two contradictory definitions—"a leader who makes use of popular prejudices and false claims and promises in order to gain power" or "a leader championing the cause of the common people in ancient times" (Merriam-Webster, 2019). These strategies, in conjunction with post-rhetorical public relations techniques, were meant to appeal to a segment of an already distrustful electorate. It was an effective tactic. Mercieca analyzes rhetorical strategies such as argument ad hominem, argument ad baculum, argument ad populum, reification, paralipsis, and more to reveal a campaign that was morally repugnant to some but to others a brilliant appeal to American exceptionalism. By all accounts, it fundamentally changed the discourse of the American public sphere. THE WRITER'S HARBRACE HANDBOOK, Brief 5E, International Edition is grounded in the belief that an understanding of the rhetorical situation--the writer, reader, message, context, and opportunity for writing--provides the best starting point for effective writing and reading. This comprehensive handbook guides student writers in employing that rhetorical understanding as they choose the most effective information to include, the best arrangement of that information, and the most appropriate language to use. The text moves students through the steps that constitute successful writing from finding appropriate topics and writing clear thesis statements to arranging ideas and developing initial drafts. THE WRITER'S HARBRACE HANDBOOK, Brief 5E, International Edition also provides several sample student papers in various disciplines, along with instruction for successfully completing similar assignments.

What If? is the first handbook for writers based on the idea that specific exercises are one of the most useful and provocative methods for mastering the art of writing fiction. With more than twenty-five years of experience teaching creative writing between them, Anne Bernays and Pamela Painter offer more than seventy-five exercises for both beginners and more experienced writers. These exercises are designed to develop and refine two basic skills: writing like a writer and, just as important, thinking like a writer. They deal with such topics as discovering where to start and end a story; learning when to use dialogue and when to use indirect discourse; transforming real events into fiction; and finding language that both sings and communicates precisely. What If? will be an essential addition to every writer's library, a welcome and much-used companion, a book that gracefully borrows a whisper from the muse.

Reconnecting Reading and Writing explores the ways in which reading can and should have a strong role in the teaching of writing in college. Reconnecting Reading and Writing draws on broad perspectives from history and international work to show how and why reading should be reunited with writing in college and high school classrooms. It presents an overview of relevant research on reading and how it can best be used to support and enhance writing instruction.

Continuously evolving to address the needs of today's students, THE HODGES HARBRACE HANDBOOK, 18E, guides student writers in developing their understanding of the rhetorical situation. This understanding enables even those students with minimal experience or confidence in their writing to learn to write more effectively--to choose the most pertinent information, arrange it well, and use the most appropriate language when writing for an audience. This grammar-first handbook provides comprehensive coverage of grammar, style, punctuation, mechanics, writing, and research--all presented in the context of rhetorical concerns, including the writer, reader, message, context, and purpose. Linda Nilson puts forward an innovative but practical and tested approach to grading--the specifications grading paradigm--which restructures assessments to streamline the grading process and greatly reduce grading time, empower students to choose the level of attainment they want to achieve, reduce antagonism between the evaluator and the evaluated, and increase student receptivity to meaningful feedback, thus facilitating the learning process - all while upholding rigor. In addition, specs grading increases students' motivation to do well by making expectations clear, lowering their stress and giving them agency in determining their course goals. Among the unique characteristics of the schema, all of which simplify faculty decision making, are the elimination of partial credit, the reliance on a one-level grading rubric and the "bundling" of assignments and tests around learning outcomes. Successfully completing more challenging bundles (or modules) earns a student a higher course grade. Specs grading works equally well in small and large class settings and encourages "authentic assessment." Used consistently over time, it can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve.

This superb and practical work dedicates itself to spreading good practice: it uses a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective.

Sociology is the study of society. In order to understand society we must be able to see the world through the eyes of others. By using this social logical imagination you can understand the world around you. Sociology involves asking questions and solving problems. It focuses on looking at people and their ways of life as well as studying social trends, cultural changes, human development, social institutions, and collective behavior. Studying sociology also means looking at why things are where they are and at the relationships between humans and the world around them. The study of sociology helps us make connections between human behavior and society. - p. xxvi-xxvii.

With this new edition, Science and Technical Writing confirms its position as the definitive style resource for thousands of established and aspiring technical writers. Editor Philip Rubens has fully revised and updated his popular 1992 edition, with full, authoritative coverage of the techniques and technologies that have revolutionized electronic communications over the past eight years.
